# ABSTRACT

*Current Population Survey, 2021 Annual Social and Economic (ASEC) Supplement conducted by the Bureau of the Census for the Bureau of Labor Statistics. – Washington: U.S. Census Bureau [producer and distributor], 2021.*

## TYPE OF FILE

Microdata; unit of observation is individuals, families, and households.

## UNIVERSE DESCRIPTION

The universe is the civilian noninstitutional population of the United States living in housing units and members of the Armed Forces living off post or living with their families on post, as long as at least one civilian adult lives in the same household. A probability sample is used in selecting housing units.

## SUBJECT-MATTER DESCRIPTION

This Annual Social and Economic (ASEC) Supplement provides the usual monthly labor force data, but in addition, provides supplemental data on work experience, income, noncash benefits, and migration. Comprehensive work experience information is given on the employment status, occupation, and industry of persons 15 years old and over. Additional data for persons 15 years old and older are available concerning weeks worked and hours per week worked, reason not working full time, total income and income components. Data on employment and income refer to the preceding year, although demographic data refer to the time of the survey.

This file also contains data covering nine noncash income sources: food stamps, school lunch program, employer-provided group health insurance plan, employer-provided pension plan, personal health insurance, Medicaid, Medicare, or military health care, and energy assistance. Characteristics such as age, sex, race, household relationship, and Hispanic origin are shown for each person in the household enumerated.

## GEOGRAPHIC COVERAGE

States, regions and divisions are identified in their entirety. Within confidentiality restrictions; indicators are provided for 260 selected core-based statistical areas (CBSA), 44 selected combined

statistical areas (CSA), 280 counties, and 40 central cities in multi-central city core-based statistical areas or combined statistical areas. Also within confidentiality restrictions, indicators are provided for metropolitan/nonmetropolitan, central city/balance metropolitan, and CBSA size.

## TECHNICAL DESCRIPTION

File Structure: Hierarchical, Rectangular, Column-delimited

File Size:

Record Type	Record Number
Household (SAS/CSV)	90,759
Family (SAS/CSV)	73,151
Person (SAS/CSV)	163,543
ASCII (DAT)	327,453

## REFERENCE MATERIAL

*Current Population Survey, 2021 ASEC Technical Documentation.* The documentation includes this abstract, pertinent information about the file, a glossary, code lists, and a data dictionary.

For information about the Current Population Survey and other Census Bureau data products, be sure to visit our online Question & Answer Center on the Census Bureau's home page at <http://www.census.gov/> where you can search our knowledge base and submit questions.

## RELATED PRINTED REPORTS

Data from the ASEC Current Population Survey's file are published most frequently in the Current Population Reports P-20 and P-60 series. In addition, the following associated reports and tables have also been cleared for release: Income and Poverty, Health Insurance, Supplemental Poverty Measure, and Migration.

These reports can be accessed at <https://www.census.gov/library/publications.html>.

## FILE AVAILABILITY

The files are available on the internet via several ways. The files may be accessed by going to the Data section of the main CPS website, located here - <https://www.census.gov/programs-surveys/cps/data.html>. Additionally, for custom tabulations and extracts of CPS microdata, our Data Tools Site contains two platforms to assist you in this process. Visit the following hyperlink to access the Data Tools Site. <https://www.census.gov/programs-surveys/cps/data/data-tools.html>.

For more information contact [dsd.cps@census.gov](mailto:dsd.cps@census.gov).

## CONFIDENTIALITY

The microdata files were approved for release by the Census Bureau's Disclosure Review Board (DRB). CBDRB-FY21-280

The DRB supports the Data Stewardship Executive Policy Committee (DSEP) in its efforts to protect Title 13 respondent confidentiality by proposing protection policies and methodologies, and reviewing external products such as microdata and tabulation releases for potential disclosure. The DRB coordinates activities that inform decisions made to protect confidentiality through data collection, linking, and dissemination.

# OVERVIEW

## Current Population Survey

### Introduction

The Current Population Survey (CPS) is the source of the official Government statistics on employment and unemployment. The CPS has been conducted monthly for over 50 years. Currently, we interview about 54,000 households monthly, scientifically selected on the basis of area of residence to represent the nation as a whole, individual states, and other specified areas. Each household is interviewed once a month for four consecutive months one year, and again for the corresponding time period a year later. This technique enables us to obtain month-to-month and year-to-year comparisons at a reasonable cost while minimizing the inconvenience to any one household.

Although the main purpose of the survey is to collect information on the employment situation, a very important secondary purpose is to collect information on the demographic status of the population, information such as age, sex, race, marital status, educational attainment, and family structure. From time to time additional questions are included on such important subjects as health, education, income, and previous work experience. The statistics resulting from these questions serve to update similar information collected once every 10 years through the decennial census, and are used by government policymakers and legislators as important indicators of our nation's economic situation and for planning and evaluating many government programs.

The CPS provides current estimates of the economic status and activities of the population of the United States. Because it is not possible to develop one or two overall figures (such as the number of unemployed) that would adequately describe the labor market, the CPS is designed to provide a large amount of detailed and supplementary data. Such data are made available to meet a wide variety of needs on the part of users of labor market information.

Thus, the CPS is the only source of monthly estimates of total employment (both farm and nonfarm); nonfarm self-employed persons, domestics, and unpaid workers in nonfarm family enterprises; wage and salary employees; and, finally, estimates of total unemployment.

It provides the only available distribution of workers by the number of hours worked (as distinguished from aggregate or average hours for an industry), permitting separate analyses of part-time workers, workers on overtime, etc. The survey is also the only comprehensive current source of information on the occupation of workers and the industries in which they work. Information is available from the survey not only for persons currently in the labor force but also for those who are outside the labor force. The characteristics of such persons, whether married women with or without young children, disabled persons, students, older retired workers, etc., can be determined. Information on their current desire for work, their past work experience, and their intentions for job seeking are also available.

The Annual Social and Economic (ASEC) Supplement contains the basic monthly demographic and labor force data described above, plus additional data on work experience, income, noncash benefits, health insurance coverage, and migration.

### CPS Sample

The CPS sample is based on the civilian noninstitutional population of the United States. The sample is located in approximately 826 sample areas comprising 1,328 counties and independent cities with coverage in every State and in the District of Columbia.

In all, some 70,000 housing units or other living quarters are assigned for interview each month; about 50,000 of them containing approximately 100,000 persons 15 years old and over are interviewed. Also included are

demographic data for approximately 22,000 children 0-14 years old and 400 Armed Forces members living with civilians either on or off base within these households. The remainder of the assigned housing units are found to be vacant, converted to nonresidential use, contain persons with residence elsewhere, or are not interviewed because the residents are not found at home after repeated calls, are temporarily absent, or are unavailable for other reasons. Approximately 20,000 noninterview households are present each month. The resulting file size is approximately 142,000 records.

Whether living on or off post, male and female members of the armed forces are included in the ASEC as long as at least one civilian adult lives in the same household. The armed forces members, however, are not asked the monthly labor force questions. In addition, the ASEC is supplemented with a sample of Hispanic households identified the previous November. This results in the addition of about 6,000 households (4,500 interviewed). The inclusion of the additional sample of Hispanic households began in 1976.

In 2002, the ASEC incorporated a significant sample expansion. The sample was expanded primarily to improve state estimates of children's health insurance coverage. This sample expansion, known as the CHIP sample, has three components: 1) Asking the ASEC Supplement questions of one-quarter of the February and April CPS samples, that is, of the households not also included in the March sample; 2) Interviewing selected sample households from the preceding August through November CPS sample during the February-April period using the ASEC Supplement; and 3) Increasing the monthly CPS sample in states with high sampling errors for uninsured children. This sample increase results in the addition of about 19,000 households to the ASEC. Adding together the regular sample (70,000), plus the Hispanic sample (6,000), plus the CHIP sample (19,000), we arrive at the total sample size for the ASEC of about 95,000 households.

A more precise explanation regarding the CPS sample design is provided in Technical Paper 77, *The Current Population Survey: Design and Methodology*.

For a more detailed discussion about the basic labor force data gathered on a monthly basis in the CPS survey, see the Bureau of Labor Statistics Report No. 463 and the Current Population Report P-23, No. 62, issued jointly by the Bureau of Labor Statistics and the

Bureau of the Census in October, 1976, and entitled Concepts and Methods Used In Labor Statistics derived from the Current Population Survey.

## Questionnaire

Questionnaire facsimiles of the 2021 ASEC Supplement are shown in Appendix D in this documentation.

## Revisions to the ASEC Processing System

### Starting in 2019

- Demographic edit changes
- Redesigned questions for income and health insurance coverage

## File Structure

Historically, CPS ASEC data have always been provided only in a single ASCII file that included all three record types (household, family, and person). However, beginning in 2019, CSV and SAS files were also made available, with each being split into three separate files (one file for each of the three record types).

For the ASCII file, a description of the file structure follows below. It applies only to the ASCII file, not the CSV or SAS files.

There is a household record for each household or group quarters. The household record is followed by one of three possible structures:

- A. If the household contains related persons and is not a group quarters household:
  1. The family record appears next followed by person records for members of the family who are not also members of a related subfamily. The person records would be ordered: family householder, spouse of family householder, children in the family, and other relatives of the family householder.

2. The above records may be followed by one or more related subfamily records, each related subfamily record being followed immediately by person records for members of that related subfamily. The person records would be ordered: reference person of the related subfamily, spouse of subfamily reference person, and children of subfamily reference person.
3. The above records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by person records for members of that unrelated subfamily. The person records would be ordered: unrelated subfamily reference person, spouse of subfamily reference person, and children of subfamily reference person.
4. The above records may be followed by one or more persons living with nonrelatives family records, each to be followed by the person record for the unrelated individual it represents. (See Figure 1, page 2-5.)

**B. If the household contains a householder with no relatives and is not a group quarters household:**

1. The family record for the nonfamily householder is followed immediately by the person record for that nonfamily householder.
2. These records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by the person records for members of that unrelated subfamily.
3. These records may be followed by one or more family records for persons living with nonrelatives, each person living with nonrelatives family record being followed immediately by the person record for that person living with nonrelatives. (See Figure 2, page 2-6.)

**C. If the household is Group Quarters:**

1. The family record for persons living with nonrelatives is followed immediately by the person record for that person living with nonrelatives.
2. These records may be followed by one or more unrelated subfamily records, each unrelated subfamily record being followed immediately by the person records for members of that unrelated family.

## **Relationship of Current Population Survey Files to Publications**

Each month, a significant amount of information about the labor force is published by the Bureau of Labor Statistics in the Employment and Earnings and Monthly Labor Review Reports.

As mentioned previously, the CPS also serves as a vehicle for supplemental inquiries on subjects other than employment which are periodically added to the questionnaire. From the basic and supplemental data, the Census Bureau issues four series of publications under the general title Current Population Reports:

- P-20 Population Characteristics
- P-23 Special Studies
- P-60 Consumer Income

Of particular interest to users of the ASEC microdata file would be those reports based on information collected in the ASEC. These reports include the following titles:

- P-60 Income and Poverty in the United States: (Year)
- P-60 Health Insurance Coverage in the United States: (Year)
- P-60 Supplemental Poverty Measure: (Year)

All Current Population Reports are available online at <https://www.census.gov/library/publications.html>

## Geographic Limitations

One set of estimates that can be produced from CPS microdata files should be treated with caution. These are estimates for individual metropolitan areas. Although estimates for the larger areas such as New York, Los Angeles, and so forth, should be fairly accurate and valid for a multitude of uses, estimates for the smaller metropolitan areas (those with populations under 500,000) should be used with caution because of the relatively large sampling variability associated with these estimates. For these areas, estimates comparing percent distributions and ratios will provide data with less sampling variability than estimates of levels will.

It should be kept in mind that the sample design and methods of weighting CPS data are geared towards producing estimates for the entire nation. Consequently, data for states are not as reliable as national data, and the file will lose some of its utility in certain applications. For further discussion of such considerations, the user should consult *The Current Population Survey: Design and Methodology* (Technical Paper 77, U.S. Bureau of the Census).

The nature of the work done by each individual investigator using the microdata file will determine to what extent his/her requirements for precision will allow using some of the smaller geographic areas identified on the file.

## Weights

For all CPS data files a single weight is prepared and used to compute the monthly labor force status estimates. The difference in content of the CPS ASEC Supplement requires the presentation of additional weights: a supplement household weight, a supplement family weight, and a supplement person weight. In this section we briefly describe the construction and use of these weights. Chapter 2-3 of Technical paper 77, *The Current Population Survey: Design and Methodology* provides documentation of the weighting procedures for the CPS both with and without supplement questions.

The final weight, which is the product of several adjustments, is used to produce population estimates for the various items covered in the regular monthly CPS. This weight is constructed from the basic weight for each person, which represents the probability of selection for the survey. The basic weight is adjusted for special sampling situations and failure to obtain interviews from eligible households (noninterview adjustment). A two-stage ratio estimation procedure adjusts the sample population to the known distribution of the entire population. This two-stage ratio estimation process produces factors which are applied to the basic weight (after the special weighting and noninterview adjustments are made) and results in the final weight associated with each record. In summary, the final weight is the product of: (1) the basic weight, (2) adjustments for special weighting, (3) noninterview adjustment, (4) first stage ratio adjustment factor, and (5) second stage ratio adjustment factor. This final weight should be used when producing estimates from the basic CPS data.

Differences in the questionnaire, sample and data uses for the CPS ASEC Supplement result in the need for additional adjustment procedures to produce the ASEC Supplement weight. The sample for the CPS ASEC Supplement is expanded to include members of the Armed Forces who are living in civilian housing or with the family on a military base, as well as additional Hispanic households which are not included in the monthly labor force estimates, and children who live in low-income families and lack health insurance.

The expanded sample and the need to have married and cohabitating couples receive the same weight has resulted in a weighting system which produces the supplement weight. The supplement weight should be used for producing estimates from ASEC Supplement data.

Finally, household and family weights are the weights assigned from the householder or reference person after all adjustments have been made and should be used when tabulating estimates of families-households.

# MATCHING OF CPS ASEC FILES

## Matching ASEC Files Across Years

There are two basic limitations in linking the CPS ASEC files across years. First, only fifty percent of the sample is included in two consecutive years. Second, the residents within the eligible housing units may have changed or appeared as noninterview records in one or both years. The result is a matched sample of considerably less than the upper limit of fifty percent. The basic procedures and variables used to link two or more March CPS files are outlined below.

### Sample Selection

The first step in matching year  $t$  with year  $t+1$  is to select from year- $t$  those housing units with a "month in sample" value of 1 through 4, and from year  $t+1$  those units with a "month in sample" value of 5 through 8.

This will identify the sample subset eligible for matching. Within this subset, housing units in year  $t$ , month 1 will match only with units in year  $t+1$ , month 5, etc.

### Matching Housing Units

Using one or more variables, it is possible to uniquely identify each housing unit in each sample rotation. However, because of changes in CPS procedures, the available information for matching housing units is not always identical. Below are the variables available for matching March CPS files.

Year	Identifiers	
1986 – 1993	HHIDNUM	
1994 – 2001*	H-MIS	H-IDNUM
2002 – 2004	H-IDNUM	H-HHNUM
2005 – 2018	H-IDNUM1	H-IDNUM2
2019 – present	H_IDNUM	

\*Matching between 1995 and 1996 is not possible because the March 1996 file is based entirely on the 1990 Census design sample.

## Matching Person Records

If you wish to link not only the household information, but the person data as well, follow the procedure above, but add one or more variables to uniquely identify a person.

Year	Identifiers	
Before 1994	A_LINENO	Demographic Variables*
1994 – 2004	A_LINENO	

\*Prior to 1994, additional checks are needed to match person records across time. The specific variables used to match residents will vary according to the needs of the project, but it is more efficient to arrange the matching in a hierarchical sequence. For example, matching on sex, race and line number should precede matching on age or household relationship. The data user should carefully work through the possible changes in household structure that might result in an inappropriate rejection of a household.

For 2005 forward, one variable may be used by itself instead of adding it to the household identifiers. PERIDNUM is the only identifier needed for linking persons in files from 2005 onward.

## Matching ASEC Household, Family, and Person Files for a Single Year

### ID'ing Persons within a Household

To uniquely identify persons within a household, use PH\_SEQ and PPPOS on the person file. Match PH\_SEQ to H\_SEQ on the household file, to link the persons to the household. PPPOS is the person id within each household.

For example, match PH\_SEQ = 12345 to H\_SEQ = 12345, and then use PPPOS, which will have values of 01, 02, ...16, to identify each person.

### ID'ing Persons within a Family

To uniquely identify persons within a family, use PH\_SEQ and PF\_SEQ on the person file. Match PH\_SEQ to FH\_SEQ on the family file, to link the persons to the household. Then, match PF\_SEQ on the Person file to FFPOS on the family file. FFPOS is the unique family id within each household.

For example, match PH\_SEQ = 12345 to FH\_SEQ = 12345, and then use PF\_SEQ, which will have values of 01, 02, ...16. Each person with PF\_SEQ= 01 will be in a unique family, each person with PF\_SEQ= 02 will be in a unique family, and so on.

### ID'ing Families within a Household

To uniquely identify families within a household, use FH\_SEQ and FFPOS on the family file. Match FH\_SEQ to H\_SEQ on the household file, to link the families to the household. FFPOS is the unique family id within each household.

For example, match FH\_SEQ = 12345 to H\_SEQ = 12345, and then use FFPOS, which will have values of 01, 02, ...16, to uniquely identify the family.

## Matching ASEC Files to Non-ASEC Files

Sometimes, there's a need to link an ASEC (or "March supplement") file to a non-ASEC file. Follow the match-keys below to match households pertaining to the year the survey was conducted.

### Matching Housing Units

For the ASEC file:

Year	Identifiers	
1994 – 2004	H_IDNUM	H_HHNUM
2005 – 2018	H_IDNUM1	H_IDNUM2
2019 – present	H_IDNUM*	

\*Concatenate HRHHID and HRHHID2 on the non-ASEC file to match to H\_IDNUM on the ASEC file.

For the Non-ASEC File:

Month & Year		
Jan, 1994 – April 2004*	HRHHID	HUHHNUM
May 2004 – present	HRHHID	HRHHID2

\*For files ranging between April 1994 and June 1995, you must add the state code ('GESTCEN') to the list of identifiers to uniquely identify households. Due to the phase-in of the 1990 sample, a small number of households will share the same identifier unless adding this code.

### Matching Person Records

If you desire to link not only the household information, but the person data as well, follow the procedure above, but add one or more variables to uniquely identify a person.

For non-March files, add PULINENO.

For March/ASEC files between 1994 and 2004, add A\_LINENO. For 2005 forward, one variable may be used by itself instead of adding it to the household identifiers. PERIDNUM is the only identifier needed for linking persons in files from 2005 onward.

# DIFFERENCES

## Differences between the 2021 and 2020 ASEC Files

1. Every five years the CPS includes five-year migration questions along with the one-year migration questions. The 2020 ASEC person record contained the five-year items. These items were removed for 2021.
2. There are two additional variables containing information about the Economic Impact Payments sent out in 2020. See page 6C-31 of this document for information about EIP\_CRD. See page 6C-66 of this document for information about SPM\_EIP.
3. The top value for energy assistance amount (HENGVAL and SPM\_ENGVAL) has increased from 5,000 to 10,000. This also increases the length of the variable on the ASCII version of the file.
4. Both ED\_VAL and FEDTAX\_AC increased in length on the ASCII version of the file.
5. Values for variable PEINUSYR are updated every year to reflect the most recent year of the survey. In odd years (2015, 2017, 2019, etc.), only the largest value changes. In even years, the largest value also changes, but a new value is also appended. Please refer to the current year data dictionary for the latest values.

## Description of Method for Topcoding Income and Related Variables

The 2021 ASEC public use data file uses a method that swaps values between sample cases having incomes above a determined topcode value. This method of topcoding preserves the distribution of values above the topcode while maintaining adequate disclosure avoidance.

The technique used for swapping values is termed “rank proximity swapping”. Once the topcode has been established, some persons with value above the topcode cutoff are sorted by those values from lowest to highest (values equal to the specified topcode are included in the universe of those requiring topcoding). Next, the values above the topcode are systematically swapped between sample persons. The swapping occurs within a bounded interval. This bounded interval assures that the values swapped are in “proximity” to each other, yet providing a sufficiently large group of persons from which the swap partners are selected. The Rank Proximity Swapping tables below show the topcode cutoff amount for the various sources.

The use of swapping techniques is accompanied by the procedure to round the swapped amounts. All topcoded amounts included on the public use must be rounded to two significant digits (i.e. \$987,654=\$990,000; \$12,345=\$12,000; \$9,870=\$9,900; rounded values will never exceed the maximum value on the file, i.e. \$999,999=\$999,999).

**Rank Proximity Swapping**  
**Threshold Amounts for Earnings and Income Fields**

Income Source	Swap Threshold <sup>1</sup>
ANN_VAL	\$72,000
CAP_VAL	\$75,000
CHSP_VAL	\$30,000
CSP_VAL	\$20,400
DIS_VAL1	\$50,000
DIS_VAL2	\$50,000
DIV_VAL	\$39,000
DST_VAL1	\$90,000
DST_VAL2	\$90,000
DST_VAL1_YNG	\$100,000
DST_VAL2_YNG	\$100,000
ED_VAL	\$40,000
ERN_VAL	\$350,000
FIN_VAL	\$60,000
FRM_VAL	\$70,000
TRDINT_VAL	\$10,000
RINT_VAL1	\$41,000
RINT_VAL2	\$41,000
OI_VAL	\$58,000
RNT_VAL	\$80,000
SE_VAL	\$100,000
SUR_VAL1	\$100,000
SUR_VAL2	\$100,000
PEN_VAL1	\$84,000
PEN_VAL2	\$84,000
WS_VAL	\$65,000

**Threshold Amounts for SPM Fields**

Income Source	Swap Threshold <sup>1</sup>
PHIP_VAL	\$15,000
PEMCPREM	\$4,512
PHIP_VAL2	\$15,000
PMED_VAL	\$10,000
POTC_VAL	\$2,000

<sup>1</sup> Values swapped are equal to, and above, this value.

## Masking of Income Affects Recode Variables

All combined income recodes on the data file are created *after swapping* (or masking) is performed. This means, for example, that one's total income amount may include a masked amount among the income sources in the calculation. Therefore, the total income amount may seem high when analyzing family poverty ratios. Be careful when analyzing poverty data where masked income amounts appear.

# HOW TO USE THE DATA DICTIONARY

The data dictionary describes the contents and record layout of the public-use data file. It is split into three major sections, one for each record type (Household, Family, and Person). Within each section, variables are grouped by Topic and Subtopic.

Variables in the data dictionary are described by:

Descriptor	Description
<i>Variable</i>	Variable name. Variable names are unique throughout the entire data file.
<i>Length</i>	The length of a variable is given in number of characters.
<i>Position</i>	Starting position (location) of the variable on the ascii data file.
<i>Range</i>	Range of values the variable can hold.
<i>Description</i>	Brief description of the variable.
<i>Values</i>	Brief description of each value the variable can hold.
<i>Universe</i>	Description of the variable's universe.

For example, the variable HRECORD is the first variable found on the data dictionary, and appears like so:

*Record Type: Household*

<i>Variable</i>	<i>Length</i>	<i>Position</i>	<i>Range</i>
<i>Topic: Record Identifiers</i>			
<i>SubTopic: Record Type</i>			
HRECORD	1	1	(1:1)
Record Type. Used to identify records on ascii file.			
Values: 1 = HOUSEHOLD RECORD			
Universe: All Households			

Accordingly, HRECORD is described as follows:

Length=1 means that HRECORD takes up only one character on the data file.

Position=1 means that HRECORD can always be found in the first column of the data file for all household records.

Range=(1:1) means that the values for HRECORD can range from 1 to 1. In other words, HRECORD will always equal 1. This can also be verified by looking at the values description.

Values: 1=Household Record. HRECORD=1 identifies the current record as a household record. This is convenient when using the ASCII file since it contains all three record types (household, family, and person). SAS tables are already separated by record type, so HRECORD is not as critical to use in this case.

The universe for HRECORD is all households, which means every household will have HRECORD=1. This agrees with the fact that HRECORD=1 identifies a record as a housing record.

## How to Distinguish ASEC Supplement Variables from the Basic CPS Monthly Variables

With a few exceptions, Basic CPS monthly variables have a prefix and/or a suffix as follows:

Record Type	Prefix/Suffix
Household	H_ or H1
Family	Family records do not contain any Basic CPS monthly variables.
Person	A_, AX, PE, PR, or PX

Supplement variables are either all one string or have a suffix. For example, HFIN\_YN is a supplement variable on the household record.

Values: 0=none; dollar amount				Allocation flag for ANN_VAL			
Universe: A_AGE > 17 or HHDFMX = 1,2,46, or 47				Values: Levels 1-3 indicate imputations use of income range responses and 4-8 indicate imputations without range responses. Within each group, lower numbers indicate more match variables (and better matches). Non-respondents to value questions can provide values in one of five range bins. For example, non-respondents can provide earnings from the longest job in these categories: 1) < 15,000, 2) 15,000-30,000, 3) 30,001-44,499, 4) 45,000-60,000, and 5) > 60,000. The range bins differ by income type to better match the range of incomes in that income. In levels 1-3, non-respondents are matched to respondents with values in the range bin they indicated. Full record imputation indicates that an individual did not provide sufficient income information and all income reciprocity and value variables were imputed.

# Glossary

## Subject Concepts

### Age

Age classification is based on the age of the person at his/her last birthday. The adult universe (i.e., population of marriageable age) is comprised of persons 15 years old and over for the Annual Social and Economic (ASEC) Supplement data and for CPS labor force data.

### Annuities

(See Income.)

### Armed Forces

Armed Forces members enumerated in off-base housing or on base with their families are included on the CPS ASEC file, as long as at least one civilian adult lives in the same household. In addition to demographic and family data, supplemental data on income and work experience for Armed Forces members are included.

### Base Weight

The constant weight assigned to the sample (inverse of the sampling fraction) which is adjusted to produce the final weight.

### Civilian Labor Force

(See Labor Force.)

### Class of Worker

This refers to the broad classification of the person's employer. On the ASEC file, these broad classifications for current jobs are private, government, self-employed, without pay, and never worked. Private and government workers are considered "wage and salary workers;" this classification scheme includes self-employed, incorporated persons in with "private" workers. For the longest job held last year, this class of worker scheme includes private; government by level/Federal, State, and local; self-employed incorporated, self-employed unincorporated or farm; and without pay. The wage and salary category for longest job held includes private, government (all levels), and self-employed incorporated.

### Dividends

(See Income)

### Duration of Unemployment

Duration of unemployment represents the length of time (through the current survey week) during which persons

classified as unemployed are continuously looking for

work. For persons on layoff, duration of unemployment represents the number of full weeks since the termination of their most recent employment. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the present period of seeking work. Average duration is an arithmetic mean computed from a distribution by single weeks of unemployment.

### Earners, Number of

The file includes all persons 15 years old and over in the household with \$1 or more in wages and salaries, or \$1 or more of a loss in net income from farm or nonfarm self-employment during the preceding year.

### Earnings Weight

Each person record in month-in- sample 4 and 8 contains an earnings weight for current earnings.

### Education

(See Level of School Completed.)

### Employed

(See Labor Force.)

### Energy Assistance Program

The Low-Income Home Energy Assistance Program provides financial assistance to qualified households to help them pay heating costs. The program is funded by the Federal government and administered by the States under broad guidelines. In some States a household may automatically be eligible for this program if the household receives (1) Aid to Families with Dependent Children, (2) Food Stamps, (3) Supplemental Security Income (SSI), and (4) certain Veterans' benefits.

The energy assistance questions were asked for the first time in 1982. In 2011, the question was revised to include assistance for cooling as well as heating expenses, and the reference period was expanded from: (a) receipts since October 1 of the previous year; to (b) receipts for the entire previous calendar year.

### Family

A family is a group of two persons or more (one of whom is the householder) residing together and related

by birth, marriage, or adoption. All such persons (including related subfamily members) are considered as members of one family. Beginning with the 1980 CPS, unrelated subfamilies (referred to in the past as secondary families) are no longer included in the count of families, nor are the members of unrelated subfamilies included in the count of family members.

### **Family Household**

A family household is a household maintained by a family (as defined above), and may include among the household members any unrelated persons (unrelated subfamily members and/or unrelated individuals) who may be residing there. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives (See definition of Family).

### **Family Weight**

The weight on the family record is the March supplement weight of the householder or reference person. This weight on the primary family record should be used to tabulate the number of families.

### **Farm Self-Employment Net Income**

The term is defined as net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, as a renter, or as a sharecropper. Gross receipts include the value of all products sold, government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc.

Operation expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farm hands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for household living is not included as part of net income. Inventory changes are considered in determining net income only when they are accounted for in replies based on income tax returns or other official records which reflect inventory changes.

### **Final Weight**

Used in tabulating monthly labor force items. This weight should be used when producing estimates from the basic CPS data. It should not be used to tabulate ASEC supplement data.

### **Food Stamps**

The Food Stamp Act of 1977 was enacted for the purpose of increasing the food purchasing power of eligible households through the use of coupons to purchase food. The Food and Nutrition Service of the U.S. Department of Agriculture (USDA) administers the Food Stamp Program through State and local welfare offices. The Food Stamp Program is the major national income support program which provides benefits to all low-income and low-resource households regardless of household characteristics (e.g., sex, age, disability, etc.). The questions on participation in the Food Stamp Program in the ASEC supplement were designed to identify households in which one or more of the current members received food stamps during the previous calendar year. Once a food stamp household was identified, a question was asked to determine the number of current household members covered by food stamps during the previous calendar year. Questions were also asked about the number of months food stamps were received during the previous calendar year and the total face value of all food stamps received during that period.

### **Full-Time Worker**

Persons on full-time schedules include persons working 35 hours or more, persons who worked 1-34 hours for noneconomic reasons (e.g., illness) and usually work full-time, and persons "with a job but not at work" who usually work full-time.

### **Group Health Insurance Coverage**

Civilian persons 15 years old and over who worked in the previous calendar year and who participated in group health insurance plans provided by the employer or union were asked whether part or all of the health insurance premiums were paid for by the union or employer and the extent of persons covered.

Additional questions were asked to determine if sample persons were covered by any other type of health insurance plan. These items are intended to measure retirees covered by continuing employer provided coverage and persons who purchased coverage on their own.

### **Group Quarters**

Group quarters are noninstitutional living arrangements for groups not living in conventional housing units or groups living in housing units containing nine or more persons unrelated to the person in charge.

### **Head versus Householder**

Beginning with the March 1980 CPS, the Census Bureau discontinued the use of the terms "head of household" and "head of family." Instead, the terms "householder"

and "family householder" are used.

### **Highest Grade of School Attended**

(See Level of School Completed.)

### **Hispanic Origin**

Persons of Hispanic origin in this file are determined on the basis of a question asking if the person is Spanish, Hispanic, or Latino. If the response is "yes," a follow-up question determines a specific ethnic origin, asking to select their (the person's) origin from a "flash card" listing. The flash-card selections are Mexican, Mexican-American, Chicano, Puerto Rican, Cuban, Cuban American, or some other Spanish, Hispanic, or Latino group.

### **Hours of Work**

Hours of work statistics relate to the actual number of hours worked during the survey week. For example, a person who normally works 40 hours a week but who is off on the Veterans Day holiday is reported as working 32 hours even though he is paid for the holiday.

For persons working in more than one job, the figures relate to the number of hours worked in all jobs during the week. However, all the hours are credited to the major job.

### **Household**

A household consists of all the persons who occupy a house, an apartment, or other group of rooms, or a room, which constitutes a housing unit. A group of rooms or a single room is regarded as a housing unit when it is occupied as separate living quarters; that is, when the occupants do not live with any other person in the structure, and when there is direct access from the outside or through a common hall. The count of households excludes persons living in group quarters, such as military barracks and institutions. Inmates of institutions (mental hospitals, rest homes, correctional institutions, etc.) are not included in the survey.

### **Household Weight**

Household weight is the March Supplement weight of the householder. This weight should be used to tabulate estimates of households.

### **Householder**

The householder refers to the person (or one of the persons) in whose name the housing unit is owned or rented (maintained) or, if there is no such person, any adult member, excluding roomers, boarders, or paid

employees. If the house is owned or rented jointly by a married couple, the householder may be either the husband or the wife. The person designated as the householder on the file is the "reference person" on the CPS-260 control card to whom the relationship of all other household members, if any, is recorded.

### **Householder with No Other Relatives in Household**

A householder who has no relatives living in the household. This is the entry for a person living alone. Another example is the designated householder of an apartment shared by two or more unrelated individuals.

### **Householder with Other Relatives (Including Spouse) in Household**

The person designated as householder if he/she has one or more relatives (including spouse) living in the household.

### **Income**

For each person in the sample who is 15 years old and over, questions are asked on the amount of money income received in the preceding calendar year from each of the following sources: (1) money wages or salary; (2) net income from nonfarm self-employment; (3) net income from farm self-employment; (4) Social Security or railroad retirement; (5) Supplemental Security Income; (6) public assistance or welfare payments; (7) interest (on savings or bonds); (8) dividends, income from estates or trusts, or net rental income; (9) veterans' payment or unemployment and workmen's compensation; (10) private pensions or government employee pensions; (11) alimony or child support, regular contributions from persons not living in the household, and other periodic income.

Although income statistics refer to receipts during the preceding year, the characteristics of the person such as age, labor force status, etc., and the composition of households refer to the time of the survey. The income of the household does not include amounts received by persons who are members of the household during all or part of the income year if these persons no longer reside with the household at the time of enumeration. On the other hand, household income includes amounts reported by persons who did not reside with the household during the income year but who were members of the household at the time of enumeration.

Data on consumer income collected in the CPS by the Census Bureau cover money income received (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, Social Security,

union dues, Medicare deductions, etc. Also, money income does not reflect the fact that some households receive part of their income in the form of non-money transfers such as food stamps, health benefits, subsidized housing, and energy assistance; that many farm households receive non-money income in the form of rent free housing and goods produced and consumed on the farm; or that non-money income is received by some nonfarm residents that often takes the form of the use of business transportation and facilities, or full or partial contributions for retirement programs, medical and educational expenses, etc. These elements should be considered when comparing income levels. Moreover, readers should be aware that for many different reasons there is a tendency in household surveys for respondents to under report their income. From an analysis of independently derived income estimates, it has been determined that wages and salaries tend to be much better reported than such income types as public assistance, Social Security, and net income from interest, dividends, rents, etc.

#### **Income Sources - Wages and Salary**

Money wages or salary is defined as total money earnings received for work performed as an employee during the income year. It includes wages, salary, Armed Forces pay, commissions, tips, piece-rate payments, and cash bonuses earned, before deductions are made for taxes, bonds, pensions, union dues, etc. Earnings for self-employed incorporated businesses are considered wage and salary.

#### **Income Sources - Nonfarm Self-Employment**

Net income from nonfarm self-employment is net money income (gross receipts minus expenses) from one's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. In general, inventory changes are considered in determining net income since replies based on income tax returns or other official records do reflect inventory changes. However, when values of inventory changes are not reported, net income figures exclusive of inventory changes are accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

#### **Income Sources - Farm Self-Employment**

Net income from farm self-employment is net money income (gross receipts minus operating expenses) from the operation of a farm by a person on his own account, as an owner, as a renter, or as a sharecropper. Gross receipts include the value of all products sold,

government crop loans, money received from the rental of farm equipment to others, and incidental receipts from the sale of wood, sand, gravel, etc.

Operating expenses include cost of feed, fertilizer, seed, and other farming supplies, cash wages paid to farm hands, depreciation charges, cash rent, interest on farm mortgages, farm building repairs, farm taxes (not State and Federal income taxes), etc. The value of fuel, food, or other farm products used for family living is not included as part of net income. In general, inventory changes are considered in determining net income only when they are accounted for in replies based on income tax returns or other official records which reflect inventory changes; otherwise, inventory changes are not taken into account.

#### **Income Sources - Social Security**

Social Security includes Social Security pensions and survivors' benefits, and permanent disability insurance payments made by the Social Security Administration prior to deductions for medical insurance and railroad retirement insurance checks from the U.S. Government. "Medicare" reimbursements are not included.

#### **Income Sources - Supplemental Security Income**

Supplemental Security Income includes payments made by Federal, State, and local welfare agencies to low income persons who are (1) aged (65 years old and over), (2) blind, or (3) disabled.

#### **Income Sources - Public Assistance**

Public assistance or welfare payments include public assistance payments such as Aid to Families with Dependent Children and general assistance.

#### **Income Sources - Interest and Dividends**

Interest, dividends, income from estates or trusts, net rental income or royalties include dividends from stockholdings or membership in associations, interest on savings or bonds, periodic receipts from estates or trust funds, net income from rental of a house, store, or other property to others, receipts from boarders or lodgers, and net royalties.

#### **Income Sources - Unemployment Compensation**

Worker's Compensation, and Veterans' Payments. Unemployment compensation, veterans' payments, or worker's compensation includes: (1) unemployment compensation received from government unemployment insurance agencies or private companies during periods of unemployment and any strike benefits received from union funds; (2) money paid periodically by the Veterans Administration to disabled members of the

Armed Forces or to survivors of deceased veterans, subsistence allowances paid to veterans for education and on-the-job training, as well as so-called "refunds" paid to ex-servicemen as GI insurance premiums; and (3) worker's compensation received periodically from public or private insurance companies for injuries incurred at work. The cost of this insurance must have been paid by the employer and not by the person.

#### **Income Sources - Private and Government Pensions and Annuities**

Many employers and unions have established pension program their employees so that upon retirement the employee will receive regular income to replace his/her earnings. Many of these programs also provide income to the employees if he/she becomes severely disabled, or to his/her survivors if the employee dies. Other types of retirement income include annuities and paid up life insurance policies. Some people purchase annuities which yield a set amount over a certain number of years. Other people may convert their paid up life insurance policy into an annuity after they retire.

#### **Income Sources - Alimony and Child Support**

Alimony is money received periodically from a former spouse following a divorce or separation.

Child support is money received from a parent for the support of their children following a divorce or legal separation. Money received from relatives, other than the parent, or friends is not considered as child support.

#### **Receipts Not Counted As Income**

Receipts from the following sources are not included as income: (1) money received from the sale of property, such as stocks, bonds, a house, or a car (unless the person is engaged in the business of selling such property, in which case the net proceeds is counted as income from self-employment); (2) withdrawals of bank deposits; (3) money borrowed; (4) tax refunds; (5) gifts; and (6) lump-sum inheritances of insurance payments.

#### **Industry, Occupation, and Class of Worker (I&O) - Current Job (Basic CPS data)**

For the employed, current job is the job held in the reference week (the week before the survey). Persons with two or more jobs are classified in the job at which they worked the most hours during the reference week. The unemployed are classified according to their latest full-time job lasting two or more weeks or by the job (either full-time or part-time) from which they were on layoff. The I&O questions are also asked of persons not in the labor force who are in the fourth and eighth months in sample and who have worked in the last five years. The occupation/industry classification system for the 2000 Census was used to code CPS data beginning with the January 2003 file. See Table 1 below; the occupation classifications underwent revisions in 2011, to make them consistent with Census 2010.

#### **I&O - Longest Job (supplement data)**

Longest job applies to the job held longest during the preceding year for persons who worked that year, without regard to their current employment status.

**Table 1 – I&O Details for Current Job (Basic CPS) and Longest Job (ASEC Supplement)**

Subject		Current Job (Basic CPS data)	Longest Job Last Year (ASEC data)
		Variable Name	
Industry	4-digit code	PEIOIND	INDUSTRY
	2-digit recode (detailed groups)	A_DTIND	WEIND
	2-digit recode (major groups)	A_MJIND	WEMIND
Occupation	4-digit code	PEIOOCC	OCCUP
	2-digit recode (detailed groups)	A DTOCC	POCCU2
	2-digit recode (major groups)	A_MJOCC	WEMOCCG
Class of Worker	Class of Worker	A_CLSWKR	LJCW

### **Job Seekers**

All unemployed persons who made specific efforts to find a job sometime during the 4-week period preceding the survey week.

### **Keeping House**

Persons are classified as keeping house if they engage in own housework. This is one of the "not in labor force" classifications employment status recode (ESR) = 4.

### **LFSR (Labor Force Status Recode)**

This classification is available for each civilian 15 years old and over according to his/her responses to the monthly (basic) labor force items.

#### **Labor Force**

Persons are classified as in the labor force if they are employed, unemployed, or in the Armed Forces during the survey week. The "civilian labor force" includes all civilians classified as employed or unemployed. The file includes labor force data for civilians age 15 and over. However, the official definition of the civilian labor force is age 16 and over.

#### **1. Labor Force – Employed**

Employed persons comprise (1) all civilians who, during the survey week did any work at all as paid employees or in their own business or profession, or on their own farm, or who work 15 hours or more as unpaid workers on a farm or a business operated by a member of the family; and (2) all those who have jobs but who are not working because of illness, bad weather, vacation, or labor-management dispute, or because they are taking time off for personal reasons, whether or not they are seeking other jobs. These persons would have a Labor Force Status Recode (LFSR) of 1 or 2 respectively in character 145 of the person record which designates "at work" and "with a job, but not at work." Each employed person is counted only once. Those persons who held more than one job are counted in the job at which they worked the greatest number of hours during the survey week. If they worked an equal number of hours at more than one job, they are counted at the job they held the longest.

#### **2. Labor Force – Unemployed**

Unemployed persons are those civilians who, during the survey week, have no employment but are available for work, and (1) have engaged in any specific job seeking activity within the past 4 weeks such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (2) are waiting to be called back to a job from

which they had been laid off; or (3) are waiting to report to a new wage or salary job within 30 days. These persons would have an LFSR code of 3 or 4 in the person record. The unemployed includes job leavers, job losers, new job entrants, and job reentrants.

#### **2a. Unemployed - Job Leavers**

Persons who quit or otherwise terminate their employment voluntarily and immediately begin looking for work.

#### **2b. Unemployed - Job Losers**

Persons whose employment ends involuntarily, who immediately begin looking for work, and those persons who are already /on layoff.

#### **2c. Unemployed - New Job Entrants**

Persons who never worked at a full-time job lasting two weeks or longer.

#### **2d. Unemployed - Job Reentrants**

Persons who previously worked at a full-time job lasting two weeks or longer but are out of the labor force prior to beginning to look for work.

#### **3. Labor Force - Not in Labor Force**

Included in this group are all persons in the civilian noninstitutional population who are neither employed nor unemployed. Information is collected on their desire for and availability to take a job at the time of the CPS interview, job search activity in the prior year, and reason for not looking in the 4-week period prior to the survey week. This group includes discouraged workers, defined as persons not in the labor force who want and are available for a job and who have looked for work sometime in the past 12 months (or since the end of their last job if they held one within the past 12 months), but who are not currently looking because they believe there are no jobs available or there are none for which they would qualify. Such persons have an LFSR code of 7 in the person record.

Finally, it should be noted that the unemployment rate represents the number of persons unemployed as a percent of the civilian labor force 16 years old and over. This measure can also be computed for groups within the labor force classified by sex, age, marital status, race, etc. The job loser, job leaver, reentrant, and new entrant rates are each calculated as a percent of the civilian labor force 16 years old and over; the sum of the rates for the four groups thus equals the total unemployment rate.

**Layoff**

A person who is unemployed but expects to be called back to a specific job. If he/she expects to be called back within 30 days, it is considered a temporary layoff; otherwise, it is an indefinite layoff.

**Level of School Completed/Degree Received**

These data changed on the March 1992 file. A new question, "What is the highest level of school ... has completed or the highest degree ... has received? Replace the old "highest grade attended" and "year completed" questions. The new question provides more accurate data on the degree status of college students. Educational attainment applies only to progress in "regular" school. Such schools include graded public, private, and parochial elementary and high schools (both junior and senior high), colleges, universities, and professional schools, whether day schools or night schools. Thus, regular schooling is that which may advance a person toward an elementary school certificate or high school diploma, or a college, university, or professional school degree. Schooling in other than regular schools is counted only if the credits obtained are regarded as transferable to a school in the regular school system.

**Looking for Work**

A person who is trying to get work or trying to establish a business or profession.

**March Supplement Weight**

The March supplement weight is on all person records and is used to produce "supplement" estimates; that is, income, work experience, migration, and family characteristic estimates.

**Marital Status**

The marital status classification identifies four major categories: single (never married), married, widowed, and divorced. These terms refer to the marital status at the time of enumeration.

The category "married" is further divided into "married, civilian spouse present," "married, Armed Forces spouse present," "married, spouse absent," "married, Armed Forces spouse absent," and "separated." A person is classified as "married, spouse present" if the husband or wife is reported as a member of the household even though he or she may be temporarily absent on business or on vacation, visiting, in a hospital, etc., at the time of the enumeration. Persons reported as "separated" included those with legal separations, those living apart with intentions of obtaining a divorce, and other persons

permanently or temporarily estranged from their spouses because of marital discord.

For the purpose of this file, the group "other marital status" includes "widowed and divorced," "separated," and "other married, spouse absent."

**Medicare**

The Medicare Program is designed to provide medical care for the aged and disabled. The Basic Hospital Insurance Plan (Part A) is designed to provide basic protection against hospital costs and related post-hospital services. This plan also covers many persons under 65 years old who receive Social Security or railroad retirement benefits based on long-term disability. Part A is financed jointly by employers and employees through Social Security payroll deductions. Qualified persons 65 years old and over who are not otherwise eligible for Part A benefits may pay premiums directly to obtain this coverage. The Medical Insurance Plan (Part B) is a voluntary plan which builds upon the hospital insurance protection provided by the basic plan. It provides insurance protection covering physicians' and surgeons' services and a variety of medical and other health services received either in hospitals or on an ambulatory basis. It is financed through monthly premium payments by each enrollee, and subsidized by Federal general revenue funds.

The Medicare question on the ASEC supplement attempted to identify all persons 15 years old and over who were "covered" by Medicare at any time during the previous calendar year. The term "covered" means enrolled in the Medicare Program. In order to be counted, the person did not necessarily have to receive medical care paid for by Medicare.

**Medicaid**

The Medicaid Program is designed to provide medical assistance to needy families with dependent children, and to aged, blind, or permanently and totally disabled individuals whose incomes and resources are insufficient to meet the costs of necessary medical services. The program is administered by State agencies through grants from the Health Care Financing Administration of the Department of Health and Human Services. Funding for medical assistance payments consists of a combination of Federal, State, and in some cases, local funds.

Medicaid is a categorical program with complex eligibility rules which vary from State to State. There

are two basic groups of eligible individuals: the categorically eligible and the medically needy. The major categorically eligible groups are all Aid to Families with Dependent Children (AFDC) recipients and most Supplemental Security Income (SSI) recipients. Other categorically eligible groups are (1) those who meet basic State cash assistance eligibility rules/aged, blind, disabled, needy single parents with children, and, in some States, needy unemployed parents with children, but who are not currently receiving money payments; and (2) needy persons who meet categorical eligibility standards but are institutionalized for medical reasons (e.g., low-income elderly persons in nursing homes). However, such institutionalized persons are not included in the CPS universe and, therefore, are not reflected in these statistics.

In roughly one-half of the States, coverage is extended to the medically needy/persons meeting categorical age, sex, or disability criteria, whose money incomes and assets exceed eligibility levels for cash assistance but are not sufficient to meet the cost of medical care. In such States, qualifying income and asset levels are usually above those set for cash assistance. Families with large medical expenses relative to their incomes and assets may also meet medically needy eligibility standards in these States.

The Medicaid question on the ASEC supplement attempted to identify all persons who were "covered" by Medicaid at any time during the previous calendar year. The term "covered" means enrolled in the Medicaid program, i.e., had a Medicaid medical assistance card, or incurred medical bills which were paid for by Medicaid. In order to be counted, the person did not have to receive medical care paid for by Medicaid.

After data collection and creation of an initial microdata file, further refinements were made to assign Medicaid coverage to children. In this procedure all children under 21 years old in families were assumed to be covered by Medicaid if either the householder or spouse reported being covered by Medicaid (this procedure was required mainly because the Medicaid coverage question was asked only for persons 15 years old and over). All adult AFDC recipients and their children, and SSI recipients living in States which legally require Medicaid coverage of all SSI recipients, were also assigned coverage.

### **Mobility Status**

The population of the United States, 1 year old and over, is classified according to mobility status on the basis of a comparison between the place of residence of each individual at the time of the ASEC supplement and the place of residence in March of the previous year. For ASEC years ending in 0 and 5, this information is also collected for 5-year mobility for person 5 years old and over.

Migration status (one-year) is derived from answers to questions about residence one year before the survey date and the geographic location of the respondent's current residence. One-year migration data are collected annually. Similarly, five-year migration status is based on residence five years ago compared to current residence. The first of three inquiries is: "Were/Was \_\_\_ living in this house one year ago?" If the answer was "No," the enumerator asked, "Where did \_\_\_ live one year ago?" In classification, three main categories distinguish nonmovers, movers within the United States, and movers from abroad.

Nonmovers are all persons who are living in the same house at the end of the period as at the beginning of the period. Movers within the United States are all persons who are living in a different house in the United States at the end of the period than at the beginning of the period. Movers from abroad include all persons whose place of residence is outside the United States at the beginning of the period, that is, in an outlying area under the jurisdiction of the United States or in a foreign country.

### **Month-In-Sample**

The term is defined as the number of times a unit is interviewed. Each unit is interviewed eight times during the life of the sample.

### **Never Worked**

A person who has never held a full-time civilian job lasting two consecutive weeks or more.

### **Nonfamily Householder**

A nonfamily householder (formerly called a primary individual) is a person maintaining a household while living alone or with nonrelatives only.

### **Nonfarm Self-employment Net Income**

The term is defined as net money income (gross receipts minus expenses) from an individual's own business, professional enterprise, or partnership. Gross receipts include the value of all goods sold and services rendered. Expenses include costs of goods purchased, rent, heat, light, power, depreciation charges, wages and salaries paid, business taxes (not personal income taxes), etc. In

general, inventory changes are considered in determining net income; replies based on income tax returns or other official records do reflect inventory changes; however, when values of inventory changes are not reported, net income figures exclusive of inventory changes are accepted. The value of saleable merchandise consumed by the proprietors of retail stores is not included as part of net income.

**Nonworker**

A person who did not do any work in the calendar year preceding the survey.

**Nonrelative of Householder with No Own Relatives in Household**

A nonrelative of the householder who has no relative(s) of his own in the household. This category includes such nonrelatives as a ward, a lodger, a servant, or a hired hand, who has no relatives of his own living with him in the household.

**Nonrelative of Householder with Own Relatives (Including Spouse) in Household**

Any household member who is not related to the householder but has relatives of his own in the household; for example, a lodger, his spouse, and their son.

**Other Relative of Householder**

Any relative of the householder other than his spouse, child (including natural, adopted, or step child), sibling, or parent; for example, grandson, daughter-in-law, etc.

**Own Child**

A child related by birth, marriage, or adoption to the family householder.

**Part-Time, Economic Reasons**

The item includes slack work, material shortages, repairs to plant or equipment, start or termination of job during the week, and inability to find full-time work. (See also Full-Time Worker.)

**Part-Time Other Reasons**

The item includes labor dispute, bad weather, own illness, vacation, demands of home housework, school, no desire for full-time work, and full-time worker only during peak season.

**Part-Time Work**

Persons who work between 1 and 34 hours are designated as working "part-time" in the current job held

during the reference week. For the March supplement, a person is classified as having worked part-time during the preceding calendar year if he worked less than 35 hours per week in a majority of the weeks in which he worked during the year. Conversely, he is classified as having worked full-time if he worked 35 hours or more per week during a majority of the weeks in which he worked.

**Part-Year Work**

Part-year work is classified as less than 50 weeks' work.

**Pension Plan**

The pension plan question on the ASEC supplement attempted to identify if pension plan coverage was available through an employer or union and if the employee was included. This information was collected for civilian persons 15 years old and over who worked during the previous calendar year.

**Population Coverage**

Population coverage includes the civilian population of the United States plus approximately one million members of the Armed Forces in the United States living off post or with their families on post in households with least one civilian adult but excludes all other members of the Armed Forces. This file excludes inmates of institutions. The labor force and work experience data are not collected for Armed Forces members.

**Poverty**

In this file, families and unrelated individuals are classified as being above or below the poverty level using a poverty index adopted by a Federal Interagency Committee in 1969 and slightly modified in 1981.

The modified index provides a range of income cutoffs or "poverty thresholds" adjusted to take into account family size, number of children, and age of the family householder or unrelated individual; prior to 1981, adjustments were also made on the basis of farm-nonfarm residence and sex of the householder.

The impact of these revisions on the poverty estimates is minimal at the national level. The poverty cutoffs are updated every year to reflect changes in the Consumer Price Index. The average poverty threshold for a family of four was \$12,091 in 1985. For a detailed explanation of the poverty definition, see Current Population Reports, Series P-60, No. 238, Income, Poverty, and Health Insurance Coverage in the United States: 2009.

**Public Assistance**

(See Income.)

**Public or Other Subsidized Housing**

Participation in public housing is determined by two factors: program eligibility and the availability of housing. Income standards for initial and continuing occupancy vary by local housing authority, although the limits are constrained by Federal guidelines. Rental charges, which, in turn, define net benefits, are set by a Federal statute not to exceed 30 percent of net monthly money income. A recipient unit can either be a family of two or more related persons or an individual who is handicapped, elderly, or displaced by urban renewal or natural disaster.

There are some programs through which housing assistance is provided to low-income families and individuals living in public or privately owned dwellings. Two of the more common types of programs in which Federal, State, and local funds are used to subsidize private sector housing are rent supplement and interest reduction plans. Under a rent supplement plan the difference between the "fair market" rent and the rent charged to the tenant is paid to the owner by a government agency. Under an interest reduction program, the amount of interest paid on the mortgage by the owner is reduced so that subsequent savings can be passed along to low income tenants in the form of lower rent charges.

There were two questions dealing with public and low cost housing on the ASEC supplement questionnaire. The first question identifies residence in a housing unit owned by a public agency. The second question identifies beneficiaries who were not living in public housing projects, but who were paying lower rent due to a government subsidy. These questions differ from other questions covering noncash benefits in that they establish current reciprocity status in March of the current year rather than reciprocity status during the previous year.

**Race**

Beginning in January 2003, revisions to race categories took effect. Respondents were allowed to report more than one race, making selections from a "flash-card". The six race groups are: White, Black or African American, American Indian or Alaskan Native, Asian, Native Hawaiian or Other Pacific Islander, and Other race. The last category includes any other race except the five mentioned. Because of these changes, data on race are not directly comparable to previous files. Use caution when interpreting changes in the racial composition of the U.S. over time.

**Reentrants**

Persons who previously worked at a full-time job lasting two weeks or longer but who are out of the labor force prior to beginning to look for work.

**Related Children**

Related children in a family include own children and all other children in the household who are related to the householder by birth, marriage, or adoption. For each type of family unit identified in the CPS, the count of own children under 18 years old is limited to single (never married) children; however, "own children under 25" and "own children of any age," include all children regardless of marital status. The totals include never-married children living away from home in college dormitories.

**Related Subfamily**

A related subfamily is a married couple with or without children, or one parent with one or more own single (never married) children under 18 years old, living in a household and related to, but not including, the householder or spouse. The most common example of a related subfamily is a young married couple sharing the home of the husband's or wife's parents. The number of related subfamilies is not included in the number of families.

**School, Major Activity**

A person who spent most of his time during the survey week attending any kind of public or private school, including trade or vocational schools in which students receive no compensation in money or kind.

**School Lunches**

The National School Lunch Program is designed to assist States in providing a school lunch for all children at moderate cost. The National School Lunch Act of 1946 was further amended in 1970 to provide free and reduced-price school lunches for children of needy families. The program is administered by the Food and Nutrition Service of the U.S. Department of Agriculture (USDA) through State educational agencies or through regional USDA nutrition services for nonprofit private schools. The program is funded by a combination of Federal funds and matching State funds.

All students eating lunches prepared at participating schools pay less than the total cost of the lunches. Some students pay the "full established" price for lunch (which itself is subsidized) while others pay a "reduced" price for lunch, and still others receive a "free" lunch. Program regulations require students receiving free lunches to live in households with incomes below 125 percent of the

official poverty level. Those students receiving a reduced-price school lunch (10 to 20 cents per meal) live in households with incomes between 125 percent and 195 percent of the official poverty level. The data in this file, however, do not distinguish between reciprocity of free and reduced-price school lunches.

The questions on the ASEC supplement provide a very limited amount of data for the school lunch program. Questions concerning the school lunch program were designed to identify the number of members 5 to 18 years old in households who "usually" ate a hot lunch. This defined the universe of household members usually receiving this noncash benefit. This was followed by a question to identify the number of members receiving free or reduced price lunches.

### **Self-Employed**

Self-employed persons are those who work for profit or fees in their own business, profession or trade, or operate a farm.

### **Secondary Individuals**

A roomer, boarder, or resident employee with no relatives in the household, or a group quarters member who has no relatives living with him/her.

### **Stretches of Unemployment**

A continuous stretch is one that is not interrupted by the person getting a job or leaving the labor market to go to school, to keep house, etc. A period of two weeks or more during which a person is employed or ceased looking for work is considered to break the continuity of the period of seeking work.

### **Topcode**

For confidentiality purposes, usual hourly earnings from the current job and earnings from the longest job are topcoded (i.e., cut off at a particular amount).

Refer to Appendix F for an explanation and topcode values of hourly earnings from the current job. Earnings from the longest job are collected during enumeration up to any amount; however, the amount is topcoded on the public use file. (See page 5-1 for more information.) From the supplement, total person's income is the sum of the amounts from the individual income types; total family income is the sum of the total person's income for each family member; total household income is the sum of the total income for each person in the household.

### **Total Money Income**

The term is defined as the arithmetic sum of money wages and salaries, net income from self-employment, and income other than earnings. The total income of a household is the arithmetic sum of the amounts received by all income recipients in the household.

### **Unable to Work**

A person is classified as unable to work because of long-term physical or mental illness, lasting six months or longer.

### **Unemployed**

(See Labor Force.)

### **Unemployment Compensation**

(See Income.)

### **Unpaid Family Workers**

Unpaid family workers are persons working without pay for 15 hours a week or more on a farm or in a business operated by a member of the household to whom they are related by birth or marriage.

### **Unrelated Individuals**

Unrelated individuals are persons of any age (other than inmates of institutions) who are not living with any relatives. An unrelated individual may be (1) a nonfamily householder living alone or with nonrelatives only, (2) a roomer, boarder, or resident employee with no relatives in the household, or (3) a group quarters member who has no relatives living with him/her. Thus, a widow who occupies her house alone or with one or more other persons not related to her, a roomer not related to anyone else in the housing unit, a maid living as a member of her employer's household but with no relatives in the household, and a resident staff member in a hospital living apart from any relatives are all examples of unrelated individuals.

### **Unrelated Subfamily**

An unrelated subfamily is a family that does not include among its members the householder and relatives of the householder. Members of unrelated subfamilies may include persons such as guests, roomers, boarders, or resident employees and their relatives living in a household. The number of unrelated subfamily members is included in the number of household members but is not included in the count of family members.

Persons living with relatives in group quarters were formerly considered as members of families. However, the number of such unrelated subfamilies is so small that persons in these unrelated subfamilies are included in the count of secondary individuals.

### **Veteran Status**

If a person served at any time during the four most recent wartime periods, the codes for all periods of service are entered. A person can report up to 4 periods of service. The following codes are used:

- 0 Children under 15
- 1 September 2001 or later
- 2 August 1990 to August 2001
- 3 May 1975 to July 1990
- 4 Vietnam era (Aug 1964 to Apr 1975)
- 5 February 1955 to July 1964
- 6 Korean War (July 1950 to January 1955)
- 7 January 1947 to June 1950
- 8 World War II (Dec. 1941 to Dec. 1946)
- 9 November 1941 or earlier

### **Wage and Salary Workers**

Wage and salary workers receive wages, salary, commission, tips, or pay in kind from a private employer or from a governmental unit. Also included are persons who are self-employed in an incorporated business. (See income.)

### **Weeks Worked in the Previous Year**

Persons are classified according to the number of different weeks, during the preceding calendar year, in which they did any civilian work for pay or profit (including paid vacations and sick leave) or worked without pay on a family-operated farm or business.

### **Workers**

(See Labor Force--Employed.)

### **Work Experience**

Includes those persons who during the preceding calendar year did any work for pay or profit or worked without pay on a family-operated farm or business at any time during the year, on a part-time or full-time basis.

### **Year-Round Full-Time Worker**

A year-round full-time worker is one who usually worked 35 hours or more per week for 50 weeks or more during the preceding calendar year.

## Geographic Concepts

### Geographic Division

An area composed of contiguous States, with Alaska and Hawaii also included in one of the divisions. (A State is one of the 51 major political units in the United States.) The nine geographic divisions have been largely unchanged for the presentation of summary statistics since the 1910 census.

### Regions

There are four regions: Northeast, Midwest (formerly North Central)<sup>1</sup>, West, and South. States and divisions within regions are presented in the tables below.

NORTHEAST REGION	
<i>New England Division</i>	<i>Middle Atlantic Division</i>
Connecticut	New Jersey
Maine	New York
Massachusetts	Pennsylvania
New Hampshire	
Rhode Island	
Vermont	

MIDWEST REGION	
<i>East North Central Division</i>	<i>West North Central Division</i>
Illinois	Iowa
Indiana	Kansas
Michigan	Minnesota
Ohio	Missouri
Wisconsin	Nebraska
	North Dakota
	South Dakota

MIDWEST REGION	
<i>Mountain Division</i>	<i>Pacific Division</i>
Arizona	Alaska
Colorado	California
Idaho	Hawaii
Montana	Oregon
Nevada	Washington
Utah	
Wyoming	
New Mexico	

---

<sup>1</sup> The Midwest Region was designated as the North Central Region until June 1964

SOUTH REGION		
<i>East South Central Division</i>	<i>West South Central Division</i>	<i>South Atlantic Division</i>
Alabama	Arkansas	Delaware
Kentucky	Louisiana	District of Columbia
Mississippi	Oklahoma	Florida
Tennessee	Texas	Georgia
		Maryland
		North Carolina
		South Carolina
		Virginia
		West Virginia

## APPENDIX A

### INDUSTRY CLASSIFICATION

#### Industry Classification Codes for Detailed Industry (4 digit) (Starting January 2020)

These categories are aggregated into 52 detailed groups and 14 major groups (see pages 10-13 of this attachment).

These codes correspond to items PEIOIND and INDUSTRY. See Appendix F of this document for ascii file locations. The codes in the right hand column are the NAICS equivalent.

CENSUS CODE	DESCRIPTION	NAICS CODE
<b>Agriculture, Forestry, Fishing, and Hunting</b>		
0170	Crop production	111
0180	Animal production	112
0190	Forestry except logging	1131, 1132
0270	Logging	1133
0280	Fishing, hunting, and trapping	114
0290	Support activities for agriculture and forestry	115
<b>Mining</b>		
0370	Oil and gas extraction	211
0380	Coal mining	2121
0390	Metal ore mining	2122

INDUSTRY CLASSIFICATION

## APPENDIX B

### OCCUPATION CLASSIFICATION

(Beginning January 2020)

These categories are aggregated into 23 detailed groups and 11 major groups (see pages 14-18 of this appendix).

These codes correspond to items PEIOOCC and OCCUP. See Appendix F of this document for the ascii file locations. These codes are also applicable for any other CPS supplements that collect occupation data. The codes in the right hand column are the 2018 SOC equivalent.

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
------------------------	-------------	---------------------

#### Management, Business, Science, and Arts Occupations

##### Management Occupations

0010	Chief executives	11-1011
0020	General and operations managers	11-1021
0040	Advertising and promotions managers	11-2011
0051	Marketing Managers	11-2021
0052	Sales managers	11-2022
0060	Public relations and fundraising managers	11-2030

6200	First-line supervisors/managers of construction trades and extraction workers	47-1011
6210	Boilermakers	47-2011
6220	Brickmasons, blockmasons, and stonemasons	47-2020
6230	Carpenters	47-2031
6240	Carpet, floor, and tile installers and finishers	47-2040
6250	Cement masons, concrete finishers, and terrazzo workers	47-2050
6260	Construction laborers	47-2061
6305	Construction equipment operators	47-2070
6330	Drywall installers, ceiling tile installers, and tapers	47-2080
6355	Electricians	47-2111
6360	Glaziers	47-2121
6400	Insulation workers	47-2130
6410	Painters and paperhangers	47-2140
6441	Pipelayers	47-2151
6442	Plumbers, pipefitters, and steamfitters	47-2152
6460	Plasterers and stucco masons	47-2161
6500	Reinforcing iron and rebar workers	47-2171
6515	Roofers	47-2181
6520	Sheet metal workers	47-2211
6530	Structural iron and steel workers	47-2221
6600	Helpers, construction trades	47-3010
6660	Construction and building inspectors	47-4011
6700	Elevator installers and repairers	47-4021
6710	Fence erectors	47-4031
6720	Hazardous materials removal workers	47-4041
6730	Highway maintenance workers	47-4051
6740	Rail-track laying and maintenance equipment operators	47-4061
6765	Miscellaneous construction and related workers, including photovoltaic installers	47-4090
6800	Derrick, rotary drill, and service unit operators, oil and gas	47-5010
6825	Earth drillers, except oil and gas	47-5023
6835	Explosives workers, ordnance handling experts, and blasters	47-5032
6850	Underground mining machine operators	47-5040
6950	Other extraction workers	47-50XX

2018 CENSUS CODE	DESCRIPTION	2018 SOC CODE
<b>Installation, Maintenance, and Repair Workers</b>		
7000	First-line supervisors of mechanics, installers, and repairers	49-1011
7010	Computer, automated teller, and office machine repairers	49-2011
7020	Radio and telecommunications equipment installers and repairers	49-2020
7030	Avionics technicians	49-2091
7040	Electric motor, power tool, and related repairers	49-2092
7100	Electrical and electronics repairers, industrial and utility	49-209X
7120	Electronic home entertainment equipment installers and repairers	49-2097
7130	Security and fire alarm systems installers	49-2098
7140	Aircraft mechanics and service technicians	49-3011
7150	Automotive body and related repairers	49-3021
7160	Automotive glass installers and repairers	49-3022
7200	Automotive service technicians and mechanics	49-3023
7210	Bus and truck mechanics and diesel engine specialists	49-3031
7220	Heavy vehicle and mobile equipment service technicians and mechanics	49-3040
7240	Small engine mechanics	49-3050
7260	Miscellaneous vehicle and mobile equipment mechanics, installers, and repairers	49-3090
7300	Control and valve installers and repairers	49-9010
7315	Heating, air conditioning, and refrigeration mechanics and installers	49-9021
7320	Home appliance repairers	49-9031
7330	Industrial and refractory machinery mechanics	49-904X
7340	Maintenance and repair workers, general	49-9071
7350	Maintenance workers, machinery	49-9043
7360	Millwrights	49-9044
7410	Electrical power-line installers and repairers	49-9051
7420	Telecommunications line installers and repairers	49-9052
7430	Precision instrument and equipment repairers	49-9060
7510	Coin, vending, and amusement machine servicers and repairers	49-9091
7540	Locksmiths and safe repairers	49-9094
7560	Riggers	49-9096
7610	Helpers--installation, maintenance, and repair workers	49-9098
7640	Other installation, maintenance, and repair workers	49-909X

## **Production, Transportation, and Material Moving Occupations**

### **Production Occupations**

7700	First-line supervisors of production and operating workers	51-1011
7720	Electrical, electronics, and electromechanical assemblers	51-2020
7730	Engine and other machine assemblers	51-2031
7740	Structural metal fabricators and fitters	51-2041
7750	Other assemblers and fabricators	51-20XX
7800	Bakers	51-3011
7810	Butchers and other meat, poultry, and fish processing workers	51-3020
7830	Food and tobacco roasting, baking, and drying machine operators and tenders	51-3091
7840	Food batchmakers	51-3092
7850	Food cooking machine operators and tenders	51-3093
7855	Food processing workers, all other	51-3099

<b>2018 CENSUS CODE</b>	<b>DESCRIPTION</b>	<b>2018 SOC CODE</b>
7905	Forming machine setters, operators, and tenders, metal and plastic	51-4020
7925	Computer numerically controlled tool programmers and operators	51-9160
7950	Cutting, punching, and press machine setters, operators, and tenders, metal and plastic	51-4031
8000	Machinists	51-4041
8025	Grinding, lapping, polishing, and buffing machine tool setters, operators, and tenders, metal and plastic	51-4033
8030	Other machine tool setters, operators, and tenders, metal and plastic	51-403X
8040	Metal furnace and kiln operators and tenders	51-4050
8060	Molders and molding machine setters, operators, and tenders, metal and plastic	51-4070
8100	Model makers and patternmakers, metal and plastic	51-4060
8130	Tool and die makers	51-4111
8140	Welding, soldering, and brazing workers	51-4120
8225	Other metal workers and plastic workers	51-4XXX
8250	Prepress technicians and workers	51-5111
8255	Printing press operators	51-5112
8256	Print binding and finishing workers	51-5113
8300	Laundry and dry-cleaning workers	51-6011
8310	Shoe and leather workers	51-6040
8320	Pressers, textile, garment, and related materials	51-6021
8335	Sewing machine operators	51-6031
8350	Tailors, dressmakers, and sewers	51-6050
8365	Textile machine setters, operators, and tenders	51-6060
8450	Upholsterers	51-6093
8465	Other textile, apparel, and furnishings workers	51-609X
8500	Cabinetmakers and bench carpenters	51-7011
8510	Furniture finishers	51-7021
8530	Sawing machine setters, operators, and tenders, wood	51-7041
8540	Woodworking machine setters, operators, and tenders, except sawing	51-7042
8555	Water and liquid waste treatment plant and system operators	51-8031
8600	Other woodworkers	51-70XX
8610	Power plant operators, distributors, and dispatchers	51-8010
8620	Stationary engineers and boiler operators	51-8021
8630	Miscellaneous plant and system operators	51-8090
8640	Chemical processing machine setters, operators, and tenders	51-9010
8650	Crushing, grinding, polishing, mixing, and blending workers	51-9020
8710	Cutting workers	51-9030
8720	Extruding, forming, pressing, and compacting machine setters, operators, and tenders	51-9041
8730	Furnace, kiln, oven, drier, and kettle operators and tenders	51-9051
8740	Inspectors, testers, sorters, samplers, and weighers	51-9061
8750	Jewelers and precious stone and metal workers	51-9071
8760	Dental and ophthalmic laboratory technicians and medical appliance technicians	51-9080
8800	Packaging and filling machine operators and tenders	51-9111
8810	Painting workers	51-9120
8830	Photographic process workers and processing machine operators	51-9130
8850	Adhesive bonding machine operators and tenders	51-9191
8865	Other production equipment operators and tenders	51-919X
8910	Etchers and engravers	51-9194
8920	Molders, shapers, and casters, except metal and plastic	51-9195
8930	Paper goods machine setters, operators, and tenders	51-9196
8940	Tire builders	51-9197

## **Transportation and Material Moving Occupations**

### **Transportation Occupations**

9005	Supervisors of transportation and material moving workers	53-1000
9030	Aircraft pilots and flight engineers	53-2010
9040	Air traffic controllers and airfield operations specialists	53-2020
9110	Ambulance drivers and attendants, except emergency medical technicians	53-3011
9121	Bus drivers, school	53-3051
9122	Bus drivers, transit and intercity	53-3052
9130	Driver/sales workers and truck drivers	53-3030
9141	Shuttle drivers and chauffeurs	53-3053
9142	Taxi drivers	53-3054
9150	Motor vehicle operators, all other	53-3099
9210	Locomotive engineers and operators	53-4010
9240	Railroad conductors and yardmasters	53-4031
9265	Other rail transportation workers	53-30XX
9300	Sailors and marine oilers	53-5011
9310	Ship and boat captains and operators	53-5020
9350	Parking attendants	53-6021
9365	Transportation service attendants	53-6030
9410	Transportation inspectors	53-6051
9415	Passenger attendants	53-6061
9430	Other transportation workers	53-60XX

### **Material Moving Occupations**

9510	Crane and tower operators	53-7021
9570	Conveyor, dredge, and hoist and winch operators	53-70XX
9600	Industrial truck and tractor operators	53-7051
9610	Cleaners of vehicles and equipment	53-7061
9620	Laborers and freight, stock, and material movers, hand	53-7062
9630	Machine feeders and offbearers	53-7063
9640	Packers and packagers, hand	53-7064
9645	Stockers and order fillers	53-7065
9650	Pumping station operators	53-7070
9720	Refuse and recyclable material collectors	53-7081
9760	Other material moving workers	53-71XX

### **Military Specific Occupations**

9840	Military Occupations	55-0000
------	----------------------	---------

## Detailed Occupation Recodes (01-53)

These codes correspond to item POCCU2. See Appendix F of this document for the ascii file location.

<b>CODE</b>	<b>DESCRIPTION</b>	<b>OCCUPATION CODE</b>
1	Chief executives, general operations/advertising/promotions/ marketing/ sales/ public relations/ administrative/ computer/ information systems/ and financial managers	0010-0120
2	Compensation and benefits/human resources/ industrial production/ purchasing/ transportation/ storage/ distribution/ farm/ ranch/ other agricultural managers, farmers & ranchers, and construction managers	0135-0220
3	Education administrators, engineering/ food service/ gaming/ lodging/ medical/ health/ natural sciences/ property/ real estate/ community association/ social/ community service managers, funeral directors, postmasters & mail superintendents, and all other managers	0230-0440
4	Agents & business managers of artists, performers, and athletes	500
5	Business operations specialists	0510-0750
6	Accountants and auditors	800
7	Financial specialists	0810-0960
8	Computer scientist, system analysts, information security analysts, computer programmers, computer software engineers, support specialist, database/ network/ computer systems administrators, network systems, data communication analysts, & network architects	1005-1108
9	Actuaries, mathematicians, operations research analysts, statisticians, misc. mathematical science occupations	1200-1240
10	Architects, except naval	1305,1306
11	Surveyors, cartographer, & photogrammetrists	1310
12	Aerospace/ agricultural/ biomedical/ chemical/ civil/ computer hardware/ electrical/ electronic/ environmental/ industrial/ marine/ material/ mechanical/ mining/ geological/ nuclear/ petroleum/ and all other engineers, naval architects, drafters, engineering/ surveying/ mapping technicians	1320-1560
13	Agricultural/ food/ biological/ conservation/ medical/ atmospheric/ space/ materials/ environmental/ physical/ all other scientists, astronomers, physicists, chemists, and geoscientists	1600-1760
14	Economists, market and survey researchers	1800-1815
15	Psychologists, sociologists, urban and regional planners misc. social scientists & related workers	1820-1860
16	Agricultural/ food science/ biological/ chemical/ geological/ petroleum/ nuclear/ other life/ physical/ social science technicians	1900-1980
17	Community and social services occupation	2000-2060
18	Lawyers, judges, magistrates, and other judicial workers	2100-2110
19	Paralegals & legal assistants, miscellaneous legal support workers	2145-2180
20	Postsecondary teachers	2205

<b>CODE</b>	<b>DESCRIPTION</b>	<b>OCCUPATION CODE</b>
21	Preschool & kindergarten/ elementary & middle school/ secondary school/ special education teachers and other teachers & instructors	2300-2360
22	Archivists, curators, museum technicians, librarians, library technicians, teacher assistants, and other education, training, & library workers	2400-2555
23	Arts, design, entertainment, sports, and media occupations	2600-2970
24	Chiropractors, dentists, dietitians, nutritionist, optometrists, pharmacists, physicians, surgeons, physician assistants, and podiatrists	3000-3120
25	Registered nurses/anesthetists/midwives/practitioners, audiologists, occupational/ physical/ radiation/ recreational/ respiratory/ all other therapists, speech-language pathologists	3140-3245, 3255-3258
26	Veterinarians	3250
27	Health diagnosing/ treating/ all other practitioners, clinical lab./ diagnostic related/ misc. health technologists & technicians, dental hygienists, emergency/ medical records/ health info. technicians, paramedics, licensed practical & vocational nurses, opticians, and other healthcare practitioners	3260-3550
28	Nursing, psychiatric, & home health aides, occupational therapist assistants & aides, physical therapists, dental/ medical assistants, and other healthcare support occupations	3600-3655
29	First-line supervisors/ managers of correctional officers/ of police & detectives/ of fire fighting & prevention workers, supervisors, protective service workers, and all other	3700-3735
30	Fire fighters & inspectors, bailiffs, correctional officers, detectives & criminal investigators, fish & game wardens, parking enforcement workers, police & sheriff's patrol officers, and transit & railroad police	3740-3870
31	Animal control workers, private detectives and investigators, security guards & gaming surveillance officers, crossing guards, lifeguards, and other protective service	3900-3960
32	Chefs and head cooks, first line supervisors/ managers of food preparation and serving workers, cooks	4000-4020
33	Food preparation/ server workers, bartenders, counter attendants, waiters/ waitresses, food servers, dishwashers, hosts & hostesses	4030-4160
34	First-line supervisors/ managers of housekeeping and janitors workers/ of landscaping, lawn service, & grounds keeping workers	4200-4210
35	Janitors/ building/ maid/ housekeeping cleaners, pest control and grounds maintenance workers	4220-4255
36	First-line supervisors/ managers of gaming workers and of personal service workers	4300-4330
37	Animal trainers, nonfarm animal caretakers, gaming & funeral services/ child care/ recreation/ fitness/ personal care workers, motion picture projectionists, ushers, lobby attendants, ticket takers, barbers, hairdressers, hairstylists, cosmetologists, baggage porters, bellhops, concierges, personal & home care aides, residential advisors,... and other personal care/ service	4340-4655
38	First-line supervisors/ managers of retail/ non-retail sales workers	4700-4710

<b>CODE</b>	<b>DESCRIPTION</b>	<b>OCCUPATION CODE</b>
39	Cashiers, counter and rental clerks, parts & retail salespersons, advertising/ insurance/ financial services sales agents, sales representatives, travel agents, models, demonstrators, & product promoters, real estate brokers & sales agent, sales engineers, telemarketers, and all other sales & related workers	4720-4965
40	Office & admin. support occupations	5000-5940
41	Farming, fishing, & forestry occupations	6005-6130
42	First-line supervisors/ managers of construction trades & extraction workers, boilermakers, brick masons, block masons, and stonemasons	6200-6220
43	Carpenters	6230
44	Carpet, floor, & tile installers and finishers, cement masons, concrete finishers, & terrazzo workers, paving, surfacing, & tamping equipment operators, construction laborers, drywall installers, ceiling tile installers, and tapers	6240-6330
45	Electricians	6355
46	Glaziers, insulation workers, painter, construction & maintenance, paperhangers, painters, roofers, plumbers, sheet metal/ structural iron/ steel workers, elevator installer & repairers, fence erector, hazardous materials removal workers, highway maintenance/ misc. construction and related workers	6360-6765
47	Extraction workers	6800-6950
48	Installation, maintenance, & repair workers	7000-7640
49	Production occupations	7700-8990
50	Supervisors, transportation & material moving workers, aircraft pilots & flight engineers, air traffic controllers, airfield operations specialists & flight attendants	9000-9050
51	Ambulance drivers & attendants, bus/ taxi drivers, motor vehicle/ railroad operators, sailors, ship & boat captains, ship engineers, transportation inspectors, crane & tower operators, tank car/ truck/ ship loaders, and all other transportation & material moving occupations	9110-9760
52	Armed forces & military specific occupations	9800-9840
53	Never Worked	

## Detailed Occupation Recodes (01-24)

These codes correspond to item A\_DTOCC and WEMOCC. See Appendix F of this document for the ascii file location.

# 1 BASIC CPS ITEMS

## 1.1 MOVER ITEMS

### HH32b

**Did (you/name of reference person) live at this address during the week of November 19, 2020?**

- 1 Yes
- 2 No

### HH32d

**Did any of the following household members live here during the week of November 19, 2020?**

- 1 Yes
- 2 No

## 1.2 FAMILY INCOME

### S FAMINC

**Which category represents the total combined income of all members of this FAMILY during the past 12 months?**

**This includes money from jobs, net income from business, farm or rent, pensions, dividends, interest, social security payments and any other money income received by members of this family who are 15 years of age or older?**

- |   |                   |    |                    |
|---|-------------------|----|--------------------|
| 1 | Less than \$5,000 | 9  | 30,000 to 34,999   |
| 2 | 5,000 to 7,499    | 10 | 35,000 to 39,999   |
| 3 | 7,500 to 9,999    | 11 | 40,000 to 49,999   |
| 4 | 10,000 to 12,499  | 12 | 50,000 to 59,999   |
| 5 | 12,500 to 14,999  | 13 | 60,000 to 74,999   |
| 6 | 15,000 to 19,999  | 14 | 75,000 to 99,999   |
| 7 | 20,000 to 24,999  | 15 | 100,000 to 149,000 |
| 8 | 25,000 to 29,999  | 16 | 150,000 to more    |

## 1.3 INCDKR

**Is the combined income of all members of this FAMILY during the past 12 months above or below \$75,000?**

- 1 Above
- 2 Below

## 2 INTRODUCTION and WORK EXPERIENCE

### Pr incom

?[F1] Importance of responding

\* Wording of introduction is optional.

The questions you just answered were about your job and economic status last week.  
The next set of questions ask about your job and economic status last year.

1 Enter 1 to Continue

### Q29a

**Did (name/you) work at a job or business at any time during 2020?**

- 1 Yes
- 2 No

### Q29b

**Did (you/he/she) do any temporary, part-time, or seasonal work even for a few days during 2020?**

\* Include any Military Reserves or National Guard work.

- 1 Yes
- 2 No

### Q30

**Even though (name/you) did not work in 2020, did (you/he/she) spend any time trying to find a job or on layoff?**

- 1 Yes
- 2 No

### Q31

**How many different weeks (was/were) (name/you) looking for work or on layoff from a job?**

\* (01-52) Number of weeks

---

### **Q32**

**What was the main reason (you/he/she) did not work in 2020?**

\* Read categories if necessary

- 1 Ill, or disabled and unable to work
- 2 Retired
- 3 Taking care of home or family
- 4 Going to school
- 5 Could not find work
- 6 Doing something else

### **Q33**

**During 2020 in how many weeks did (name/you) work even for a few hours?  
Include paid vacation and sick leave as work.**

- \* (01-52) Number of weeks
- \* Enter 97 if respondent can only answer in months

---

### **Q33mon**

- \* Enter number of months worked  
(1-12)

---

### **Q33ver**

**Then (name/you) worked about (number) weeks. Is that correct?**

- 1 Yes
- 2 No – back to Q33 and obtain estimate

### **Q35**

**Did (name/you) lose any full weeks of work in 2020 because (you/he/she)  
(were/was) on layoff from a job or lost a job?**

- \* Number of weeks worked in 2020: (number)

- 1 Yes
- 2 No
- 7 Mistake made in number of weeks worked last year - Specify in Q35SP

### **Q35SP**

\* Specify mistake made in number of weeks worked last year

---

**Q36**

**You said (name/you) worked about (number) (week/weeks).  
How many OF THE REMAINING (number) WEEKS (was/were)  
(you/he/she) looking for work or on layoff from a job?**

\* Enter 0 for none

---

**Q37**

**Were the (number) weeks (name/you) (was/were) looking for work or on layoff all in one stretch?**

- 1 Yes – one stretch
- 2 No – two stretches
- 3 No – 3 or more stretches

**Q38**

**What was the main reason (name/you) (was/were) not working or looking for work in the remaining weeks of 2020?**

\* Read list only if respondent is having difficulty answering the question

- |   |                                     |   |                         |
|---|-------------------------------------|---|-------------------------|
| 1 | Ill, or disabled and unable to work | 4 | Retired                 |
| 2 | Taking care of home or family       | 5 | No work available       |
| 3 | Going to school                     | 6 | Other (Specify - Q38sp) |

**Q38sp**

\* Enter verbatim response

---

**Q39**

**For how many employers did (name/you) work in 2020?  
If more than one at the same time, only count it as one employer.**

- 1 One
- 2 Two
- 3 Three or more

**Q41**

**In the (one week/weeks) that (name/you) worked, how many hours did (you/he/she) (work that week?/usually work per week?)**

\* Enter number of hours

---

**Q43**

**During 2020, were there one or more weeks in which (name/you) worked less than 35 hours?**

**Exclude time off with pay because of holidays, vacation, days off, or sickness.**

- 1      Yes
- 2      No

**Q44**

**In the weeks that (name/you) worked, how many weeks did (name/you) work less than 35 hours in 2020?**

\* Number of weeks worked in 2020: (number)  
(Number of weeks was reported in item Q33)

(1-52)

---

**Q45**

**What was the main reason (name/you) worked less than 35 hours per week?**

\* Read list only if respondent is having difficulty answering the question

- 1      Could not find a full time job
- 2      Wanted to work part time or only able to work part time
- 3      Slack work or material shortage
- 4      Other reason

**Q46**

**What was (name's/your) longest job during 2020?**

**Was it:**

(IO1NAM:) (name of employer)  
(IO1IND:) (kind of business or industry)  
(IO1OCC:) (occupation)  
(IO1DT:) (duties)

\* CLASS OF WORKER: (PRIVATE/ FEDERAL GOVERNMENT/ STATE GOVERNMENT/ LOCAL GOVERNMENT/WORKING WITHOUT PAY IN FAMILY BUS./ SELF EMPLOYED--INCORPORATED/ SELF EMPLOYED--UNINCORPORATED)

- 1 Same as listed
- 2 Different job

**Q47a**

**For whom did (name/you) work (?/at) (blank/(your/his/her) (blank/longest job during 2020?))**

\* Name of Company, business, organization or other employer

(blank/\*IO1NAM:) (entry)

The current employer is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/\* If longest job last year is military job, enter Armed Forces)

(blank/\* Enter N for no work done at all during 2020)

---

**Q47b**

**What kind of business or industry is this?**

For example: TV and radio manufacturing, retail shoe store, farm

(blank/\*IO1IND:) (entry)

The current business or industry type is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/\* If longest job last year is military job, enter NA)

---

**Q47b1**

**Is this business or organization mainly manufacturing, retail trade, wholesale trade, or something else?**

(blank/\*IO1MFG:) (entry)

The current business or organization type is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/\* If longest job last year is military job, enter 4)

- 1 Manufacturing
- 2 Retail trade
- 3 Wholesale trade

4      Something else

**Q47c**

**What kind of work (was/were) (you/he/she) doing?**

For example: Electrical Engineer, Stock Clerk, Typist

(blank/ \* IO1OCC:) (entry)

The current occupation is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ \* If longest job last year is military job, enter Armed Forces)

---

**Q47d1**

**What were (your/his/her) most important activities or duties?**

For example: Types, keeps account books, files, sells cars, operates printing press, finishes concrete.

(blank/ \* IO1DT:) (entry)

The current job description is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ \* If longest job last year is military job, enter NA)

---

**Q47d2**

**What were (your/his/her) most important activities or duties?**

For example: Types, keeps account books, files, sells cars, operates printing press, finishes concrete.

(blank/ \* IO1DT:) (entry)

The current job description is pre-filled in the Form Pane below. Press ENTER if Same)

(blank/ \* If longest job last year is military job, enter NA)

---

**Q47E1**

\* Ask Only If Necessary

**(Were/Was) (you/he/she) employed by government, by a PRIVATE company, a nonprofit organization, or (was/were) (you/he/she) self-employed or working in a family business?**

- 1      Government
- 2      Private for profit company
- 3      Non profit organization including tax exempt and charitable organizations

- 4 Self employed
- 5 Working in family business

**Q47E1a**

**Would that be the federal, state, or local government?**

- 1 Federal
- 2 State
- 3 Local (county, city, township)

**Q47E1b**

**Was this business incorporated?**

- 1 Yes
- 2 No

**Q47E1c**

**(Were/Was) (you/name) the owner of the business?**

- 1 Yes
- 2 No

**Q4788**

**Counting all locations where (this employer/(name/you)) (operates/operate), what is the total number of persons who work for ((name's/your) employer)/name/you)?**

**\* Read categories if necessary**

- 1 under 10
- 2 10-49
- 3 50-99
- 4 100-499
- 5 500-999
- 6 1,000+

### **3 EARNED INCOME**

The Earnings and Income question series include range follow-up questions presented anytime a respondent doesn't know or refuses to provide an exact dollar amount for a source they (or someone in the household) indicates as having received. Follow-up questions allow respondents that do not feel comfortable giving exact dollar values to report an income range. There are three sets of categories used for the income range follow-up questions: high-range, mid-range, and low-range. The income range used in the follow-up range questions depends on the source of the income. See Attachment A to

this items booklet for the three levels of income range follow up questions. See Attachment B for a table that displays the income source and the range level used for the follow-up questions.

**Q48aa**

**How much did (name/you) earn from this employer before taxes and other deductions during 2020?**

- \* Enter dollar amount
  - \* Enter 0 for none
- 

**Q48aarn1** Ask only if the respondent “Doesn’t know” or ‘Refused” Q48aa

**Could you tell me if (name/you) earned**

**less than \$45,000  
between \$45,000 and \$60,000  
or over \$60,000**

**for the TOTAL yearly amount from this employer before taxes and other deductions during 2020?**

- 1 Less than \$45,000
- 2 Between \$45,000 and \$60,000
- 3 Over \$60,000

**Q48aarn2**

**Did (name/you) earn**

**less than \$15,000  
between \$15,000 and \$30,000  
or over \$30,000**

**from this employer during 2020?**

- 1 Less than \$15,000
- 2 Between \$15,000 and \$30,000
- 3 Over \$30,000

**Q48aap**

- \* Read if necessary

**Is this a weekly, every other week, twice a month, monthly, or yearly amount?**

- 1 Weekly

- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

**Q48a1**

**For how many (weekly/every other week/twice a month/monthly) pay periods did (name/you) earn (fill from Q48aa) from this employer in 2020?**

\* (1-12/1-24/1-26/1-52)

---

**Q48aC2**

- \* Do not read to the respondent.
- \* The annual rate appears out of range. The total annual earnings entered is (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

**Q48aV**

**According to my calculations (name/you) earned (total) altogether from this employer in 2020 before deductions. Does that sound about right?**

- 1 Yes
- 2 No

**Q48a2**

**What is your best estimate of (name's/your) correct total amount of earnings from this employer during 2020 before deductions?**

\* PREVIOUS ENTRIES: Q48aa: (amount)  
Q48aap: (periodicity)  
Q48a1: (number of pay periods)

\* Enter dollar amount

---

**Q48a3**

**Does this amount include all tips, bonuses, overtime pay, or commissions (name/you) may have received from this employer in 2020?**

- 1 Yes
- 2 No

**Q48aad**

**How much did (name/you) earn in tips, bonuses, overtime pay, or commissions from**

**this employer in 2020?**

\* Enter dollar amount

---

**Q48aadrn1 Ask only if the respondent “Doesn’t know” or “Refused” Q48aad**

**Could you tell me if (name/you) earned**

**less than \$1,000**

**between \$1,000 and \$3,000**

**or over \$3,000**

**in tips, bonuses, overtime pay, or commissions from this employer during 2020?**

1 Less than \$1,000

2 Between \$1,000 and \$3,000

3 Over \$3,000

**Q48aadrn2**

**Did (name/you) earn**

**less than \$100**

**between \$100 and \$500**

**or over \$500**

**in tips, bonuses, overtime pay, or commissions from this employer during 2020?**

1 Less than \$100

2 Between \$100 and \$500

3 Over \$500

**Q48b**

**What were (name's/your) net earnings from this business/farm after expenses during 2020?**

\* If response is "Broke Even" then enter 1

\* If response is “none” or if respondent does not own a business or farm, then enter "0"

\* If response is "Lost Money" press Enter

\* Enter dollar amount

---

**Q48b char**

\* Enter “L” for Lost Money

---

**Q48BL**

- \* Enter amount of money lost in 2020
  - \* Enter annual amount only
- 

**Q48brn1 Ask only if the respondent “Doesn’t know” or “Refused” Q48b.**

**Could you please tell me if (name/you) earned**

**less than \$45,000**

**between \$45,000 and \$60,000**

**or over \$60,000**

**for the TOTAL yearly amount from this business/farm after expenses during 2020?**

- 1 Less than \$45,000
- 2 Between \$45,000 and \$60,000
- 3 Over \$60,000

**At any time during 2020 did (you/anyone in the household) receive any Supplemental Unemployment Benefits (SUB)?**

\* Do NOT include federal stimulus payments due to the Coronavirus pandemic.

1 Yes

2 No

##### **Q51A2b**

\* Read only if necessary

**Who received Supplemental Unemployment Benefits?**

\* Enter all that apply, separate using the space bar or a comma.

\* Probe: Anyone Else?

##### **Q51A3**

**At any time during 2020 did (you/anyone in the household) receive any Union Unemployment or Strike Benefits?**

\* Do NOT include federal stimulus payments due to the Coronavirus pandemic.

1 Yes

2 No

**Q51A3b**

\* Read only if necessary

**Who received Union Unemployment or Strike Benefits?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone Else?

**Q52A**

**During 2020 did (you/anyone in the household) receive any Worker's Compensation payments or other payments as a result of a job related injury or illness?**

- \* **Exclude sick pay and/or disability retirement.**
- \* Do NOT include federal stimulus payments due to the Coronavirus pandemic.

1 Yes  
2 No

**Q52Ab**

\* Read only if necessary

**Who received Worker's Compensation or payments as a result of a job related injury or illness?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone Else?
- \* Exclude those who received sick pay and/or disability retirement.

**Q52b**

**What was the source of (your/name's) payments?**

1 State Worker's Compensation  
2 Employer or employer's insurance worker's compensation  
3 Own insurance worker's compensation  
4 Other

**Q52Cs1**

- \* Specify other source from workers compensation/insurance
- \* Enter "Worker's Compensation" if the answer is "Don't Know"

## **4.2 SOCIAL SECURITY (Source)**

### **Q56a**

**During 2020 did (you/ anyone in this household) receive any Social Security payments from the U.S. Government?**

- 1 Yes
- 2 No

### **Q56b**

\* Read only if necessary

**Who received Social Security payments either for themselves or as combined payments with other family members?**

- \* Enter Line Number Of Parent Or Guardian For Payments Made To Children Under Age 15
- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone else?

### **SSR**

**What were the reasons (name/you) (was/were) getting Social Security in 2020?**

- \* Mark all that apply, separate using the space bar or a comma.
- \* Probe: Any Other Reason?

- 1 Retired
- 2 Disabled
- 3 Widowed
- 4 Spouse
- 5 Surviving child
- 6 Dependent child
- 7 On behalf of surviving, dependent, or disabled children
- 8 Other

### **SSRs**

- \* Specify other reason
- 

### **SSC**

**Which children under age 19 were receiving Social Security in 2020?**

- \* Probe: Anyone Else?
- \* Enter all that apply, separate by commas.
- ♦ Enter 96 for All People ♦ Enter 0 for None

**SSCR**

**What were the reasons (Child's name/the children) (was/were) getting Social Security in 2020?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Any Other Reason?

- 1 Disabled child/children
- 2 Surviving child/children
- 3 Dependent child/children
- 4 Other

**SSDIa1**

**Did (name/you) receive (your/his/her) first Social Security Disability payment in 2020?**

- 1 Yes
- 2 No

- 1 Yes
- 2 No

**Q99BR**

**What was the source of (name's/your) savings or investments that pay interest or dividends?**

- \* Enter other source of interest or dividend income

***4.15 PROPERTY INCOME (Source)***

**Q65A1**

**During 2020 did (you/ anyone in this household):**

**Own any land, business property, apartments, or houses which were rented to others?**

- 1 Yes
- 2 No

**Q65A2**

**At any time during 2020 did (you/ anyone in this household):  
Receive income from royalties or from roomers or boarders?  
(exclude amounts paid by relatives)**

- 1 Yes
- 2 No

**Q65A3**

**At any time during 2020 did (you/ anyone in this household):**

**Receive income from estates or trusts?  
(exclude estates or trusts already reported)**

- 1 Yes
- 2 No

**Q65b**

- \* Ask only if necessary

**Who received this (income/rent) ?**

- \* (Amount previously reported in Q48b was (amount))
- \* Include each in cases of joint ownership. For self-employed persons, determine if income was already included
- \* Enter all that apply, separate using the space bar or a comma.

- \* Probe: Anyone Else?

#### **4.16 EDUCATION ASSISTANCE (Source)**

##### **Q66a**

**During 2020 did (you/anyone in this household) attend school beyond the high school level including a college, university, or other schools?**  
(include vocational, business, or trade schools)

- 1 Yes
- 2 No

##### **Q66b**

**Did (you/ anyone in this household) receive any educational assistance for tuition, fees, books, or living expenses during 2020?**

- \* Exclude loans, assistance from household members, and VA educational benefits

- 1 Yes
- 2 No

##### **Q66c**

- \* Ask only if necessary

**Which member received assistance?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone Else?

##### **Q66d**

**What type of assistance did (name/you) receive?**

- \* Exclude assistance from household members
- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Any other assistance?

- 2 Pell Grant
- 3 Assistance from a welfare or social service office
- 4 Some other government assistance
- 5 Scholarships, grants, etc.
- 6 Other assistance (employers, friends, etc.)

#### ***4.17 CHILD SUPPORT (Source)***

##### **Q70a**

**During 2020 did (you/anyone in this household) receive:  
Any child support payments?**

- 1      Yes
- 2      No

##### **Q70b**

\* Read only if necessary

**Who received these payments?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone Else?

#### ***4.18 REGULAR FINANCIAL ASSISTANCE (Source)***

##### **Q72a**

**(Any other/Any) regular financial assistance from friends or relatives not living in this household?**

\* Do not include loans

- 1      Yes
- 2      No

##### **Q72b**

\* Read only if necessary

**Who received this assistance?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone Else?

#### ***4.19 OTHER MONEY INCOME (Source)***

## **5.7 DISABILITY INCOME (Amounts)**

### **Q61E1P**

**What is the easiest way for you to tell us (name's/your) (fill first answer from Q61C or Q61Cs1) payments; weekly, every other week, twice a month, monthly, or yearly?**

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

### **Q61E1**

**How much did (name/you) receive (weekly/ every other week/ twice a month/ monthly) before deductions in (fill first answer from Q61C or Q61Cs1) payments in 2020?**

◆ Enter dollar amount

◆ Do not include Veterans' payments.

---

### **Q61e1rn1**

**Could you please tell me if (name/you) received:**

**less than \$10,000  
between \$10,000 and \$20,000  
or over \$20,000**

**for the TOTAL amount (name/you) received in (fill first answer from Q61Cr or Q61Cs1) during 2020?**

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

### **Q61e1rn2**

**Did (name/you) receive**

less than \$1,000  
between \$1,000 and \$5,000  
or over \$5,000

in (fill first answer from Q61C or Q61Cs1) during 2020?

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

**Q61E12**

How many (weekly/ every other week/ twice a month/ monthly) payments did (name/you) receive in (fill first answer from Q61C or Q61Cs1) payments in 2020?

- \* Disability income source #1 (1-12; 1-52)
- 

**Q61E1C**

- \* Do not read to the respondent.
- \* The annual rate appears out of range. The total (fill from first answer in Q61c or Q61cs1) payments received in 2020 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

**Q61E13**

According to my calculations (name/you) received \$(total) altogether from (fill first answer from Q61C or Q61Cs1) payments in 2020. Does that sound about right?

- 1 Yes
- 2 No

**Q61E14**

What is your best estimate of the correct amount (name/you) received from (fill first answer from Q61C or Q61Cs1) payments during 2020?

- \* PREVIOUS ENTRIES: (amount)  
Q61E1P: (periodicity)  
Q61E12: (number of pay periods)
  - \* Enter dollar amount
- 

**Q61E2P**

**What is the easiest way for you to tell us (name's/your) (fill second answer from Q61C or Q61Cs1) payments; weekly, every other week, twice a month, monthly, or yearly?**

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

**Q61E2**

**How much did (name/you) receive (weekly/every other week/ twice a month/ monthly) before deductions in (fill second answer from Q61C or Q61Cs1) payments in 2020?**

\* Enter dollar amount

---

**Q61e2rn1**

**Could you please tell me if (name/you) received**

**less than \$10,000  
between \$10,000 and \$20,000  
or over \$20,000**

**for the TOTAL amount (name/you) received in (fill second answer from Q61C or Q61Cs1) during 2020?**

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

**Q61e2rn2**

**Did (name/you) receive**

**less than \$1,000  
between \$1,000 and \$5,000  
or over \$5,000**

**in (fill second answer from Q61C or Q61Cs1) during 2020?**

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

**Q61E22**

**How many (weekly/every other week/ twice a month/ monthly) payments did (name/you) receive in (fill second answer from Q61C or Q61Cs1) payments in 2020?**

- \* Disability income payment source #2 (1-12; 1-52)
- 

**Q61E2C**

- \* Do not read to the respondent.
- \* The annual rate appears out of range. The total (fill from second answer in Q61c or Q61cs1) payments received in 2020 was (amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

**Q61E23**

**According to my calculations (name/you) received \$(total) altogether from (fill second answer from Q61C or Q61Cs1) payments in 2020. Does that sound about right?**

- 1 Yes
- 2 No

**Q61E24**

**What is your best estimate of the correct amount (name/you) received from (fill second answer from Q61C or Q61Cs1) payments during 2020?**

- \* PREVIOUS ENTRIES: (amount)  
Q61E2P: (periodicity)  
Q61E22: (number of pay periods)

- \* Enter dollar amount
- 

**5.8 VETERANS PAYMENTS (*Amounts*)**

**Q60V1P**

**What is the easiest way for you to tell us (name's/your) (fill from first answer in Q60c8); weekly, every other week, twice a month, monthly, or yearly?**

- 1 Weekly
- 2 Every other week
- 3 Twice a month

- 4 Monthly
- 7 Yearly

**Q60V1**

**How much did (name/you) receive (weekly/every other week/ twice a month/monthly) before deductions in (fill from first answer in Q60c8) in 2020?**

\* Enter dollar amount

---

**Q60v1rn1**

**Could you please tell me if (name/you) received**

**less than \$10,000  
between \$10,000 and \$20,000  
or over \$20,000**

**for the TOTAL amount (name/you) received in (fill from first answer in Q60c8) during 2020?**

- 1 Less than \$10,000
- 2 Between \$10,000 and \$20,000
- 3 Over \$20,000

**Q60v1rn2**

**Did (name/you) receive**

**less than \$1,000  
between \$1,000 and \$5,000  
or over \$5,000**

**in (fill from first answer in Q60c8) payments during 2020?**

- 1 Less than \$1,000
- 2 Between \$1,000 and \$5,000
- 3 Over \$5,000

**Q60V12**

**How many (weekly/every other week/ twice a month/monthly) payments did (name/you) receive in (fill from first answer in Q60c8) in 2020?**

\* (1-52)

---

**Q60V1C**

***5.20 REGULAR FINANCIAL ASSISTANCE (Amounts)***

**Q72cp**

**What is the easiest way for you to tell us (name's/your) regular financial assistance; weekly, every other week, twice a month, monthly, or yearly?**

- 1 Weekly
- 2 Every other week (bi-weekly)
- 3 Twice a month
- 4 Monthly
- 7 Yearly

**Q72c**

**How much did (name/you) receive (weekly/every other week/twice a month/monthly) in regular financial assistance in 2020?**

\* Enter dollar amount

---

**Q72c2**

**How many (weekly/every other week/twice a month/monthly) payments did (name/you) receive in regular financial assistance in 2020?**

\* (1-12/1-24/1-26/1-52)

---

**Q72crn1**

**Could you please tell me if (name/you) received:**

**less than \$1,000  
between \$1,000 and \$3,000  
or over \$3,000**

**in regular financial assistance in 2020?**

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

**Q72crn2**

**Did (name/you) receive**

**less than \$100  
between \$100 and \$500  
or over \$500**

**in regular financial assistance in 2020?**

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

**Q72cC2**

- \* Do not read to the respondent.
- \* The annual rate appears out of range. The total regular financial assistance payments received in 2020 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

**Q72c3**

**According to my calculations (name/you) received \$(total) altogether from regular financial assistance in 2020. Does that sound about right?**

- 1 Yes
- 2 No

**Q72c4**

**What is your best estimate of the correct amount (name/you) received from regular financial assistance during 2020?**

\*PREVIOUS ENTRIES:    Q72c: (amount)  
                                  Q72cp: (periodicity)  
                                  Q72c2: (number of pay periods)

---

## **5.21 OTHER MONEY INCOME (Amounts)**

### **Q731P**

**What is the easiest way for you to tell us (name's/your) income from (fill from Q73A1Rc);**

**weekly, every other week, twice a month, monthly, or yearly?**

- 1    Weekly
- 2    Every other week (bi-weekly)
- 3    Twice a month
- 4    Monthly
- 7    Yearly

### **Q731**

**How much did (name/you) receive (weekly/every other week/twice a month/monthly) in income from (fill from Q73A1Rc) during 2020?**

\* Do NOT include federal stimulus payments due to the Coronavirus pandemic.

\* Enter dollar amount

---

### **Q7312**

**How many (weekly/every other week/twice a month/monthly) payments did (name/you) receive in income from (fill from Q73A1Rc) during 2020?**

\* (1-12/1-24/1-26/1-52)

---

### **Q73rn1**

**Could you please tell me if (name/you) received:**

**less than \$1,000**  
**between \$1,000 and \$3,000**  
**or over \$3,000**

**in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc)?**

- 1 Less than \$1,000
- 2 Between \$1,000 and \$3,000
- 3 Over \$3,000

**Q73rn2**

**Did (name/you) receive:**

**less than \$100  
between \$100 and \$500  
or over \$500**

**in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc)?**

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

**Q731C2**

- \* Do not read to the respondent.
- \* The annual rate appears out of range. The total income from (fill from Q73A1Rc) in 2020 was \$(amount). Is this a correct entry? If Yes, enter "S" to Suppress. If No, press enter and correct entry.

**Q7313**

**According to my calculations (name/you) received \$(total) altogether from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc) in 2020.**

**Does that sound about right?**

- 1 Yes
- 2 No

**Q7314**

**What is your best estimate of the correct amount (name/you) received in income from (Alaska Permanent Fund Dividend/fill-in from Q73a1Rc) in 2020?**

- \* PREVIOUS ENTRIES: Q731: (amount)  
Q731P: (periodicity)  
Q7312: (number of pay periods)

- \* Enter dollar amount

## ***5.22 CONTRIBUTIONS TO RETIREMENT ACCOUNTS (Amounts)***

### **CONTRIB1**

Earlier we recorded that (you/name) (have/has) a retirement account, such as a 401(k), 403(b), IRA, or other account designed specifically for retirement savings.

Did (you/he/she) contribute any money to (your/his/her) plan(s), for example, through payroll deductions?

(Do not include amounts reinvested or “rolled over” from other retirement accounts.)

- 1 Yes
- 2 No

### **CONTRIB2**

How much did (you/he/she) contribute to (your/his/her) account(s) in 2020?

\* Total contributions to all accounts.

---

## **6 HEALTH INSURANCE**

### ***6.1 INTRODUCTION TO HEALTH INSURANCE SECTION***

#### **HINTRO**

These next questions are about health coverage between January 1, 2020 and now.

\* Press 1 to Continue

- 1 Enter 1 to Continue

#### **PINTRO**

(First/Next) I'm going to ask about (name's/your) health coverage.

\* Press 1 to Continue

- 1 Enter 1 to Continue

#### **FHINTRO**

Next, I'm going to ask about (name's/your) health coverage.

\* Press 1 to Continue

## **6.2 CURRENT COVERAGE**

### **MCARE1**

?[F1]

**Medicare is health insurance for people 65 years and older and people under 65 with disabilities. (Is/Are) (name/you) NOW covered by Medicare?**

\* Code Medicare Parts A, B, and C and Medicare Advantage as "Yes"

- 1 Yes
- 2 No

### **ANYCOV**

**(Does/Do) (name/you) NOW have any type of health plan or health coverage?**

- 1 Yes
- 2 No

### **MEDI**

?[F1]

**(Are/Is/Was/Were) (name/you) covered by Medicaid, Medical Assistance, or (CHIP/or Medicare)?**

- 1 Yes
- 2 No

### **OTHGOVT**

**(Is/Are) (name/you) NOW covered by a state or government assistance program that helps pay for healthcare, such as: State Medicaid, CHIP, Exchange/Portal, or other State Health program?**

\* Stop reading list if respondent says "YES"

- 1 Yes
- 2 No

### **VET**

**(Is/Are) (name/you) NOW covered by Veteran's Administration (VA) care?**

- 1 Yes
- 2 No

### **VERIFY**

**I recorded that (name/you) (is/are) not currently covered by a health plan. Is that correct?**

- 1 Yes, is NOT covered
- 2 No, is covered

## ***6.3 TYPE OF COVERAGE***

### **SRCEGEN**

?[F1]

#### **\* ASK OR VERIFY**

**For the coverage (name/you) (has/have/had) NOW, (do/does/did) (he/she/you) get it through a job, the government or state, or some other way?**

#### **\* 1. JOB**

Former job/Retiree  
Union  
Spouse/parent's job  
Job with the government  
COBRA  
TRICARE/TRICARE For Life

#### **2. GOVERNMENT OR STATE**

Medical Assistance  
Medicaid  
Medicare (Parts A+B; Part C)  
Medicare Advantage  
State-provided health coverage  
VA Care/CHAMPVA/other military

#### **3. OTHER WAY**

Privately purchased  
Parent or spouse  
Medicare Supplements  
Exchange plan/Marketplace  
Group or association  
School

- \* IF RESPONDENT CHOOSES MORE THAN ONE: Let's talk about one plan at a time. Which would you like to tell me about first?

[♦ If respondent is not covered, go back to VERIFY and select "Yes"]

- 1 Job (current or former)
- 2 Government or State
- 3 Some other way

### **SRCEDEPDIR**

#### **\* ASK OR VERIFY**

**(Does/Do/Did) (name/you) get that coverage through a parent or spouse, (does/do/did) (he/she/you) buy it (himself/herself/yourself), or (does/did/do) (he/she/you) get it some other way?**

**\* 1. PARENT OR SPOUSE**

Parent  
Spouse

**2. BUY IT DIRECTLY**

Buy it  
Parent or spouse buys it  
Medicare Supplement

**3. SOME OTHER WAY**

Former employer  
Group or association  
Indian Health Service  
School

- 1 Parent or spouse
- 2 Buy it
- 3 Some other way

**SRCEOTH**

**\* ASK OR VERIFY**

**(Does/Do/Did) (name/you) get it through a former employer, a union, a group or association, the Indian Health Service, a school, or some other way?**

- 1 Former employer
- 2 Union
- 3 Group or association
- 4 Indian Health Service
- 5 School
- 6 Some other way

**JOB COV**

**(Is/Was) that coverage related to a JOB with the government or state?**

- \* READ IF NECESSARY: Include coverage through FORMER employers and unions, and COBRA plans.**

- 1 Yes
- 2 No

**MILPLAN**

**\* ASK OR VERIFY**

**(Is/Was) that plan related to military service in any way?**

- \* Examples of military plans include:**
  - VA Care
  - TRICARE

- TRICARE for Life
- CHAMPVA
- Other military care

- 1 Yes
- 2 No

### **GOVTYPE**

?[F1]

\* ASK OR VERIFY

**(Is/Was) that coverage Medicaid, CHIP, Medicare, a plan through the military, or some other program?**

- \* Code Medicare Parts A, B, and C and Medicare Advantage as "Medicare"
- \* IF RESPONDENT CHOOSES MORE THAN ONE: Let's talk about one plan at a time. Which would you like to tell me about first?

- 1 Medicaid or Medical Assistance
- 2 CHIP
- 3 Medicare
- 4 Military
- 5 Other

### **MILTYPE**

\* ASK OR VERIFY

**(Is/Was) that plan through TRICARE, TRICARE for Life, CHAMPVA, VA Care, military health care, or something else?**

- 1 TRICARE
- 2 TRICARE for Life
- 3 CHAMPVA
- 4 Veterans Administration (VA) care
- 5 Military health care
- 6 Other

### **POLHOLDER**

\* ASK OR VERIFY

**Whose name (is/was) the policy in? (Who (is/was) the policyholder?)**

- 1-16 Name on roster

17      Someone living outside the household

Enter persons line number (1-16), or 17 for person not in the household

**SRCEPTSP**

\* ASK OR VERIFY

**(Do/Did) they get that coverage through their job, (do/did) they buy it themselves, or (do/did) they get it some other way?**

- 1    Job (current or former)
- 2    Buy it
- 3    Some other way

**GOVPLAN**

\* ASK OR VERIFY

**What do you call the program?**

\* IF RESPONDENT ANSWERS WITH INSURANCE COMPANY NAME: OK, so that would be the plan name. What do you call the program? Some examples of programs in (state) are [read full list below].

- 1      Medicaid
- 2      Medical Assistance
- 3      Indian Health Service (IHS)
- 4-12   State Medicaid Programs Names
- 13-15   State Exchange Programs Names
- 16      Plan through State Exchange Portal
- 17      Other government plan
- 18      Other (please specify)

**MISCSPEC**

Please Specify

Write in plan name

---

**PORTAL**

\* ASK OR VERIFY

**(Is/Was) that coverage through (State Exchange Portal Name), which may also be known as (State Exchange Program Name 1, Name 2, Name 3)?**

- 1 Yes
- 2 No

### **EXCHTYPE**

\* ASK OR VERIFY

**What do you call it – State Exchange Program (Portal, Name 1, Name 2, Name 3)?**

1-4 State Exchange Programs Names

### **HIP Aid**

**(Does/Did) (your/policyholder name's/the policyholder's) employer or union pay for all, part, or none of the health insurance premium?**

\* Report here employer's contribution to employee's health insurance premiums, not the employee's medical bills.

- 1 All
- 2 Part
- 3 None

### **SHOP**

**Small businesses can offer health coverage to their employees through (State Exchange SHOP Portal Name). (Is/Was) the coverage at all related to (State Exchange SHOP Portal Name), (such as State SHOP Name 1, Name 2, Name 3)?**

- 1 Yes
- 2 No

### **POLHOLDER2**

\* ASK OR VERIFY

**Whose name (is/was) the policy in? (Who [is/was] the policyholder?)**

- 1-16 Name on roster
- 17 Someone living outside the household

Enter persons line number (1-16), or 17 for person not in the household

### **PREMYN**

**Is there a monthly premium for this plan?**

- \* A monthly premium is a fixed amount of money people pay each month to have health coverage. It does not include copays or other expenses such as prescription costs.

1 Yes  
2 No

### **PREMSUBS**

**Is the cost of the premium subsidized based on (your/family) income?**

- \* A monthly premium is a fixed amount of money people pay each month to have health coverage. It does not include copays or other expenses such as prescription costs.
- \* Subsidized health coverage is insurance with a reduced premium. Low and middle income families are eligible to receive tax credits that allow them to pay lower premiums for insurance bought through healthcare exchanges or marketplaces.

1 Yes  
2 No

## ***6.4 MONTHS OF COVERAGE***

### **BEFORAFT**

**Did (name's/your) coverage from (plan type) start before January 1, 2020?**

- \* READ IF NECESSARY: Your best estimate is fine.
- \* (READ IF NECESSARY: If (policyholder) switched employers or plans through (your/their) employer, consider it the same plan.)
- ♦ (READ IF NECESSARY: If (policyholder) switched plans that (you/he/she) (buy/buys), consider it the same plan.)

1 Yes  
2 No

### **MNTHBEG1/2**

**In which month did (that/this) coverage start?**

- \* READ IF NECESSARY: Your best estimate is fine.
- \* (READ IF NECESSARY: If (policyholder) switched employers or plans through (your/their) employer, consider it the same plan.)

♦ (READ IF NECESSARY: If (policyholder) switched plans that (you/he/she) (buy/buys), consider it the same plan.)

\* This question refers to (plan type).

- 1 January
- 2 February
- 3 March
- 4 April
- 5 May
- 6 June
- 7 July
- 8 August
- 9 September
- 10 October
- 11 November
- 12 December

### **YEARBEG**

\* ASK OR VERIFY

**Which year was that?**

\* (READ IF NECESSARY: If (policyholder) switched employers or plans through (your/their) employer, consider it the same plan.)

\* This question refers to (plan type).

- 1 2020
- 2 2021

### **CNTCOV**

**Has it been continuous since (beginning month)?**

\* (READ IF NECESSARY: If (policyholder) switched employers or plans through (your/their) employer, consider it the same plan.)

♦ (READ IF NECESSARY: If (policyholder) switched plans that (you/he/she) (buy/buys), consider it the same plan.)

\* READ IF NECESSARY: If the gap in coverage was less than 3 weeks, consider the coverage "continuous."

\* This question refers to (plan type).

- 1 Yes
- 2 No

**SPELLADD**

**I have recorded that (name/you) (was/were) covered by (plan type) in (months of coverage). Were there any OTHER months between January 2020 and now that (name/you) (was/were) also covered by (plan type)?**

- 1 Yes
- 2 No

**ANYTHIS**

**Which months (was/were) (name/you) covered by (plan type) THIS year -- in 2021?**

- 1 January 2021
- 2 February 2021
- 3 March 2021
- 4 April 2021
- 20 All months of 2021
- 21 No months of 2021

**ANYLAST**

**Which months (was/were) (name/you) covered by (plan type) LAST year -- in 2020?**

- 1 January
- 2 February
- 3 March
- 4 April
- 5 May
- 6 June
- 7 July
- 8 August
- 9 September
- 10 October
- 11 November
- 12 December
- 20 All months from January 2020 until December 2020
- 21 No months from January 2020 until December 2020

**WMNTHS**

**Which months between January 2020 and now (was/were) (name/you) covered by (plan type)?**

- 1 January 2020
- 2 February 2020
- 3 March 2020
- 4 April 2020
- 5 May 2020
- 6 June 2020
- 7 July 2020
- 8 August 2020
- 9 September 2020
- 10 October 2020
- 11 November 2020
- 12 December 2020
- 13 January 2021
- 14 February 2021
- 15 March 2021
- 16 April 2021
- 20 All months from January 2020 until now
- 21 No months from January 2020 until now

## **6.5 OTHER HOUSEHOLD MEMBERS**

### **OTHMEMB**

**Between January 1, 2020 and now, was anyone in the household other than (name/you) ALSO covered by (plan type)?**

- 1 Yes
- 2 No

### **COVWHO**

**Who else was covered? Who else was covered by (plan type)?**

\* PROBE: Anyone else?

- 0 No one listed
- 1-16 Person 1 through 16's name
- 96 All persons listed

### **SAMEMNTHS**

**(Was/Were) (name/names) also covered from January 2020 until now?**

\* This question refers to (plan type)

- 1 All also covered from January 2020 until now
- 2 None covered from January 2020 until now

### **MNTHS P(1-16)M**

**Which months between January 2020 and now was (NAME) covered? [How about (NAME)?]**

\* This question refers to (plan type)

- 1 January 2020
- 2 February 2020
- 3 March 2020
- 4 April 2020
- 5 May 2020
- 6 June 2020
- 7 July 2020
- 8 August 2020
- 9 September 2020
- 10 October 2020
- 11 November 2020
- 12 December 2020
- 13 January 2021
- 14 February 2021
- 15 March 2021
- 16 April 2021
- 20 All months from January 2020 until now
- 21 No months from January 2020 until now

### **OTHOUT**

**Does that plan cover anyone living outside this household?**

\* This question refers to (plan type)

- 1 Yes
- 2 No

### **OTHWHO**

**How old are they -- under 19, 19-25, or older than 25?**

\* Mark all that apply

- 1 Under 19
- 2 19-25 years old
- 3 Older than 25

## **6.6 ADDITIONAL PLANS**

### **ADDGAP**

**So far, I have recorded that (name/you) (was/were) NOT covered in (months of no coverage). (Was/Were) (name/you) covered by any type of health plan or health coverage in (those months/that month)?**

\* **READ IF NECESSARY: Do not include plans that cover only one type of care, such as dental or vision plans.**

- 1      Yes
- 2      No

### **ADDOTH**

**Other than (plan type[s]), (was/were) (name/you) covered by any other type of health plan or health coverage AT ANY TIME between January 1, 2020 and now?**

\* **READ IF NECESSARY: Do not include plans that cover only one type of care, such as dental or vision plans.**

- 1      Yes
- 2      No

## **6.7 EMPLOYER-SPONSORED INSURANCE OFFERS AND TAKEUP**

### **ESIINTRO**

**Earlier I recorded that (name/you) (is/are) employed but (does/do) not have health coverage through (his/her/your) job.**

- 1      Enter 1 to continue

**Other than Social Security did (the/any) employer or union that (name/you) worked for in 2020 have a pension or other type of retirement plan for any of its employees?**

- 1 Yes
- 2 No

### **Q74b**

**(Were/Was) (name/you) included in that plan?**

- 1 Yes
- 2 No

## 8 LOW INCOME ITEMS

### 8.1 SCHOOL LUNCHES

#### Q80

**During 2020 which of the children ages 5 to 18 in this household usually ate a complete lunch offered at school?**

- \* “Usually” refers to days where school was being held in person, such as during the pre-pandemic period or in areas where schools remained open.
- \* Probe: Anyone else?
- \* Enter all that apply, separate using the space bar or a comma.
- \* Enter 96 for All
- \* Enter 0 for None

#### Q83

**During 2020 which of the children in this household received free or reduced priced lunches because they qualified for the Federal School Lunch Program?**

- \* Probe: Anyone else?
- \* Enter all that apply, separate using the space bar or a comma.
- \* Enter 96 for All
- \* Enter 0 for None

#### ECVDMEAL

**Did your children continue receiving free/reduced price meals through your school or school district if schools were closed during the coronavirus pandemic?**

- \* This includes any food provided by the school, regardless of where and how it is delivered.

- 1 Yes
- 2 No
- 3 Schools were not closed

### 8.2 PUBLIC HOUSING

#### Q85

**Is this public housing, that is, is it owned by a local housing authority or other public agency?**

- 4 Yes
- 5 No

**Q86**

**Are you paying lower rent because the Federal, State, or local government is paying part of the cost?**

- 1      Yes
- 2      No

**SPHS8**

**Is this through Section 8 or through some other government program?**

- 1      Section 8
- 2      Some other government program
- 3      Not sure

***8.3 WOMEN, INFANTS, AND CHILDREN NUTRITION PROGRAM (WIC)***

**SWRWIC**

**At any time during 2020, (was/were) (you/ anyone in this household) on WIC, the Women, Infants, and Children Nutrition Program?**

- 1      Yes
- 2      No

**SWRW**

**Who received WIC for themselves or on behalf of a child?**

- \* Enter all that apply, separate using the space bar or a comma.
- \* Probe: Anyone else?

***8.4 ENERGY ASSISTANCE***

**Q93**

**The government has an energy assistance program which helps pay heating and cooling costs. This assistance can be received directly by the household or it can be paid directly to the electric company, gas company, or fuel dealer.**

**In 2020, (did you/did this household) receive assistance of this type from the federal, state, or local government?**

- 1      Yes

2 No

**Q93pr1**

**Do you remember receiving an additional or unexpected check that was sent during the year to help pay heating or cooling costs?**

1 Yes  
2 No

**Q93pr2**

**Was it used to pay heating costs?**

1 Yes  
2 No

**Q94**

**Altogether, how much energy assistance has been received in 2020?**

**\* Enter annual amount only**

---

**Q94rn1**

**Could you tell me if you received:**

**less than \$1,000  
between \$1,000 and \$3,000  
or over \$3,000**

**in energy assistance during 2020?**

1 Less than \$1,000  
2 Between \$1,000 and \$3,000  
3 Over \$3000

**Q94rn2**

**Did you receive:**

**less than \$100  
between \$100 and \$500  
or over \$500**

**in energy assistance during 2020?**

- 1 Less than \$100
- 2 Between \$100 and \$500
- 3 Over \$500

## **9 MIGRATION**

### ***9.1 1-YEAR MIGRATION***

#### **MIGSAM**

**(Were/Was) (you/reference person's name) living in this house (or apartment) one year ago?**

- 1 Yes, this house (apt)
- 2 No, different house in U.S.
- 3 No, outside the U.S.

#### **MIGPLC**

**Where did (reference person's name/you) live one year ago?**

- \* Name of city/town/post office
  - \* Current: (city)
  - \* Enter correct city/town/post office or press ENTER for SAME
- 

#### **MIGSTA**

**Where did (reference person's name/you) live one year ago?**

- \* Name of State
  - \* Current: (state)
  - \* Enter W for person living on a ship at sea
  - \* Enter correct State or press ENTER for SAME
- 

#### **MIGZIP**

**Where did (reference person's name/you) live one year ago?**

- \* Zip Code
  - \* Current: (zip)
  - \* Enter correct Zip Code or press ENTER for SAME
- 

#### **MIGCLM**

**Did (reference person's name/you) live inside the city limits of (place name)?**

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

### **MIGCOU**

**What (county/parish) is (place name) in?**

\* Enter "IND CITY" if an independent city, not a county

---

### **S MIGCN1**

**What country did (reference person's name/you) live in one year ago?**

### **MI1RES**

**What was (your/name's) main reason for moving to this house (apartment)?**

\* The answer categories are separated into the following groups:

FAMILY-RELATED REASONS\* 1-3

EMPLOYMENT-RELATED REASONS 5-9

HOUSING-RELATED REASONS 10-15

OTHER REASONS 4, 16-20

\*Family-related reasons only include family as defined by the Census Bureau. Family consists of people who are related by birth, marriage, or adoption.

- 1 change in marital status
- 2 to establish own household
- 3 other family reason (specify)
- 4 relationship with unmarried partner (boy/girlfriend, fiancé, etc.)
- 5 new job or job transfer
- 6 to look for work or lost job
- 7 to be closer to work/easier commute
- 8 retired
- 9 other job-related reason (specify)
- 10 wanted to own home, not rent
- 11 wanted newer/better/larger house or apartment
- 12 wanted better neighborhood/less crime
- 13 cheaper housing
- 14 foreclosure/eviction
- 15 other housing reason (specify)
- 16 to attend or leave college
- 17 change of climate
- 18 health reasons
- 19 natural disaster (hurricane, tornado, etc.)
- 20 other reason (specify)

### **MI1s**

**What was the reason for moving?**

---

### **MIGALL**

**There are (number) other persons in this household ages 1 year or over.  
Did (all of these persons/this person) live with (reference person's name/you) (in this house/in City, State/outside the U.S.) one year ago?**

- 1 Yes, all lived with (reference person's name/you)
- 2 No, some or all did not live with (reference person's name/you)

### **MIGM**

**Which of the other members of this household did NOT live with (reference person's name/you) one year ago?**

- \* PROBE: Anyone else?
- \* Enter all that apply, separate using the space bar or a comma.
- \* Enter Line Number(s)

### **NXTSAM**

**Did (name/you) live in this house (apartment) one year ago?**

- 1 Yes , this house
- 2 No, different house in U.S.
- 3 No, outside the U.S.

### **NXTPLC**

**Where did (name/you) live one year ago?**

- \* Name of city/town/post office
  - \* Current: (city) Enter correct city/town/post office or
  - \* Press ENTER for SAME
- 

### **NXTSTA**

**Where did (name/you) live one year ago?**

- \* Name of State
- \* Current: (state)

\* Enter correct State or press ENTER for SAME

---

### **NXTZIP**

**Where did (name/you) live one year ago?**

- \* Zip Code Current: (zip)
  - \* Enter correct zip code or
  - \* Press ENTER for SAME
- 

### **NXTCLM**

**Did (name/you) live inside the city limits of (place name)?**

- 1 Yes, inside city limits
- 2 No, outside city limits or post office name only

### **NXTCOU**

**What (county/parish) is (place name) in?**

\* Enter "IND CITY" if an independent city, not a county

---

### **S NXTCN1**

**What country did (name/you) live in one year ago?**

### **NX1RES**

**What was (name's/your) main reason for moving to this house (apartment)?**

- \* The answer categories are separated into the following groups:
  - FAMILY-RELATED REASONS\* 1-3
  - EMPLOYMENT-RELATED REASONS 5-9
  - HOUSING-RELATED REASONS 10-15
  - OTHER REASONS 4, 16-20

\*Family-related reasons only include family as defined by the Census Bureau. Family are people who are related by birth, marriage, or adoption.

- 1 change in marital status
- 2 to establish own household
- 3 other family reason (specify)
- 4 relationship with unmarried partner (boy/girlfriend, fiancé, etc.)

- 5 new job or job transfer
- 6 to look for work or lost job
- 7 to be closer to work/easier commute
- 8 retired
- 9 other job-related reason (specify)
- 10 wanted to own home, not rent
- 11 wanted newer/better/larger house or apartment
- 12 wanted better neighborhood/less crime
- 13 cheaper housing
- 14 foreclosure/eviction
- 15 other housing reason (specify)
- 16 to attend or leave college
- 17 change of climate
- 18 health reasons
- 19 natural disaster (hurricane, tornado, etc.)
- 20 other reason (specify)

### **NX10TH**

**What was the reason for moving?**

---

### **SUNITS**

\* Ask if necessary

**How many housing units are in your building?**

- 1 Only one
- 2 Two
- 3 Three or four
- 4 Five to nine
- 5 Ten or more

## **10 SUPPLEMENTAL POVERTY MEASURE**

### ***10.1 PROPERTY VALUE/PRESENCE OF MORTGAGE***

### **VALPROP**

**About how much do you think this (house and lot/apartment/mobile home) would sell for if it were for sale?**

♦ Enter dollar amount

---

### **VALPROPR**

**Could you tell me if you think this (house and lot/apartment/mobile home) would sell for:**

**less than \$100,000  
between \$100,000 and \$250,000  
between \$250,000 and \$500,000  
or \$500,000 or more?**

- 1 Less than \$100,000
- 2 Between \$100,000 and \$250,000
- 3 Between \$250,000 and \$500,000
- 4 \$500,000 or more

### **MORTYN**

**Not counting home equity loans, do you or any other member of this household have a mortgage, deed of trust, contract to purchase, or similar debt on THIS property?**

- 1 Yes
- 2 No

### **SMORTYN**

**Do you or any member of this household have a second mortgage or a home equity loan on THIS property?**

- 1 Yes, home equity loan.
- 2 Yes, second mortgage.
- 3 Yes, second mortgage and home equity loan.
- 4 No

## ***10.2 CHILD CARE***

### **Q95**

**Now we want to ask about some of your expenses for children.**

**Did (you/ anyone in this household) PAY for the care of (your/their) (child/children) while (you/they) worked in 2020?**

- ♦ Include: All child care expenses including preschool and nursery school expenses, before and after school care, and summer care.
- ♦ Do not include: cost of kindergarten or grade/elementary school.

- 1 Yes
- 2 No

**Q95A**

**Which children needed care while their parents worked?**

- ◆ Enter all that apply, separate using the space bar or a comma.
- ◆ Probe: Anyone else?
- ◆ Enter 96 for All persons
- ◆ Enter 0 if none

**CCFREQ**

**What is the easiest way for you to tell us how much was paid for child care while (you/they) worked in 2020: weekly, every other week, twice a month, monthly, or yearly?**

- 1 Weekly
- 2 Every other week
- 3 Twice a month
- 4 Monthly
- 7 Yearly

**CCAMT**

**How much was paid (weekly/every other week/twice a month/monthly) for child care?**

- \* Include child care payments made for all children in the household.
  - \* For example, if there are two adults in the household with childcare expenses use the total paid by both adults. Do not try to separate the payments. Record one total for the entire household.
- 

**CCNUMPAY**

**How many (weekly/every other week/twice a month/monthly) payments did (you/they) make during 2020?**

(1-52), (1-26), (1-24), (1-12)

---

**CCTOT**

**Then (you/they) paid \$(amount) altogether in child care while (you/they) worked during 2020. Does that sound about right?**

- 1      Yes
- 2      No

**CCEST**

**What is your best estimate of the correct amount (you/they) paid for child care while (you/they) worked in 2020?**

\_\_\_\_\_

***10.3 CHILD SUPPORT PAID***

**CSPCHILD**

**(Do you/Does anyone in this household) have any children who lived elsewhere with their other parent or guardian at anytime during 2020?**

- 1      Yes
- 2      No

**CSPWHO**

**Who had children who lived elsewhere? Anyone else?**

- \* Enter line number
  - \* Enter all that apply, separate using the space bar or a comma.
- \_\_\_\_\_

**CSPREQ**

**In 2020, did (name/you) pay any child support for children living elsewhere with their other parent or guardian?**

- 1      Yes
- 2      No

**CSPAMT**

**How much child support did (name/you) pay in 2020?**

- ◆ Enter dollar amount
- ◆ COUNT ALL FORMS OF CHILD SUPPORTS PAYMENTS, INCLUDING:  
...PAYMENTS MADE DIRECTLY TO THE OTHER PARENT/GUARDIAN;  
...PAYMENTS MADE THROUGH A COURT OR AGENCY; AND  
...PAYMENTS WITHHELD FROM THIS PERSON'S PAYCHECK

## ***10.4 STIMULUS PAYMENTS***

### **ECVD EIP**

**Since April 1, 2020, have you or anyone in your household received a “stimulus payment,” that is the coronavirus (COVID-19) related Economic Impact Payment from the Federal Government?**

- \* Do not include refunds on annual income taxes, unemployment compensation, or payments from an employer

- 1 Yes
- 2 No

### **ECVD COV**

**Who was the stimulus payment for?**

- \* Enter line number
- \* Enter all that apply, separate using the space bar or a comma.

---

### **ECVD AMT**

**What was the amount of the stimulus payment(s) that you received for all the covered adults and children since April 1, 2020?**

- ◆ Enter dollar amount

---

## Attachment A. Income Range Follow-up Questions

The three levels of income range follow-up questions are:

1) High-range income follow-up brackets:

- Less than \$45,000
- Between \$45,000 and \$60,000
- \$60,000 or more

If the respondent selects the lowest bracket (Less than \$45,000), then the following ranges will be presented to the respondent:

- Less than \$15,000
- Between \$15,000 and \$30,000
- \$30,000 or more

2) Mid-range income follow-up questions:

- Less than \$10,000
- Between \$10,000 and \$20,000
- \$20,000 or more

If the respondent selects the lowest bracket (Less than \$10,000), then the following ranges will be presented to the respondent:

- Less than \$1,000
- Between \$1,000 and \$5,000
- \$5,000 or more

3) Low-range income follow-up questions:

- Less than \$1,000
- Between \$1,000 and \$3,000
- \$3,000 or more

If the respondent selects the lowest bracket (Less than \$1,000), then the following ranges will be presented to the respondent:

- Less than \$100
- Between \$100 and \$500
- \$500 or more

## Attachment B. Income Source and Follow-Up Question Range Level

The following table displays the income source and range level used in the follow-up range questions.

Source Screen	Income Source	Range Screen	Range Level
Q48AA	Earnings from Longest Job	PUQ48AARN1	High
Q48AAD	Longest Job: tips, bonuses, etc.	PUQ48AADRN1	Low
Q48B	Earnings from Business/ Farm	PUQ48BRN1	High
Q48BAD	Business/ Farm: tips, bonuses, etc.	PUQ48BADRN1	Low
Q49B1D	Earnings from All Other Employers	PUQ49B1DRN1	Mid
Q49B1A	All Other Employers: tips, bonuses, etc.	PUQ49B1ARN1	Low

Q73A1	Other Money Income	PUQ73RN1	Low
Q93	Energy Assistance	HUQ94RN1	Low

# **APPENDIX E**

## **SPECIFIC METROPOLITAN IDENTIFIERS**

(Beginning August 2015)

List 1: FIPS Metropolitan Area (CBSA) Codes

List 2: FIPS Consolidated Statistical Area (CSA) Codes

List 3: Individual Principal Cities

List 4: FIPS County Codes

Unless otherwise noted, all definitions for geographic areas on these lists reflect the February 28, 2013 OMB definitions.

Care should be taken when tallying smaller areas, such as smaller cities, counties and metropolitan areas during the time frame of May 2014-July 2015. This is because we will be phasing in a new set of geographic areas to coincide with the phase-in of a new sample based on the results of the 2010 Census. Some smaller areas will be phasing-out or phasing-in during this time frame and estimates for such areas will fluctuate wildly during this time period and not be as accurate as they will be prior to May 2014 or after July 2015.

# LIST 1: FIPS Metropolitan Area (CBSA) Codes

Metropolitan Areas are defined using February 28, 2013 OMB definitions.

<u>FIPS Code</u>	<u>Metropolitan (CBSA) TITLE</u>
10180	Abilene, TX
10420	Akron, OH
10580	Albany-Schenectady-Troy, NY
10740	Albuquerque, NM
10900	Allentown-Bethlehem-Easton, PA-NJ
11100	Amarillo, TX
11460	Ann Arbor, MI
11540	Appleton, WI
11700	Asheville, NC
12020	Athens-Clarke County, GA
12060	Atlanta-Sandy Springs-Roswell, GA
12100	Atlantic City-Hammonton, NJ
12220	Auburn-Opelika, AL
12260	Augusta-Richmond County, GA-SC
12420	Austin-Round Rock, TX
12540	Bakersfield, CA
12580	Baltimore-Columbia-Towson, MD
12620	Bangor, ME
12700	Barnstable, MA
12940	Baton Rouge, LA
12980	Battle Creek, MI
13140	Beaumont-Port Arthur, TX
13460	Bend-Redmond, OR
13740	Billings, MT
13780	Binghamton, NY
13820	Birmingham-Hoover, AL
13980	Blacksburg—Christiansburg-Radford, VA
14010	Bloomington, IL
14020	Bloomington, IN

## LIST 2: FIPS Consolidated Statistical Area (CSA) Codes

**The following CSA's (Combined Statistical Areas) contain 2 or more Metropolitan Statistical Areas that are in the CPS sample and are individually identified on the public use files. Micropolitan Statistical Areas are not specifically identified in the CPS and are not used to identify CSA's nor are parts of such areas coded as belonging to CSA's. The component CBSA's identified on the CPS Public Use Files are listed for each CSA.**

CSA Code	CBSA Code	CSA Title Component Parts (CBSA's)
104	10580 24020	Albany-Schenectady, NY Albany-Schenectady-Troy, NY Glen Falls, NY
106	10740 42140	Albuquerque-Santa Fe-Las Vegas, NM Albuquerque, NM Santa Fe, NM

	49020	Winchester, VA-WV

## List 3: Individual Principal Cities

**Please Note: You must use the CBSA code in combination with the city code to uniquely identify principal cities. If a county name is provided, you must incorporate the county code into any algorithm used to tabulate a specific city's characteristics. The same applies to state codes for multi-state CBSA's.**

<b>CBSA Code</b>	<b>Title  City</b>	<b>GTINDVPC</b>
38060	Phoenix-Mesa-Scottsdale, AZ

## Source of the Data and Accuracy of the Estimates for the 2021 Annual Social and Economic Supplement Microdata File

### SOURCE OF THE DATA

The data in this microdata file and the estimates in the reports *Income and Poverty in the United States: 2020*, *Health Insurance Coverage in the United States: 2020*, and *The Supplemental Poverty Measure: 2020* come from the 2021<sup>1</sup> Annual Social and Economic Supplement (ASEC) of the Current Population Survey (CPS). The U.S. Census Bureau conducts the CPS ASEC over a 3-month period in February, March, and April, with most of the data collection occurring in the month of March. The CPS ASEC uses two sets of questions, the basic CPS and a set of supplemental questions. The CPS, sponsored jointly by the Census Bureau and the U.S. Bureau of Labor Statistics, is the country's primary source of labor force statistics for the entire population. The Census Bureau and the U.S. Bureau of Labor Statistics also jointly sponsor the CPS ASEC.

**Basic CPS.** The monthly CPS collects primarily labor force data about the civilian noninstitutionalized population living in the United States. The institutionalized population, which is excluded from the universe, consists primarily of the population in correctional institutions and nursing homes (98 percent of the 4.0 million institutionalized people in the 2010 Census). Starting in August 2017, college and university dormitories were also excluded from the universe because most of the residents had usual residences elsewhere. Interviewers ask questions concerning labor force participation of each member 15 years old and older in sample households. Typically, the week containing the nineteenth of the month is the interview week. The week containing the twelfth is the reference week (i.e., the week about which the labor force questions are asked).

The CPS uses a multistage probability sample based on the results of the decennial census, with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. When files from the most recent decennial census become available, the Census Bureau gradually introduces a new sample design for the CPS.

Every ten years, the CPS first-stage sample is redesigned<sup>2</sup> reflecting changes based on the most recent decennial census. In the first stage of the sampling process, primary sampling units (PSUs)<sup>3</sup> were selected for sample. In the 2000 design, the United States was divided into 2,025 PSUs. These were then grouped into 824 strata and one PSU was selected for sample from each stratum. In the 2010 sample design, the United States was divided into

---

<sup>1</sup> For clarity and consistency throughout this report, the term "collection year" is the year the data is collected (in this case, 2021), and "data year" is the year about which the data are obtained (in this case, 2020). 2021 CPS ASEC asks questions of data year 2020, 2020 CPS ASEC asks questions of data year 2019, etc.

<sup>2</sup> For detailed information on the 2010 sample redesign, please refer to Bureau of Labor Statistics (2014).

<sup>3</sup> The PSUs correspond to substate areas (i.e., counties or groups of counties) that are geographically contiguous.

1,987 PSUs. These PSUs were then grouped into 852 strata. Within each stratum, a single PSU was chosen for the sample, with its probability of selection proportional to its population as of the most recent decennial census. In the case of strata consisting of only one PSU, the PSU was chosen with certainty.

In April 2014, the Census Bureau began phasing out the 2000 sample and replaced it with the 2010 sample, creating a mixed sampling frame. Two simultaneous changes occurred during this phase-in period. First, within the PSUs selected for both the 2000 and 2010 designs, sample households from the 2010 design gradually replaced sample households from the 2000 design. Second, new PSUs selected for only the 2010 design gradually replaced outgoing PSUs selected for only the 2000 design. By July 2015, the new 2010 sample design was completely implemented and the sample came entirely from the 2010 redesigned sample.

Approximately 69,000 sampled addresses were selected from the sampling frame for the basic CPS. Based on eligibility criteria, nine percent of these sampled addresses were sent directly to computer-assisted telephone interviewing (CATI). The remaining sampled addresses were assigned to interviewers for computer-assisted personal interviewing (CAPI).<sup>4</sup> Of all addresses in sample, about 59,000 were determined to be eligible for interview. Interviewers obtained interviews at about 44,900 of the housing units at these addresses.<sup>5</sup> Noninterviews occur when the occupants are not found at home after repeated calls or are unavailable for some other reason. Table 1 summarizes historical changes in the CPS design.

**The 2021 Annual Social and Economic Supplement.** In addition to the basic CPS questions, interviewers asked supplementary questions for the CPS ASEC. They asked these questions of the civilian noninstitutionalized population and also of military personnel who live in households with at least one other civilian adult. The additional questions covered the following topics:

- Household and family characteristics.
- Marital status.
- Geographic mobility.
- Foreign-born population.
- Income from the previous calendar year.
- Work status/occupation.
- Health insurance coverage.

---

<sup>4</sup> For further information on CATI and CAPI and the eligibility criteria, please refer to U.S. Census Bureau (2019e).

<sup>5</sup> Due to health and safety concerns stemming from the spread of COVID-19, March CPS interviewing was impacted. For the safety of both interviewers and respondents, in-person interviews were only conducted when telephone interviews could not be done. These procedural changes resulted in higher nonresponse for both the basic CPS and the ASEC Supplement. For additional information on the impacts of COVID-19 on the CPS ASEC, please refer to Subsection “Impact of the Coronavirus Pandemic” within Section “Comparability of Data”.

- Program participation.
- Educational attainment.

Including the basic CPS sample, approximately 90,800 addresses were in sample for the CPS ASEC. About 79,300 sampled addresses were determined to be eligible for interview, and about 62,800 interviews were conducted (see Table 1).

The additional sample for the CPS ASEC provides more reliable data than the basic CPS for Hispanic households, non-Hispanic minority households, and non-Hispanic White households with children 18 years or younger. These households were identified for sample from previous months and the following April. For more information about the households eligible for the CPS ASEC, please refer to U.S. Census Bureau (2019e).

**Table 1. Description of the March Basic Current Population Survey and Annual Social and Economic Supplement Sample Cases**

Time period	Number of sample PSUs <sup>A</sup>	Basic CPS <sup>B</sup> sampled addresses eligible		Total (CPS ASEC <sup>C</sup> /ADS <sup>D</sup> + basic CPS) sampled addresses eligible

<sup>A</sup> PSUs are primary sampling units.

<sup>B</sup> CPS is the Current Population Survey.

<sup>C</sup> CPS ASEC is the Annual Social and Economic Supplement of the Current Population Survey.

<sup>D</sup> The CPS ASEC was referred to as the Annual Demographic Supplement (ADS) until 2002.

<sup>E</sup> The 2014 CPS ASEC Redesign indicates the subsample of the basic CPS households which received the redesigned ASEC questionnaire incorporating new income and health insurance questions.

<sup>F</sup> The 2014 CPS ASEC Traditional indicates the subsample of the basic CPS households which received the the same ASEC questionnaire that was used in the 2013 CPS ASEC.

<sup>G</sup> The Census Bureau redesigned the CPS following the Census 2000. During phase-in of the new design, addresses from the new and old designs were in the sample.

<sup>H</sup> The Census Bureau redesigned the CPS following the 1980 Decennial Census of Population and Housing.

<sup>I</sup> The Census Bureau redesigned the CPS following the 1970 Decennial Census of Population and Housing.

**Estimation Procedure.** This survey's estimation procedure adjusts weighted sample results to agree with independently derived population controls of the civilian noninstitutionalized population of the United States, each state, and the District of Columbia. These population controls<sup>6</sup> are prepared monthly as part of the Census Bureau's Population Estimates Program.

<sup>6</sup> For additional information on population controls, including details on the demographic characteristics used and net international components, please refer to Chapters 1-3 and Appendix: History of the Current Population Survey of U.S. Census Bureau (2019e).

The population controls for the nation are distributed by demographic characteristics in two ways:

- Age, sex, and race (White alone, Black alone, and all other groups combined).
- Age, sex, and Hispanic origin.

The population controls for the states are distributed by:

- Race (Black alone and all other race groups combined).
- Age (0-15, 16-44, and 45 and over).
- Sex.

The independent estimates by age, sex, race, and Hispanic origin, and for states by selected age groups and broad race categories, are developed using the basic demographic accounting formula whereby the population from the 2010 Census data is updated using data on the components of population change (births, deaths, and net international migration) with net internal migration as an additional component in the state population controls.

The net international migration component of the population controls includes:

- Net international migration of the foreign born;
- Net migration between the United States and Puerto Rico;
- Net migration of natives to and from the United States; and
- Net movement of the Armed Forces population to and from the United States.

Because the latest available information on these components lags behind the survey date, it is necessary to make short-term projections of these components to develop the estimate for the survey date.

The estimation procedure of the CPS ASEC includes a further adjustment to give married and unmarried partners the same weight.

### **ACCURACY OF THE ESTIMATES**

A sample survey estimate has two types of error: sampling and nonsampling. The accuracy of an estimate depends on both types of error. The nature of the sampling error is known given the survey design; the full extent of the nonsampling error is unknown.

**Sampling Error.** Since the CPS estimates come from a sample, they may differ from figures from an enumeration of the entire population using the same questionnaires, instructions, and enumerators. For a given estimator, the difference between an estimate based on a sample and the estimate that would result if the sample were to include the entire population is known as sampling error. Standard errors, as calculated by methods described in “Standard Errors and Their Use,” are primarily measures of the magnitude of sampling error. However, the estimation of standard errors may include some nonsampling error.

**Nonsampling Error.** For a given estimator, the difference between the estimate that would result if the sample were to include the entire population and the true population value being estimated is known as nonsampling error. There are several sources of nonsampling error that may occur during the development or execution of the survey. It can occur because of circumstances created by the interviewer, the respondent, the survey instrument, or the way the data are collected and processed. Some nonsampling errors, and examples of each, include:

- Measurement error: The interviewer records the wrong answer, the respondent provides incorrect information, the respondent estimates the requested information, or an unclear survey question is misunderstood by the respondent.
- Coverage error: Some individuals who should have been included in the survey frame were missed.
- Nonresponse error: Responses are not collected from all those in the sample or the respondent is unwilling to provide information.
- Imputation error: Values are estimated imprecisely for missing data.
- Processing error: Forms may be lost, data may be incorrectly keyed, coded, or recoded, etc.

To minimize these errors, the Census Bureau applies quality control procedures during all stages of the production process including the design of the survey, the wording of questions, the review of the work of interviewers and coders, and the statistical review of reports.

Answers to questions about money income often depend on the memory or knowledge of one person in a household. Recall problems can cause underestimates of income in survey data because it is easy to forget minor or irregular sources of income. Respondents may also misunderstand what the Census Bureau considers money income or may simply be unwilling to answer these questions correctly because the questions are considered too personal. For more details, please refer to Appendix C of U.S. Census Bureau (1993).

Two types of nonsampling error that can be examined to a limited extent are nonresponse and undercoverage.

**Nonresponse.** The effect of nonresponse cannot be measured directly, but one indication of its potential effect is the nonresponse rate. For the cases eligible for the 2021 ASEC, the basic CPS household-level unweighted nonresponse rate was 20.7 percent. The household-level unweighted nonresponse rate for the ASEC was an additional 18.0 percent. These two nonresponse rates lead to a combined supplement unweighted nonresponse rate of 35.0 percent.<sup>7</sup>

---

<sup>7</sup> Because the ASEC is at the household level, the overall/combined ASEC response rate is a product of the basic CPS response rate and the ASEC response rate.

In accordance with Census Bureau and Office of Management and Budget Quality Standards, the Census Bureau will conduct an analysis to assess nonresponse bias in the 2021 CPS ASEC.

Responses are made up of complete interviews and sufficient partial interviews. A sufficient partial interview is an incomplete interview in which the household or person answered enough of the questionnaire for the supplement sponsor to consider the interview complete. The remaining supplement questions may have been edited or imputed to fill in missing values. Insufficient partial interviews are considered to be nonrespondents. Refer to the supplement overview attachment in the technical documentation for the specific questions deemed critical by the sponsor as necessary to answer in order to be considered a sufficient partial interview.

As a result of sufficient partial interviews being considered responses, individual items/questions have their own response and refusal rates. As part of the nonsampling error analysis, the item response rates, item refusal rates, and edits are reviewed. For the CPS ASEC, the unweighted item refusal rates range from 0.0 percent to 5.0 percent. The unweighted item allocation rates range from 22.5 percent to 73.5 percent.

**Undercoverage.** The concept of coverage with a survey sampling process is defined as the extent to which the total population that could be selected for sample “covers” the survey’s target population. Missed housing units and missed people within sample households create undercoverage in the CPS. Overall CPS undercoverage for March 2021 is estimated to be about nine percent. CPS coverage varies with age, sex, and race. Generally, coverage is higher for females than for males and higher for non-Blacks than for Blacks. This differential coverage is a general problem for most household-based surveys.

The CPS weighting procedure mitigates bias from undercoverage, but biases may still be present when people who are missed by the survey differ from those interviewed in ways other than age, race, sex, Hispanic origin, and state of residence. How this weighting procedure affects other variables in the survey is not precisely known. All of these considerations affect comparisons across different surveys or data sources.

A common measure of survey coverage is the coverage ratio, calculated as the estimated population before poststratification divided by the independent population control. Table 2 shows March 2021 CPS coverage ratios by age and sex for certain race and Hispanic groups. The CPS coverage ratios can exhibit some variability from month to month.

**Table 2. Current Population Survey Coverage Ratios: March 2021**

Age group	<b>Total</b>			<b>White alone</b>		<b>Black alone</b>		<b>Residual race<sup>A</sup></b>		<b>Hispanic<sup>B</sup></b>

Source: U.S. Census Bureau, Current Population Survey, March 2021.

<sup>A</sup> The Residual race group includes cases indicating a single race other than White or Black, and cases indicating two or more races.

<sup>B</sup> Hispanics may be any race.

Note: For a more detailed discussion on the use of parameters for race and ethnicity, please refer to the "Generalized Variance Parameters" section.

**Comparability of Data.** Data obtained from the CPS and other sources are not entirely comparable. This is due to differences in interviewer training and experience and in differing survey processes. These differences are examples of nonsampling variability not reflected in the standard errors. Therefore, caution should be used when comparing results from different sources.

Data users should be aware that estimates in the reports, *Income and Poverty in the United States: 2020*, *Health Insurance Coverage in the United States: 2020*, and *The Supplemental Poverty Measure: 2020*, use the internal CPS ASEC file. The Census Bureau must keep survey responses confidential, so disclosure avoidance techniques are applied to files prior to public release. Therefore, some estimates using the microdata files may differ from the estimates provided in the reports.

Caution should be used when comparing estimates of the Hispanic population over time. No independent population control totals for people of Hispanic origin were used before 1985.

Caution should also be used when comparing CPS ASEC results from different years. Below, more detail is provided on several reasons for caution when comparing estimates across years.

**Impact of the Coronavirus Pandemic.** Data users should exercise caution when comparing estimates for data years 2019 and 2020 from the reports or from the microdata files to those from previous years due to the effects that the coronavirus (COVID-19) had on

interviewing and response rates. Interviewing for the March 2020 CPS began on March 15, 2020. In order to protect the health and safety of Census Bureau staff and respondents, the survey suspended in-person interviewing and closed the two CATI contact centers on March 20, 2020. For the rest of March and through April 2020, the Census Bureau continued to attempt all interviews by phone. For those whose first month in the survey was March or April 2020, the Census Bureau used vendor-provided telephone numbers associated with the sample address.

While the Census Bureau went to great lengths to complete interviews by telephone, the response rate for the CPS basic household survey in March 2020 was 73 percent, about 10 percentage points lower than in preceding months and the same period in 2019. Further, as the Bureau of Labor Statistics (2020) stated in their Frequently Asked Questions accompanying the April 3, 2020 release of The Employment Situation for March 2020, “Response rates for households normally more likely to be interviewed in person were particularly low. The response rate for households entering the sample for their first month was over 20 percentage points lower than in recent months, and the rate for those in the fifth month was over 10 percentage points lower.”

In 2021, for the safety of both interviewers and respondents, in-person interviews were only conducted when telephone interviews could not be done. In March 2021, the response rate for the CPS basic household survey improved to about 76<sup>8</sup> percent. While the response rate improved, it is important to examine how respondents differ from nonrespondents as this difference could affect income and poverty estimates. Using administrative data, Census Bureau researchers have documented that there are more (and larger) differences between respondents and nonrespondents in 2020 and 2021 than in earlier years. Of particular interest for the estimates in the ASEC reports are the differences in median income and educational attainment, indicating that respondents in 2020 and 2021 had relatively higher income and were more educated than nonrespondents.<sup>9</sup>

Change in Processing System. Data users should exercise caution when comparing estimates from the CPS ASEC for data years 2020, 2019, and 2018 to estimates from earlier years. An updated data processing system was implemented beginning with data year 2018 estimates. This system introduced demographic edit changes to account for same-sex couples, revised procedures for editing income and health insurance variables, and added several new income and health insurance variables. Changes to the editing procedures encompassed both changes to the resolution of logically inconsistent data and changes to the imputation methods. The 2019, 2020, and 2021 CPS ASEC estimates for data years 2018, 2019, and 2020 can be compared to the 2018 CPS ASEC Bridge Files<sup>10</sup>, which contain data year 2017 estimates, and to

---

<sup>8</sup> This value differs from the response rate obtained using the values in the “Nonresponse” section because this value is specifically for March CPS whereas the values in the “Nonresponse” section are for the full CPS sample that was eligible for ASEC.

<sup>9</sup> For additional information, please refer to Rothbaum & Bee (2020) and U.S. Census Bureau (2021).

<sup>10</sup> For additional information on the 2018 CPS ASEC Bridge Files, please refer to the Documentation and User Notes in U.S. Census Bureau (2019b).

the 2017 CPS ASEC Research Files<sup>11</sup>, which contain estimates for data year 2016. The 2017 Research File and the 2018 Bridge File both use the new processing system and serve as a bridge between the legacy production files and the updated processing system. Data users should be aware that the estimates from the 2017 and 2018 CPS ASEC Files for data years 2016 and 2017 using the legacy processing system are not directly comparable to 2019 CPS ASEC, 2020 CPS ASEC, and 2021 CPS ASEC estimates.

Change in Questionnaire. In 2014, the ASEC questionnaire was redesigned to incorporate new income and health insurance questions. Due to the differences in measurement, health insurance estimates for 2014-2017 CPS ASEC for data years 2013-2016 are not directly comparable to health insurance estimates for previous years.<sup>12</sup> For income and poverty estimates, when survey changes had statistically significant impacts, comparisons should be made by adjusting historical published estimates to approximate the magnitude of those impacts.<sup>13</sup>

Change in Census-Based Controls. Data users should exercise caution when comparing estimates for 2020 from the microdata file or from the ASEC reports, *Income and Poverty in the United States: 2020* and *Health Insurance Coverage in the United States: 2020* (which reflect 2010 Census-based controls), with estimates from the microdata files or ASEC Reports for 2001 to 2010 (from March 2002 CPS to March 2011 CPS), which reflect 2000 Census-based controls, and to 1993 to 2000 (from March 1994 CPS to March 2001 CPS), which reflect 1990 Census-based controls. Ideally, the same population controls should be used when comparing any estimates. In reality, the use of the same population controls is not practical when comparing trend data over a period of 10 to 20 years. Thus, when it is necessary to combine or compare data based on different controls or different designs, data users should be aware that changes in weighting controls or weighting procedures could create small differences between estimates.

Microdata files from previous years reflect the latest available census-based controls. Although the most recent change in population controls had relatively little impact on summary measures such as averages, medians, and percentage distributions, it did have a significant impact on levels. For example, use of 2010 Census-based controls results in about a 0.2 percent increase from the 2000 Census-based controls in the civilian noninstitutionalized population and in the number of families and households. Thus, estimates of levels for data collected in 2012 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These differences could be disproportionately greater for certain population subgroups than for the total population.

---

<sup>11</sup> For additional information on the 2017 CPS ASEC Research Files, please refer to the Documentation and User Notes in U.S. Census Bureau (2019a).

<sup>12</sup> For more information, refer to U.S. Census Bureau (2019f).

<sup>13</sup> For more details on the adjustment for these comparisons, refer to U.S. Census Bureau (2019g).

Users should also exercise caution because of changes caused by the phase-in of the 2010 Census files (see “Basic CPS”).<sup>14</sup> During this time period, CPS data were collected from sample designs based on different censuses. Two features of the new CPS design have the potential of affecting estimates: (1) the temporary disruption of the rotation pattern from August 2014 through June 2015 for a comparatively small portion of the sample and (2) the change in sample areas. Most of the known effect on estimates during and after the sample redesign will be the result of changing from 2000 to 2010 geographic definitions.

Research has shown that the national-level estimates of the metropolitan and nonmetropolitan populations should not change appreciably because of the new sample design. However, users should still exercise caution when comparing metropolitan and nonmetropolitan estimates across years with a design change, especially at the state level.

**A Nonsampling Error Warning.** Since the full extent of the nonsampling error is unknown, one should be particularly careful when interpreting results based on small differences between estimates. The Census Bureau recommends that data users incorporate information about nonsampling errors into their analyses, as nonsampling error could impact the conclusions drawn from the results. Caution should also be used when interpreting results based on a relatively small number of cases. Summary measures (such as medians and percentage distributions) probably do not reveal useful information when computed on a subpopulation smaller than 75,000.

For additional information on nonsampling error, including the possible impact on CPS data, when known, refer to U.S. Census Bureau (2019e) and Brooks & Bailer (1978).

**Estimation of Median Incomes.** The Census Bureau has changed the methodology for computing median income over time. The Census Bureau has computed medians using either Pareto interpolation or linear interpolation. Currently, we are using linear interpolation to estimate all medians. Pareto interpolation assumes a decreasing density of population within an income interval, whereas linear interpolation assumes a constant density of population within an income interval.

The Census Bureau calculated estimates of median income and associated standard errors for 1979 through 1987 using Pareto interpolation if the estimate was larger than \$20,000 for people or \$40,000 for families and households. We calculated estimates of median income and associated standard errors for 1976, 1977, and 1978 using Pareto interpolation if the estimate was larger than \$12,000 for people or \$18,000 for families and households. All other estimates of median income and associated standard errors for 1976 through 2020 (2021 CPS ASEC), and almost all of the estimates of median income and associated standard errors for 1975 and earlier, were calculated using linear interpolation. Thus, use caution when comparing median incomes above \$12,000 for people or \$18,000 for families and households for different years. Median incomes below those levels are more comparable from year to year since they have always been calculated using linear interpolation. For an indication of the comparability of medians calculated using Pareto

---

<sup>14</sup> The phase-in process using the 2010 Census files began April 2014.

interpolation with medians calculated using linear interpolation, refer to U.S. Census Bureau (1978) and U.S. Census Bureau (1993).

**Standard Errors and Their Use.** A sample estimate and its standard error enable one to construct a confidence interval. A confidence interval is a range about a given estimate that has a specified probability of containing the average result of all possible samples. For example, if all possible samples were surveyed under essentially the same general conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

A particular confidence interval may or may not contain the average estimate derived from all possible samples, but one can say with the specified confidence that the interval includes the average estimate calculated from all possible samples.

Standard errors may also be used to perform hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common type of hypothesis is that the population parameters are different. An example of this would be comparing the percentage of men who were part-time workers to the percentage of women who were part-time workers.

Tests may be performed at various levels of significance. A significance level is the probability of concluding that the characteristics are different when, in fact, they are the same. For example, to conclude that two characteristics are different at the 0.10 level of significance, the absolute value of the estimated difference between characteristics must be greater than or equal to 1.645 times the standard error of the difference.

The Census Bureau uses 90-percent confidence intervals and 0.10 levels of significance to determine statistical validity. Consult standard statistical textbooks for alternative criteria.

The tables in *Income and Poverty in the United States: 2020*, *Health Insurance Coverage in the United States: 2020*, and *The Supplemental Poverty Measure: 2020* list estimates followed by a number labeled “Margin of Error ( $\pm$ ).” This number can be added to and subtracted from the estimates to calculate upper and lower bounds of the 90-percent confidence interval. For example, *Health Insurance Coverage in the United States: 2020* shows the numbers for health insurance. For the statement, “8.6 percent of people did not have health insurance at any point during the year,” the 90-percent confidence interval for the estimate, 8.6 percent, is 8.6 ( $\pm$  0.2) percent, or 8.4 percent to 8.8 percent.<sup>15</sup>

---

<sup>15</sup> Note that the confidence interval here does not match the confidence interval given in Illustration 3 because the standard errors/margin of errors were calculated in two different ways. The margin of errors within the tables in the reports are calculated using direct estimates, whereas the standard errors within the illustrations later in this document are calculated using generalized variance estimates.

**Estimating Standard Errors.** The Census Bureau uses replication methods to estimate the standard errors of CPS and ASEC estimates. These methods primarily measure the magnitude of sampling error. However, they do measure some effects of nonsampling error as well. They do not measure systematic biases in the data associated with nonsampling error. Bias is the average over all possible samples of the differences between the sample estimates and the true value.

There are two ways to calculate standard errors for the 2021 CPS ASEC microdata file.

1. Direct estimates created from replicate weighting methods;
2. Generalized variance estimates created from generalized variance function (GVF) parameters  $a$  and  $b$ .

While replicate weighting methods provide the most accurate variance estimates, this approach requires more computing resources and more expertise on the part of the user. The GVF parameters provide a method of balancing accuracy with resource usage as well as a smoothing effect on standard error estimates. For more information on calculating direct estimates, refer to the “Replicate Weighting” section. For more information on GVF estimates, refer to the “Generalized Variance Parameters” section.

The *Income and Poverty in the United States: 2020*, *Health Insurance Coverage in the United States: 2020*, and *The Supplemental Poverty Measure: 2020* reports use replicate weights to calculate the margins of error of the estimates seen in tables and throughout the reports. In 2009, the Census Bureau released replicate weights for the 2005 through 2009 CPS ASEC collection years and has released replicate weights for each year since with the release of the CPS ASEC public use data. Since the published GVF parameters generally underestimated standard errors, standard errors produced using direct estimates may be higher than in previous reports. For most CPS ASEC estimates, the increase in standard errors from GVF to direct estimates will not alter the findings. However, marginally significant differences using the GVF may not be significant using replicate weights.

The examples in this source and accuracy statement are for guidance calculating standard errors using the generalized variance parameters. The use of generalized variance parameters is the recommended method of calculating standard errors for data users who do not have the ability to calculate the standard errors using replicate weights.

**Replicate Weighting.** The Census Bureau is releasing public use replicate weight files for the 2021 CPS ASEC that can be matched to the microdata files.

Replicate estimates are created using each of the 160 weights independently to create 160 replicate estimates. For point estimates, multiply the replicate weights by the item of interest at the record level (either an indicator variable to determine the number of people with a characteristic or a variable that contains some value) and tally the weighted values to create the 160 replicate estimates. Use these replicate estimates in formula (1) below to calculate the total variance for the item of interest. For example, say that the item of interest is the number of males. Tally the weights for all the records that indicated male to

create the 160 replicate estimates of the number of males. Then use these estimates in the formula to calculate the total variance for the number of males.

Calculate variance estimates for the estimates using:

$$\text{var}(\hat{\theta}_0) = \frac{1}{160} \sum_{i=1}^{160} (\hat{\theta}_i - \hat{\theta}_0)^2 \quad (1)$$

where  $\hat{\theta}_0$  is the estimate of the statistic of interest, such as a point estimate or proportion, using the weight for the full sample, and  $\hat{\theta}_i$  are the replicate estimates of the same statistic using the replicate weights. The standard error is the square root of the variance. For more information on using replicate weights and calculating direct estimates, refer to U.S. Census Bureau (2009).

**Generalized Variance Parameters.** While it is possible to estimate the standard error based on the survey data for each estimate in a report, there are a number of reasons why this is not done. A presentation of the individual standard errors would be of limited use, since one could not possibly predict all of the combinations of results that may be of interest to data users. Additionally, data users have access to CPS microdata files, and it is impossible to compute in advance the standard error for every estimate one might obtain from those data sets. Moreover, variance estimates are based on sample data and have variances of their own. Therefore, some methods of stabilizing these estimates of variance, for example, by generalizing or averaging over time, may be used to improve their reliability.

Experience has shown that certain groups of estimates have similar relationships between their variances and expected values. Modeling or generalizing may provide more stable variance estimates by taking advantage of these similarities. The GVF is a simple model that expresses the variance as a function of the expected value of the survey estimate. The parameters of the GVF are estimated using direct replicate variances. These GVF parameters provide a relatively easy method to obtain approximate standard errors for numerous characteristics.

In this source and accuracy statement:

- Tables 4 through 17 provide illustrations for calculating standard errors;
- Table 18 provides the GVF parameters for labor force estimates;
- Table 19 provides GVF parameters for characteristics from the 2021 CPS ASEC;
- Tables 20 and 21 provide correlation coefficients for comparing estimates from consecutive years;
- Table 22 provides correlation coefficients between race and subgroups; and
- Tables 23 and 24 provide factors and population controls to derive state and regional parameters.

The basic CPS questionnaire records the race and ethnicity of each respondent. With respect to race, a respondent can be White, Black, Asian, American Indian and Alaskan

Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI), or combinations of two or more of the preceding. A respondent's ethnicity can be Hispanic or non-Hispanic, regardless of race.

The GVF parameters to use in computing standard errors are dependent upon the race/ethnicity group of interest. Table 3 summarizes the relationship between the race/ethnicity group of interest and the GVF parameters to use in standard error calculations.

**Table 3. Estimation Groups of Interest and Generalized Variance Parameters**

<b>Race/ethnicity group of interest</b>	<b>Generalized variance parameters to use in standard error calculations</b>
Total population	Total or White
White alone, White alone or in combination (AOIC), or White non-Hispanic population	Total or White
Black alone, Black AOIC, or Black non-Hispanic population	Black
Asian alone, Asian AOIC, or Asian non-Hispanic population	Asian, American Indian and Alaska Native (AIAN), Native Hawaiian and Other Pacific Islander (NHOPI)
AIAN alone, AIAN AOIC, or AIAN non-Hispanic population	Asian, AIAN, NHOPI
NHOPI alone, NHOPI AOIC, or NHOPI non-Hispanic population	Asian, AIAN, NHOPI
Populations from other race groups	Asian, AIAN, NHOPI
Hispanic <sup>A</sup> population	Hispanic <sup>A</sup>
Two or more races <sup>B</sup> – employment/unemployment and educational attainment characteristics	Black
Two or more races <sup>B</sup> – all other characteristics	Asian, AIAN, NHOPI

Source: U.S. Census Bureau, Current Population Survey, internal data files.

<sup>A</sup> Hispanics may be any race.

<sup>B</sup> Two or more races refers to the group of cases self-classified as having two or more races.

Note: The AOIC population for a race group of interest includes people reporting only the race group of interest (alone) and people reporting multiple race categories including the race group of interest (in combination).

When calculating standard errors for an estimate of interest from cross-tabulations involving different characteristics, use the set of GVF parameters for the characteristic that will give the largest standard error. If the estimate of interest is strictly from basic CPS data, the GVF parameters will come from the CPS GVF table (Table 18). If the estimate is using ASEC data, the GVF parameters will come from the ASEC GVF table (Table 19).

**Standard Errors of Estimated Numbers.** The approximate standard error,  $s_x$ , of an estimated number from this microdata file can be obtained by using the formula:

$$s_x = \sqrt{ax^2 + bx} \quad (2)$$

Here  $x$  is the size of the estimate, and  $a$  and  $b$  are the parameters in Table 18 or 19 associated with the particular type of characteristic.

#### Illustration 1

Suppose there were 4,416,000 unemployed females (ages 16 and up) in the civilian labor force. Table 4 shows how to use the appropriate parameters from Table 18 and Formula (2) to estimate the standard error and confidence interval.

**Table 4. Illustration of Standard Errors of Estimated Numbers**

Number of unemployed females in the civilian labor force ( $x$ )	4,416,000
a-parameter ( $a$ )	-0.000028
b-parameter ( $b$ )	2,788
Standard error	108,000
90-percent confidence interval	4,238,000 to 4,594,000

Source: U.S. Census Bureau, Current Population Survey, March 2021.

The standard error is calculated as

$$s_x = \sqrt{-0.000028 \times 4,416,000^2 + 2,788 \times 4,416,000},$$

which, rounded to the nearest thousand, is 108,000. The 90-percent confidence interval is calculated as  $4,416,000 \pm 1.645 \times 108,000$ .

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

#### Illustration 2

Suppose there were 61,454,000 married-couple family households. Table 5 shows how to use the appropriate parameters from Table 19 and Formula (2) to estimate the standard error and confidence interval.

**Table 5. Second Illustration of Standard Errors of Estimated Numbers**

Number of married-couple family households ( $x$ )	61,454,000
a-parameter ( $a$ )	-0.000008
b-parameter ( $b$ )	3,051
Standard error	397,000
90-percent confidence interval	60,801,000 to 62,107,000

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_x = \sqrt{-0.000008 \times 61,454,000^2 + 3,051 \times 61,454,000}$$

which, rounded to the nearest thousand, is 397,000. The 90-percent confidence interval is calculated as  $61,454,000 \pm 1.645 \times 397,000$ .

A conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all possible samples.

**Standard Errors of Estimated Percentages.** The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends on both the size of the percentage and its base. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more. When the numerator and denominator of the percentage are in different categories, use the parameter from Table 18 or 19 as indicated by the numerator.

The approximate standard error,  $s_{y,p}$ , of an estimated percentage can be obtained by using the formula:

$$s_{y,p} = \sqrt{\frac{b}{y} p(100 - p)} \quad (3)$$

Here  $y$  is the total number of people, families, households, or unrelated individuals in the base or denominator of the percentage,  $p$  is the percentage  $100 \times x/y$  ( $0 \leq p \leq 100$ ), and  $b$  is the parameter in Table 18 or 19 associated with the characteristic in the numerator of the percentage.

### Illustration 3

The report, *Health Insurance Coverage in the United States: 2020*, shows that there were 27,957,000 out of 325,638,000 people, or 8.6 percent, who did not have health insurance. Table 6 shows how to use the appropriate parameters from Table 19 and Formula (3) to estimate the standard error and confidence interval.

**Table 6. Illustration of Standard Errors of Estimated Percentages**

Percentage of people without health insurance ( $p$ )	8.6
Base ( $y$ )	325,638,000
b-parameter ( $b$ )	2,981
Standard error	0.08
90-percent confidence interval	8.5 to 8.7

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{y,p} = \sqrt{\frac{2,981}{325,638,000} \times 8.6 \times (100.0 - 8.6)} = 0.08$$

and the 90-percent confidence interval for the estimated percentage of people without health insurance is from 8.5 to 8.7 percent (i.e.,  $8.6 \pm 1.645 \times 0.08$ ).

**Standard Errors of Estimated Differences.** The standard error of the difference between two sample estimates is approximately equal to

$$s_{x_1 - x_2} = \sqrt{s_{x_1}^2 + s_{x_2}^2 - 2rs_{x_1} s_{x_2}} \quad (4)$$

where  $s_{x_1}$  and  $s_{x_2}$  are the standard errors of the estimates,  $x_1$  and  $x_2$ . The estimates can be numbers, percentages, ratios, etc. Tables 20 and 21 contain the correlation coefficient,  $r$ , for CPS year-to-year comparisons for CPS poverty, income, and health insurance estimates of numbers and proportions. Table 22 contains the correlation coefficient  $r$  for making comparisons between race categories that are subsets of one another. For example, to compare the number of people in poverty who listed White as their only race to the number of people in poverty who are White alone or in combination with another race, a correlation coefficient is needed to account for the large overlap between the two groups. For making other comparisons (including race overlapping where one group is not a complete subset of the other), assume that  $r$  equals zero. Making this assumption will result in accurate estimates of standard errors for the difference between two estimates of the same characteristic in two different areas, or for the difference between separate and uncorrelated characteristics in the same area. However, if there is a high positive (negative) correlation between the two characteristics, the formula will overestimate (underestimate) the true standard error.

#### Illustration 4

Suppose there were 27,275,000 men over age 24 who were never married and 10,749,000 men over age 24 who were divorced. The apparent difference is 16,526,000. Table 7 shows how to use Formulas (2) and (4) with  $r = 0$  and the appropriate parameters from Table 19 to estimate the standard errors and confidence intervals.

**Table 7. Illustration of Standard Errors of Estimated Differences**

	Never married ( $x_1$ )	Divorced ( $x_2$ )	Difference
Number of males over age 24	27,275,000	10,749,000	16,526,000
a-parameter ( $a$ )	-0.000008	-0.000008	-
b-parameter ( $b$ )	2,713	2,713	-
Standard error	261,000	168,000	310,000
90-percent confidence interval	26,846,000 to 27,704,000	10,473,000 to 11,025,000	16,016,000 to 17,036,000

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The standard error of the difference is calculated as

$$s_{x_1-x_2} = \sqrt{261,000^2 + 168,000^2}$$

which, rounded to the nearest thousand, is 310,000. The 90-percent confidence interval around the difference is calculated as  $16,526,000 \pm 1.645 \times 310,000$ . Since this interval does not include zero, we can conclude with 90-percent confidence that the number of never-married men over age 24 was higher than the number of divorced men over age 24.

#### Illustration 5

The report, *Income and Poverty in the United States: 2020*, shows that 10,466,000 out of 72,637,000 children, or 14.5 percent, were reported as in poverty in 2019, and that 11,607,000 out of 72,295,000, or 16.1 percent, were in poverty in 2020. The apparent difference is 1.6 percent. Table 8 shows how to use the appropriate parameters from Table 19 and Formulas (3) and (4) to estimate the standard error and confidence interval.

**Table 8. Second Illustration of Standard Errors of Estimated Differences**

	2019 ( $x_1$ )	2020 ( $x_2$ )	Difference
Percentage of children in poverty ( $p$ )	14.5 <sup>A</sup>	16.1	1.6
Base	72,637,000	72,295,000	-
b-parameter ( $b$ )	3,781 <sup>B</sup>	3,503	-
Correlation coefficient ( $r$ )	-	-	0.45
Standard error	0.25	0.26	0.27
90-percent confidence interval	14.1 to 14.9	15.7 to 16.5	1.2 to 2.0

Source: U.S. Census Bureau, Current Population Survey, 2020-2021 Annual Social and Economic Supplement.

<sup>A</sup> There may be a difference due to rounding.

<sup>B</sup> This value comes from the Source and Accuracy Statement for the 2020 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2020). For additional information, refer to the "Year-to-Year Factors" section.

The standard error of the difference is calculated as

$$s_{x-x} = \sqrt{0.25^2 + 0.26^2 - 2 \times 0.45 \times 0.25 \times 0.26} = 0.27$$

and the 90-percent confidence interval around the difference is calculated as  $1.6 \pm 1.645 \times 0.27$ . Since this interval does not include zero, we can conclude with 90-percent confidence that the percentage of children in poverty in 2020 is significantly more than the percentage of children in poverty in 2019.

**Standard Errors of Estimated Ratios.** Certain estimates may be calculated as the ratio of two numbers. Compute the standard error of a ratio,  $x/y$ , using

$$s_{\frac{x}{y}} = \frac{x}{y} \sqrt{\left(\frac{s_x}{x}\right)^2 + \left(\frac{s_y}{y}\right)^2 - 2 \frac{s_x s_y}{xy}} \quad (5)$$

The standard error of the numerator,  $s_x$ , and that of the denominator,  $s_y$ , may be calculated using formulas described earlier. In Formula (5),  $r$  represents the correlation between the numerator and the denominator of the estimate.

For one type of ratio, the denominator is a count of families or households and the numerator is a count of people in those families or households with a certain characteristic. If there is at least one person with the characteristic in every family or household, use 0.7 as an estimate of  $r$ . An example of this type is the average number of children per family with children.

For all other types of ratios,  $r$  is assumed to be zero. Examples are the average number of children per family and the family poverty rate. If  $r$  is actually positive (negative), then this procedure will provide an overestimate (underestimate) of the standard error of the ratio.

Note: For estimates expressed as the ratio of  $x$  per 100  $y$  or  $x$  per 1,000  $y$ , multiply Formula (5) by 100 or 1,000, respectively, to obtain the standard error.

#### Illustration 6

Suppose there were 10,332,000 males working part-time and 16,694,000 females working part-time. The ratio of males working part-time to females working part-time would be 0.619, or 61.9 percent. Table 9 shows how to use the appropriate parameters from Table 18 and Formulas (2) and (5) with  $r = 0$  to estimate the standard errors and confidence intervals.

**Table 9. Illustration of Standard Errors of Estimated Ratios**

	Males ( $x$ )	Females ( $y$ )	Ratio
Number who work part-time	10,332,000	16,694,000	0.619
a-parameter ( $a$ )	-0.000031	-0.000028	-
b-parameter ( $b$ )	2,947	2,788	-
Standard error	165,000	197,000	0.012
90-percent confidence interval	10,061,000 to 10,603,000	16,370,000 to 17,018,000	0.599 to 0.639

Source: U.S. Census Bureau, Current Population Survey, March 2021.

The standard error is calculated as

$$s_{x/y} = \frac{10,332,000}{16,694,000} \sqrt{\left(\frac{165,000}{10,332,000}\right)^2 + \left(\frac{197,000}{16,694,000}\right)^2} = 0.012$$

and the 90-percent confidence interval is calculated as  $0.619 \pm 1.645 \times 0.012$ .

#### Illustration 7

The report, *Income and Poverty in the United States: 2020*, shows that the number of families below the poverty level,  $x$ , was 7,294,000 and the total number of families,  $y$ , was 83,918,000. The ratio of families below the poverty level to the total number of families would be 0.087 or 8.7 percent. Table 10 shows how to use the appropriate parameters

from Table 19 and Formulas (2) and (5) with  $r = 0$  to estimate the standard errors and confidence intervals.

**Table 10. Second Illustration of Standard Errors of Estimated Ratios**

	In poverty (x)	Total (y)	Ratio (in percent)
Number of families	7,294,000	83,918,000	8.7
a-parameter (a)	0.000152	-0.000008	-
b-parameter (b)	3,132	3,051	-
Standard error	176,000	447,000	0.21
90-percent confidence interval	7,004,000 to 7,584,000	83,183,000 to 84,653,000	8.4 to 9.0

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{x/y} = \frac{7,294,000}{83,918,000} \sqrt{\left(\frac{176,000}{7,294,000}\right)^2 + \left(\frac{447,000}{83,918,000}\right)^2} = 0.0021 = 0.21\%$$

and the 90-percent confidence interval of the percentage is calculated as  $8.7 \pm 1.645 \times 0.21$ .

**Standard Errors of Estimated Medians.** The sampling variability of an estimated median depends on the form of the distribution and the size of the base. One can approximate the reliability of an estimated median by determining a confidence interval about it. (See “Standard Errors and Their Use” for a general discussion of confidence intervals.)

Estimate the 68-percent confidence limits of a median based on sample data using the following procedure:

1. Using Formula (3) and the base of the distribution, calculate the standard error of 50 percent.
2. Add to and subtract from 50 percent the standard error determined in step 1. These two numbers are the percentage limits corresponding to the 68-percent confidence interval about the estimated median.
3. Using the distribution of the characteristic, determine upper and lower limits of the 68-percent confidence interval by calculating values corresponding to the two points established in step 2.

Note: The percentage limits found in step 2 may or may not fall in the same characteristic distribution interval.

Use the following formula to calculate the upper and lower limits:

$$X_p = \frac{pN - N_1}{N_2 - N_1} (A_2 - A_1) + A_1 \quad (6)$$

where

$X_p$  = estimated upper and lower bounds for the confidence interval ( $0 \leq p \leq 1$ ). For purposes of calculating the confidence interval,  $p$  takes on the values determined in step 2. Note that  $X_p$  estimates the median when  $p = 0.50$ .

$N$  = for distribution of numbers: the total number of units (people, households, etc.) for the characteristic in the distribution.

= for distribution of percentages: the value 100.

$p$  = the values obtained in Step 2.

$A_1, A_2$  = the lower and upper bounds, respectively, of the interval containing  $X_p$ .

$N_1, N_2$  = for distribution of numbers: the estimated number of units (people, households, etc.) with values of the characteristic less than or equal to  $A_1$  and  $A_2$ , respectively.

= for distribution of percentages: the estimated percentage of units (people, households, etc.) having values of the characteristic less than or equal to  $A_1$  and  $A_2$ , respectively.

4. Divide the difference between the two points determined in step 3 by 2 to obtain the standard error of the median.

Note: Median incomes and their standard errors calculated as below may differ from those in published tables and reports showing income, since narrower income intervals were used in those calculations.

#### Illustration 8

The report, *Income and Poverty in the United States: 2020*, shows that there were 129,931,000 households, and their income was distributed as shown in Table 11.

**Table 11. Distribution of Household Income for Illustration 8**

Income level	Number of households	Cumulative number of households	Cumulative percent of households
Under \$5,000	4,211,000	4,211,000	3.24%
\$5,000 to \$9,999	2,926,000	7,137,000	5.49%
\$10,000 to \$14,999	5,109,000	12,246,000	9.43%
\$15,000 to \$24,999	11,276,000	23,522,000	18.10%
\$25,000 to \$34,999	10,515,000	34,037,000	26.20%
\$35,000 to \$49,999	15,069,000	49,106,000	37.79%
\$50,000 to \$74,999	21,417,000	70,523,000	54.28%
\$75,000 to \$99,999	15,807,000	86,330,000	66.44%
\$100,000 and over	43,601,000	129,931,000 <sup>A</sup>	100.00% <sup>A</sup>

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

<sup>A</sup> There may be a difference due to rounding.

1. Using Formula (3) with  $b = 3,735$ , the standard error of 50 percent on a base of 129,931,000 is about 0.27 percent.
2. To obtain a 68-percent confidence interval on an estimated median, add to and subtract from 50 percent the standard error found in step 1. This yields percentage limits of 49.73 and 50.27.
3. The lower and upper limits for the interval in which the percentage limits falls are \$50,000 and \$75,000, respectively.

Then the estimated numbers of households with an income less than or equal to \$50,000 and \$75,000 are 49,106,000 and 70,523,000, respectively.

Using Formula (6), the lower limit for the confidence interval of the median is found to be about

$$X_{0.4973} = \frac{0.4973 \times 129,931,000 - 49,106,000}{70,523,000 - 49,106,000} (75,000 - 50,000) + 50,000 = 68,103$$

Similarly, the upper limit is found to be about

$$X_{0.5027} = \frac{0.5027 \times 129,931,000 - 49,106,000}{70,523,000 - 49,106,000} (75,000 - 50,000) + 50,000 = 68,922$$

Thus, a 68-percent confidence interval for the median income for households is from \$68,103 to \$68,922.

4. The standard error of the median is, therefore,

$$\frac{68,922 - 68,103}{2} = 409.5$$

**Standard Errors of Averages for Grouped Data.** The formula used to estimate the standard error of an average for grouped data is

$$s_x = \sqrt{\frac{b}{y}(S^2)} \quad (7)$$

In this formula,  $y$  is the size of the base of the distribution and  $b$  is the parameter from Table 4 or 5. The variance,  $S^2$ , is given by the following formula:

$$S^2 = \sum_{i=1}^c p_i \bar{x}_i^2 - \bar{x}^2 \quad (8)$$

where  $\bar{x}$ , the average of the distribution, is estimated by

$$\bar{x} = \sum_{i=1}^c p_i \bar{x}_i \quad (9)$$

where

$c$  = the number of groups;  $i$  indicates a specific group, thus taking on values 1 through  $c$ .

$p_i$  = estimated proportion of households, families, or people whose values for the characteristic being considered fall in group  $i$ .

$\bar{x}_i$  =  $(Z_{Li} + Z_{Ui})/2$  where  $Z_{Li}$  and  $Z_{Ui}$  are the lower and upper interval boundaries, respectively, for group  $i$ .  $\bar{x}_i$  is assumed to be the most representative value for the characteristic of households, families, or people in group  $i$ . If group  $c$  is open-ended, i.e., no upper interval boundary exists, use a group approximate average value of

$$\bar{x}_c = \frac{3}{2} Z_{Lc} \quad (10)$$

### Illustration 9

The report, *Income and Poverty in the United States: 2020*, shows that there were 7,294,000 families in poverty. Table 12 shows the distribution of the income deficit (the difference between their family income and poverty threshold) for all families in poverty.

**Table 12. Distribution of Income Deficit for Illustration 9**

Income deficit	Number of families in poverty	Percentage of families in poverty ( $p_i$ )	Average income deficit ( $\bar{x}_i$ )
Under \$1000	443,000	6.1%	500
\$1000 to \$2,499	597,000	8.2%	1,750
\$2,500 to \$4,999	943,000	12.9%	3,750
\$5,000 to \$7,499	927,000	12.7%	6,250
\$7,500 to \$9,999	725,000	9.9%	8,750
\$10,000 to \$12,499	628,000	8.6%	11,250
\$12,500 to \$14,999	545,000	7.5%	13,750
\$15,000 and over	2,487,000	34.1%	22,500
Total	7,294,000 <sup>A</sup>	100% <sup>A</sup>	

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

<sup>A</sup> There may be a difference due to rounding.

Using Formula (9),

$$\bar{x} = (0.061 \times 500) + (0.082 \times 1,750) + (0.129 \times 3,750) + (0.127 \times 6,250) + (0.099 \times 8,750) + (0.086 \times 11,250) + (0.075 \times 13,750) + (0.341 \times 22,500) = 11,989$$

and Formula (8),

$$S^2 = (0.061 \times 500^2) + (0.082 \times 1,750^2) + (0.129 \times 3,750^2) + (0.127 \times 6,250^2) + (0.099 \times 8,750^2) + (0.086 \times 11,250^2) + (0.075 \times 13,750^2) + (0.341 \times 22,500^2) - 11,989^2 = 68,580,000$$

Table 13 shows how to use the appropriate parameter from Table 19 and Formula (7) to estimate the standard error and confidence interval.

**Table 13. Illustration of Standard Errors of Averages for Grouped Data**

Average income deficit for families in poverty ( $\bar{x}$ )	\$11,989
Variance ( $S^2$ )	68,580,000
Base ( $y$ )	7,294,000
b-parameter ( $b$ )	3,132
Standard error	\$172
90-percent confidence interval	\$11,706 to \$12,272

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The standard error is calculated as

$$s_{\bar{x}} = \sqrt{\frac{3,132}{7,294,000}(68,580,000)} = 172$$

and the 90-percent confidence interval is calculated as  $\$11,989 \pm 1.645 \times \$172$ .

**Standard Errors of Estimated Per Capita Deficits.** Certain average values in reports associated with the CPS ASEC data represent the per capita deficit for households of a certain class. The average per capita deficit is approximately equal to

$$x = \frac{hm}{p} \quad (11)$$

where

$h$  = number of households in the class.

$m$  = average deficit for households in the class.

$p$  = number of people in households in the class.

$x$  = average per capita deficit of people in households in the class.

To approximate standard errors for these averages, use the formula

$$s_x = \frac{hm}{p} \sqrt{\left(\frac{s_m}{m}\right)^2 + \left(\frac{s_p}{p}\right)^2 + \left(\frac{s_h}{h}\right)^2 - 2r \left(\frac{s_p}{p}\right) \left(\frac{s_h}{h}\right)} \quad (12)$$

In Formula (12),  $r$  represents the correlation between  $p$  and  $h$ .

For one type of average, the class represents households containing a fixed number of people. For example,  $h$  could be the number of 3-person households. In this case, there is an exact correlation between the number of people in households and the number of households. Therefore,  $r = 1$  for such households. For other types of averages, the class represents households of other demographic types, for example, households in distinct regions, households in which the householder is of a certain age group, and owner-occupied and tenant-occupied households. In this and other cases in which the correlation between  $p$  and  $h$  is not perfect, use 0.7 as an estimate of  $r$ .

#### Illustration 10

The report, *Income and Poverty in the United States: 2020*, shows that there were 24,982,000 people living in families in poverty, and 7,294,000 families in poverty, with an average deficit income for families in poverty of \$11,989 with a standard error of \$172 (from Illustration 9). Table 14 shows how to use Formulas (2), (11), and (12) and the appropriate parameters from Table 19 and  $r = 0.7$  to estimate the standard errors and confidence intervals.

**Table 14. Illustration of Standard Errors of Estimated Per Capita Deficits**

	Number ( <i>h</i> )	Number of people ( <i>p</i> )	Average income deficit ( <i>m</i> )	Average per capita deficit ( <i>x</i> )
Value for families in poverty	7,294,000	24,982,000	\$11,989	\$3,500
a-parameter ( <i>a</i> )	0.000152	-0.000011	-	-
b-parameter ( <i>b</i> )	3,132	3,516	-	-
Correlation ( <i>r</i> )	-	-	-	0.7
Standard error	176,000	285,000	\$172	\$81
90-percent confidence interval	7,004,000 to 7,584,000	24,513,000 to 25,451,000	\$11,706 to \$12,272	\$3,367 to \$3,633

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

The estimate of the average per capita deficit is calculated as

$$x = \frac{7,294,000 \times 11,989}{24,982,000} = 3,500$$

and the standard error is calculated as

$$s_x = \frac{7,294,000 \times 11,989}{24,982,000} \sqrt{\left(\frac{172}{11,989}\right)^2 + \left(\frac{285,000}{24,982,000}\right)^2 + \left(\frac{176,000}{7,294,000}\right)^2 - 2 \times 0.7 \times \left(\frac{285,000}{24,982,000}\right) \times \left(\frac{176,000}{7,294,000}\right)}$$

$$= 81$$

The 90-percent confidence interval is calculated as  $\$3,500 \pm 1.645 \times \$81$ .

**Accuracy of State Estimates.** The redesign of the CPS following the 1980 census provided an opportunity to increase efficiency and accuracy of state data. All strata are now defined within state boundaries. The sample is allocated among the states to produce state and national estimates with the required accuracy while keeping total sample size to a minimum. Improved accuracy of state data was achieved with about the same sample size as in the 1970 design.

Since the CPS is designed to produce both state and national estimates, the proportion of the total population sampled and the sampling rates differ among the states. In general, the smaller the population of the state the larger the sampling proportion. For example, in Vermont, approximately 1 in every 250 households is sampled each month. In New York, the sample is about 1 in every 2,000 households. Nevertheless, the size of the sample in New York is four times larger than in Vermont because New York has a larger population.

Note: The Census Bureau recommends the use of 3-year averages to compare estimates across states and 2-year averages to evaluate changes in state income and poverty estimates over time. See “Standard Errors of Data for Combined Years.” Further, the *Income and Poverty in the United States* report no longer presents state estimates. Therefore, the Census Bureau recommends the American Community Survey (ACS) microdata file as the preferred source for income and poverty state

data in years 2006 (2005 estimates) to the present. A questionnaire redesign introduced with the 2014 CPS ASEC and an updated processing system introduced with the 2019 CPS ASEC each mark the start of new time series for health insurance estimates in the CPS ASEC, so data users should not create multiyear averages across these years.

**Standard Errors of State Estimates.** The standard error for a state may be obtained by determining new state-level a- and b-parameters and then using these adjusted parameters in the standard error formulas mentioned previously. To determine a new state-level b-parameter ( $b_{state}$ ), multiply the b-parameter from Table 18 or 19 by the state factor from Table 23. To determine a new state-level a-parameter ( $a_{state}$ ), use the following:

- (1) If the a-parameter from Table 18 or 19 is positive, multiply it by the state factor from Table 23.
- (2) If the a-parameter in Table 18 or 19 is negative, calculate the new state-level a-parameter as follows:

$$a_{state} = \frac{-b_{state}}{POP_{state}} \quad (13)$$

where  $POP_{state}$  is the state population found in Table 23.

#### Illustration 11

Suppose there were 13,995,000 people living in New York state who were born in the United States. Table 15 shows how to use Formulas (2) and (13) and the appropriate parameter, factor, and population from Tables 19 and 23 to estimate the standard error and confidence interval.

**Table 15. Illustration of Standard Errors of State Estimates**

Number of people in New York born in the U.S. ( $x$ )	13,995,000
b-parameter ( $b$ )	2,713
New York state factor	1.19
State population	19,003,366
State b-parameter ( $b_{state}$ )	3,228
State a-parameter ( $a_{state}$ )	-0.000170
Standard error	109,000
90-percent confidence interval	13,816,000 to 14,174,000

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

Obtain the state-level b-parameter by multiplying the b-parameter, 2,713 by the state factor, 1.19. This gives  $b_{state} = 2,713 \times 1.19 = 3,228$ . Obtain the needed state-level a-parameter by

$$a_{state} = \frac{-3,228}{19,003,366} = -0.000170$$

The standard error of the estimate of the number of people in New York state who were born in the United States can then be found by using Formula (2) and the new state-level  $a$ - and  $b$ - parameters, -0.000170 and 3,228, respectively. The standard error is given by

$$s_x = \sqrt{-0.000170 \times 13,995,000^2 + 3,228 \times 13,995,000}$$

which, rounded to the nearest thousand, is 109,000.

**Standard Errors of Regional Estimates.** To compute standard errors for regional estimates, follow the steps for computing standard errors for state estimates found in “Standard Errors for State Estimates” using the regional factors and populations found in Table 24.

#### Illustration 12

The report, *Income and Poverty in the United States: 2020*, shows that there were 16,619,000 of 125,002,841 people, or 13.3 percent, living in poverty in the South. Table 16 shows how to use Formulas (3) and (13) and the appropriate parameter, factor, and population from Tables 19 and 24 to estimate the standard error and confidence interval.

**Table 16. Illustration of Standard Errors of Regional Estimates**

Poverty rate in the South ( $p$ )	13.3
Base ( $y$ )	125,002,841
b-parameter ( $b$ )	3,516
South regional factor	1.13
Regional b-parameter ( $b_{region}$ )	3,973
Standard error	0.19
90-percent confidence interval	13.0 to 13.6

Source: U.S. Census Bureau, Current Population Survey, 2021 Annual Social and Economic Supplement.

Obtain the region-level b-parameter by multiplying the b-parameter, 3,516, by the South regional factor, 1.13. This gives  $b_{region} = 3,516 \times 1.13 = 3,973$

The standard error of the estimate of the poverty rate for people living in the South can then be found by using Formula (3) and the new region-level b-parameter, 3,973. The standard error is given by

$$s_{y,p} = \sqrt{\frac{3,973}{125,002,841} \times 13.3 \times (100 - 13.3)} = 0.19$$

and the 90-percent confidence interval of the poverty rate for people living in the South is calculated as  $13.3 \pm 1.645 \times 0.19$ .

**Standard Errors of Groups of States.** The standard error calculation for a group of states is similar to the standard error calculation for a single state. First, calculate a new state group factor for the group of states. Then, determine new state group  $a$ - and  $b$ -parameters.

Finally, use these adjusted parameters in the standard error formulas mentioned previously.

Use the following formula to determine a new state group factor:

$$state\ group\ factor = \frac{\sum_{i=1}^n POP_i \times state\ factor_i}{\sum_{i=1}^n POP_i} \quad (14)$$

where  $POP_i$  and  $state\ factor_i$  are the population and factor for state  $i$  from Table 23. To obtain a new state group b-parameter ( $b_{state\ group}$ ), multiply the b-parameter from Table 18 or 19 by the state group factor obtained by Formula (14). To determine a new state group a-parameter ( $a_{state\ group}$ ), use the following:

- (1) If the a-parameter from Table 18 or 19 is positive, multiply it by the state group factor determined by Formula (14).
- (2) If the a-parameter in Table 18 or 19 is negative, calculate the new state group a-parameter as follows:

$$a_{state\ group} = \frac{-b_{state\ group}}{\sum_{i=1}^n POP_i} \quad (15)$$

### Illustration 13

Suppose the state group factor for the state group Illinois-Indiana-Michigan was required. The appropriate factor would be

$$state\ group\ factor = \frac{12,345,509 \times 1.17 + 6,668,940 \times 1.11 + 9,853,650 \times 1.11}{12,345,509 + 6,668,940 + 9,853,650} = 1.14$$

**Standard Errors of Data for Combined Years.** Sometimes estimates for multiple years are combined to improve precision. For example, suppose  $\bar{x}$  is an average derived from  $n$  consecutive years' data, i.e.,  $\bar{x} = \sum_{i=1}^n \frac{x_i}{n}$ , where the  $x_i$  are the estimates for the individual years. Use the formulas described previously to estimate the standard error,  $s_{\bar{x}}$ , of each year's estimate. Then the standard error of  $\bar{x}$  is

$$s_{\bar{x}} = \frac{s_x}{n} \quad (16)$$

where

$$s_x = \sqrt{\sum_{i=1}^n \frac{s_i^2}{x_i} + 2r \sum_{i=1}^{n-1} \frac{s_i s_{i+1}}{x_i x_{i+1}}} \quad (17)$$

and  $s_{x_i}$  are the standard errors of the estimates  $x_i$ . Tables 20 and 21 contain the correlation coefficients,  $r$ , for the correlation between consecutive years  $i$  and  $i+1$ . Correlation between nonconsecutive years is zero. The correlations were derived for income, poverty, and health insurance estimates, but they can be used for other types of estimates where the year-to-year correlation between identical households is high.

The Census Bureau recommends the use of 3-year average estimates for certain small population subgroups<sup>16</sup> (see also “Accuracy of State Estimates.”) Two-year moving averages are recommended for these small population subgroups for comparisons across adjacent years.

#### Illustration 14

The report, *Income and Poverty in the United States: 2020*, provides the percentages of families in poverty. Suppose the 2018-2020<sup>17</sup> 3-year average percentage of families with female householder, no husband present, in poverty was 23.5. Suppose the percentages and bases for 2018, 2019, and 2020 were 24.9, 22.2, and 23.4 percent and 15,052,000, 14,838,000, and 15,491,000 respectively. Table 17 shows how to use the appropriate parameters and correlation coefficients from Tables 19 and 21 and Formulas (3), (16), and (17) to estimate the standard error and confidence interval.

**Table 17. Illustration of Standard Errors of Data for Combined Years**

	2018	2019	2020	2018-2020 Average
Percentage of families with female householder, no husband present, in poverty ( $p$ )	24.9	22.2	23.4 <sup>A</sup>	23.5
Base ( $y$ )	15,052,000	14,838,000	15,491,000	-
b-parameter ( $b$ )	3,631 <sup>B</sup>	5,529 <sup>C</sup>	3,132	-
Correlation ( $r$ )	-	-	-	0.35
Standard error	0.67	0.80	0.60	0.49
90-percent confidence interval	23.8 to 26.0	20.9 to 23.5	22.4 to 24.4	22.7 to 24.3

Source: U.S. Census Bureau, Current Population Survey, 2019-2021 Annual Social and Economic Supplement.

<sup>A</sup> There may be a difference due to rounding.

<sup>B</sup> This value comes from the Source and Accuracy Statement for the 2019 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2019d). For additional information, refer to the “Year-to-Year Factors” section.

<sup>C</sup> This value comes from the Source and Accuracy Statement for the 2020 Annual Social and Economic Supplement, Appendix G, Table 19 in U.S. Census Bureau (2020). For additional information, refer to the “Year-to-Year Factors” section.

<sup>16</sup> Estimates of characteristics of the American Indian and Alaska Native (AIAN) and Native Hawaiian and Other Pacific Islander (NHOPI) populations based on a single-year sample would be unreliable due to the small size of the sample that can be drawn from either population. Accordingly, such estimates are based on multiyear averages.

<sup>17</sup> The estimates for data year 2018 come from the 2019 CPS ASEC Files, and the estimates for data year 2019 come from the 2020 CPS ASEC Files.

The standard error of the 3-year average is calculated as

$$s_{\bar{x}} = \frac{1.47}{3} = 0.49$$

where

$$s_x = \sqrt{0.67^2 + 0.80^2 + 0.60^2 + (2 \times 0.35 \times 0.67 \times 0.80) + (2 \times 0.35 \times 0.80 \times 0.60)} = 1.47$$

The 90-percent confidence interval for the 3-year average percentage of families with a female householder, no husband present, in poverty is  $23.5 \pm 1.645 \times 0.49$ .

**Standard Errors of Quarterly or Yearly Averages.** For information on calculating standard errors for labor force data from the CPS which involve quarterly or yearly averages, please refer to Bureau of Labor Statistics (2006).

**Year-to-Year Factors.** In past years, the Census Bureau published a table of year factors for the CPS ASEC Supplement in the Source and Accuracy Statement. User demand for these factors has diminished with the introduction of replicate weights. Data users producing estimates from prior years should consult the Source and Accuracy Statements covering the years of their analysis to estimate standard errors.

**Technical Assistance.** If you require assistance or additional information, please contact the Demographic Statistical Methods Division via e-mail at [dsmd.source.and.accuracy@census.gov](mailto:dsmd.source.and.accuracy@census.gov).

Source: U.S. Census Bureau, Internal Current Population Survey data files for the 2010 Design.

Notes: These parameters are to be applied to basic CPS monthly labor force estimates. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For same-sex households, multiply the a- and b-parameters by 1.3. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaed by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Hispanic, and Asian, AIAN, NHOPI parameters. For the groups self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all employment characteristics.

Source: U.S. Census Bureau, Current Population Survey, Internal data from the 2021 Annual Social and Economic Supplement.

<sup>A</sup> AIAN is American Indian and Alaska Native, and NHOPI is Native Hawaiian and Other Pacific Islander.

<sup>B</sup> Hispanics may be any race.

Notes: These parameters are to be applied to the 2021 Annual Social and Economic Supplement data. The Total or White, Black, and Asian, AIAN, NHOPI parameters are to be used for both alone and in combination race group estimates. For same-sex households, multiply the a- and b-parameters by 1.3. For nonmetropolitan characteristics, multiply the a- and b-parameters by 1.5. If the characteristic of interest is total state population, not subtotaled by race or ethnicity, the a- and b-parameters are zero. For foreign-born and noncitizen characteristics for Total and White, the a- and b-parameters should be multiplied by 1.3. No adjustment is necessary for foreign-born and noncitizen characteristics for Black, Asian, AIAN, NHOPI, and Hispanic parameters. For the group self-classified as having two or more races, use the Asian, AIAN, NHOPI parameters for all characteristics except employment, unemployment, and educational attainment, in which case use Black parameters. For a more detailed discussion on the use of parameters for race and ethnicity, please refer to the “Generalized Variance Parameters” section.

**Table 20. Current Population Survey Year-to-Year Correlation Coefficients for Income and Health Insurance Characteristics: Data Years 1960 to 2020**

Characteristics	1960-2000 (basic) or 2000 (expanded)-2020		1999 (basic)- 2000 (expanded)	
	People	Families	People	Families
<b>Total</b>	<b>0.30</b>	<b>0.35</b>	<b>0.19</b>	<b>0.22</b>
White	0.30	0.35	0.20	0.23
Black	0.30	0.35	0.15	0.18
Other	0.30	0.35	0.15	0.17
Hispanic <sup>A</sup>	0.45	0.55	0.36	0.28

Source: U.S. Census Bureau, Current Population Survey, Internal data files.

<sup>A</sup> Hispanics may be any race.

Notes: Correlation coefficients are not available for income data before 1960. These correlation coefficients are for comparisons of consecutive years. For comparisons of nonconsecutive years, assume the correlation is zero. For households and unrelated individuals, use the correlation coefficient for families. For a more detailed discussion on the use of parameters for race and ethnicity, please refer to the “Generalized Variance Parameters” section.

# APPENDIX I

## HISTORICAL FILE INFORMATION

### Initial releases

A public use edition of the Current Population Survey, ASEC file, formerly known as the March file were originally available for 1976, 1978, and 1979. For 1980, 1984, and 1988 two files were available for each year. The first 1980 file contains estimates based on 1970 population counts and should be used for historical comparisons ending in 1980. The reweighted 1980 file contains estimates based on results of the 1980 census and should be used for comparisons between 1981 and 1984.

### 1980s

In 1984, the Bureau of the Census introduced a step into the second stage weighting procedure to control individual weights to independent estimates of the Hispanic population. Since this introduction caused a major disruption in the Hispanic estimates, two data files were created. The first file, without the Hispanic controls should be used for comparing estimates for years prior to 1984 and the second file should be used for comparison with 1985 and later files.

From March 1989 forward, March data are processed using the rewrite system. The rewrite system includes revised procedures to match supplement records to basic CPS records; revised weighting procedures; revised demographic and family edits; revised imputation procedures; and more income detail on the file.

For March 1988, there are two files: the regular Annual Demographic File and the Annual Demographic Rewrite File. The rewrite file has been prepared to allow historical comparison of data from the rewrite processing system implemented between 1988 and 1989. It is recommended that the rewrite file be used when comparing data collected from the March Annual Demographic Supplement from 1988 forward. Use the regular file, released in 1988, when comparing data from 1988 and prior years.

This is not to say, however, that comparisons cannot be made between years before and after 1988. When such analyses are done, for example between 1986 through 1989, data users must consider that similarities or differences between the data may be caused or effected by

the rewritten system. Thus, comparing estimates from the 1988 rewrite files and the 1988 regular file will reveal the extent of any differences caused by the processing system changes though not the specific change. The magnitude of the difference can then be applied to the estimates from 1986 and 1989 to reveal whether any real differences exist. There were several revisions made to the processing programs; therefore, it is difficult to determine which specific revision effected the differences or similarities in the data.

Some non-March data also are available from 1994 to present. For information about the Current Population Survey and Supplement Surveys, be sure to visit our online CPS home page at <https://www.census.gov/programs-surveys/cps.html> where you can search our knowledge base and submit questions.

### 2010s

In 2014, the Current Population Survey Annual Social and Economic Supplement (CPS ASEC) included redesigned questions for income and health insurance coverage, followed by changes being phased in beginning in 2015 to allow spouses and unmarried partners to specifically identify as opposite- or same-sex. While data from the updated collection methods were released on schedule, data processing changes to take advantage of the new content were available starting with the 2019 file.

In 2019, a redesigned processing system for the ASEC supplement was implemented. This new processing system had updates concerning three topics, same-sex/opposite-sex families, income & poverty, and health insurance.

First, the relationship to householder measure (PERRP) divides spouse and unmarried categories into opposite-sex and same-sex groups (i.e., opposite-sex spouse/husband/wife, same-sex spouse/husband/wife, opposite-sex unmarried partner, and same-sex unmarried partner). Second, the parent identification variables have changed from respondents identifying a mother and father in the household

(PELNMOM, PELNDAD) to identifying a parent and another parent (PEPAR1, PEPAR2). This allows easy reporting of children living with two mothers or two fathers.

For income and poverty, the updated processing system includes edits to take full advantage of the redesigned questionnaire. For example, several variables were added for defined-benefit pension income and defined-contribution withdrawals (such as from 401(k) plans) to replace the previous variables on retirement income. The imputation system was updated to make use of income ranges provided by some non-respondents as well as to increase the number of characteristics used in the imputation models.

The updated processing system includes a number of changes to CPS ASEC health insurance data that better integrate detailed

information from the 2014 questionnaire redesign. For example, the processing system introduces a new method of estimating coverage that builds from subannual estimates to determine whether a person was covered at any point in the previous calendar year. It also refines the methods by which missing and incomplete data are imputed and in which inconsistent information is handled. Finally, the file also includes additional information about types of coverage held at the time of survey and details about Marketplace coverage that were not previously available.

A more detailed explanation of these processing changes can be found in the blog “RESEARCH MATTERS: CPS ASEC Redesign and Processing Changes” at <https://www.census.gov/newsroom/blogs/research-matters/2019/09/cps-asec.html>.

# **APPENDIX J**

## **User Note 1**

The zipped files containing the SAS and CSV file formats, contained multiple sub-directories with an outdated version of the file. These files have been replaced to remove the excess directories and file versions. The correct version of the file has the variable FILEDATE=91821.
