Description:

1. Annual Social and Economic Supplements (ASEC) provides information on a person, family, and household level in the following areas: educational attainment, health insurance coverage, income sources and poverty related data.
2. The Small Area Health Insurance Estimates (SAHIE) is the only source of single-year health insurance coverage estimates for all U.S. counties. SAHIE data can be used to analyze geographic variation in health insurance coverage, as well as disparities in coverage by race/ethnicity, sex, age, and income levels that reflect thresholds for state and federal assistance programs.
